CHURCH MANAGEMENT SYSTEM

Everything the system does, step by step

Start on the next page: it says which sections matter for your job

Start here

Find what you do below and read the parts listed. On a screen the part names are links, so selecting one opens it directly.

Table 1. Which parts to read.

What you do	Read these	Covers
I take the attendance	**1. Getting started** **4. Attendance**	Record the headcount and offering, or tick people off by name.
I follow up newcomers	**1. Getting started** **5. Newcomers and follow-up** **6. Becoming a member**	The pipeline, visits, registering people and recording each contact.
I follow up members who miss church	**1. Getting started** **3. Members**	Absence follow-up tasks and recording each visit or call.
I lead a house fellowship	**1. Getting started** **4. Attendance**	Record your Friday evening meeting and its offering.
I look after the members list	**1. Getting started** **3. Members**	Adding people, categories, households and shepherds.
I handle the money	**1. Getting started** **8. Giving, expenses and remittance**	Giving, expenses, receipts and the monthly remittance.
I answer online enquiries	**1. Getting started** **7. Online enquiries**	Messages from social media, and turning them into visitors.
I am a pastor or overseer	**1. Getting started** **2. The dashboard** **9. Goals** **10. Reports**	The dashboard, goals, and the monthly report.
I set the system up	**1. Getting started** **11. Settings and people** **12. If something goes wrong**	Accounts, roles, locations, meetings, fellowships and lists.

Part 1 applies to everyone. It covers signing in, the layout of every screen, what your role and location decide, and using the system on a phone.

Part 13, Follow-up accountability: for anyone who follows people up or coordinates follow-up.

Part 14, Month-end balance: for whoever handles the money or approves the month end.

Part 15, Finding people and ticking newcomers: for everyone, new in version 11.16.

Contents

1. Getting started
2. The dashboard
3. Members
4. Attendance
5. Newcomers and follow-up
6. Becoming a member
7. Online enquiries
8. Giving, expenses and remittance
9. Goals
10. Reports
11. Settings and people
12. If something goes wrong
13. Follow-up accountability
14. Month-end balance
15. Finding people and ticking newcomers

1. Getting started

This part is for everyone. It covers signing in, the layout every screen shares, what your role and location decide, and using the system on a phone.

Signing in

Where: cms.dclm-bh.org/login

1. Type the email address your account was created with in the **Email** box.
2. Type your password in the **Password** box.
3. Press the blue **Sign in** button under the two boxes.

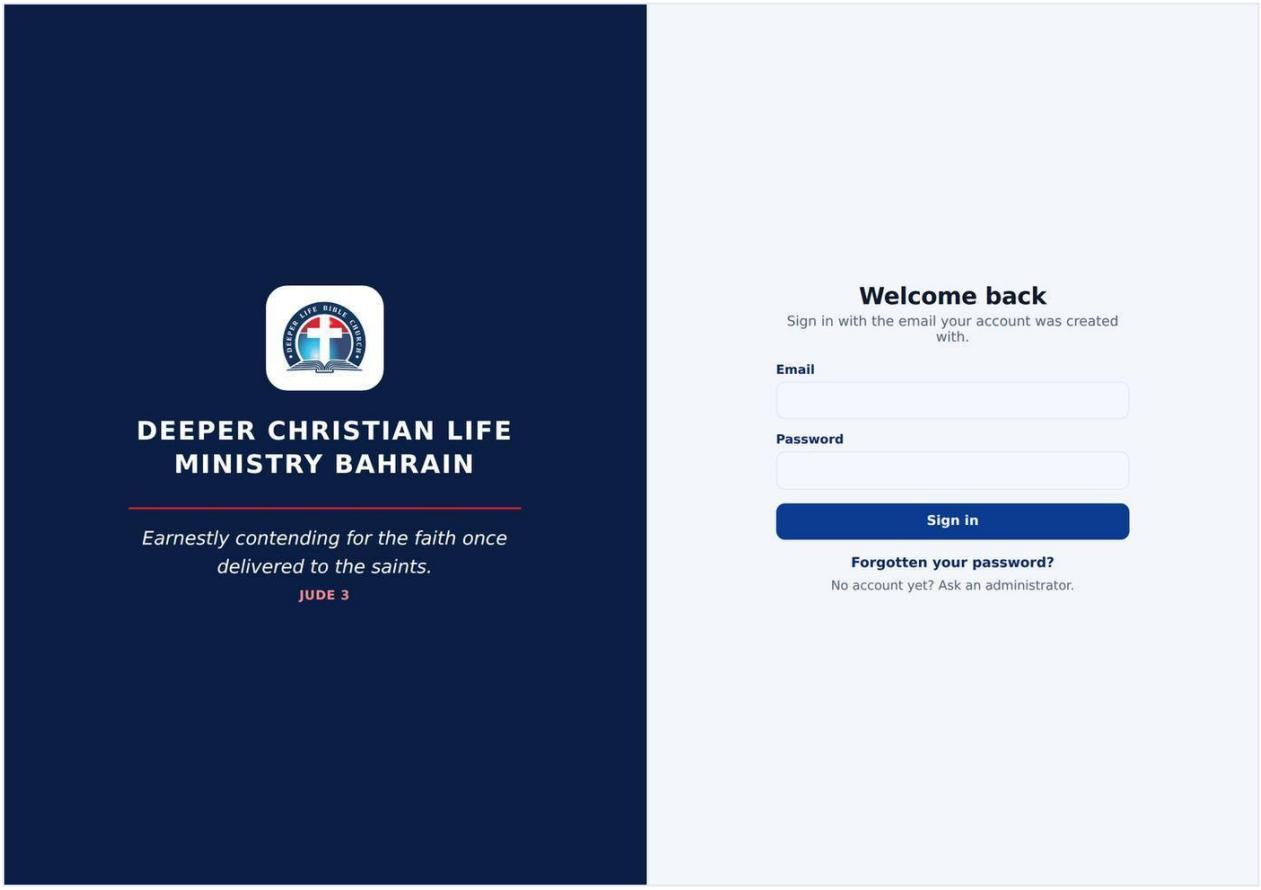

Figure 1. The sign-in page.

Five wrong passwords within 15 minutes locks sign-in for 15 minutes. The fourth wrong attempt warns you first, and after the fifth the page says **Too many attempts**. Wait, then try again, or reset your password.

While it loads. When the system opens, the church logo shows with a moving gold bar. While a page fetches its figures, grey shapes pulse where they will appear, so no 0 shows before the real figure arrives.

Forgotten your password

1. On the sign-in page, press **Forgotten your password?** under the Sign in button.
2. Type the email you sign in with and press **Send reset link**. The page answers the same way whether or not the email has an account, so it reveals nothing to anyone else.
3. Open the email **Reset your password** and press **Choose a new password**. The link works once and for one hour.
4. Type the new password twice. Each rule turns green as it is met: at least 10 characters, not only numbers, and both passwords match. A common password, or one too like your name or email, is refused when you save.
5. Press **Save and sign in**.

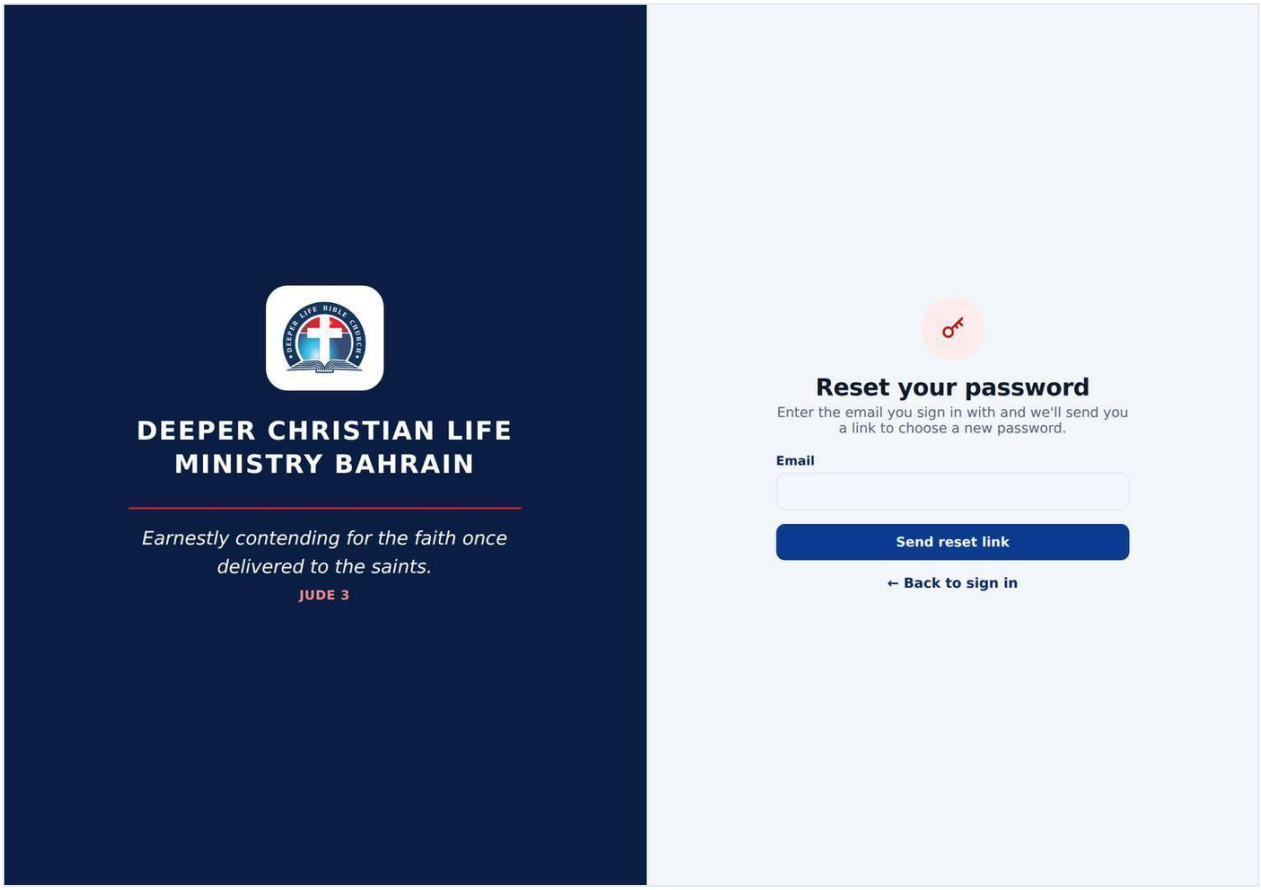

Figure 2. Asking for a reset link.

> No account yet? Only then ask an administrator, who creates accounts.

The layout of every screen

Every screen has the same three areas. Once you know them you can find your way anywhere.

Table 2. The three areas of every screen.

Area	Where	What it does
Menu	The dark blue column down the left edge	Each item opens a section. Your menu shows only the sections your role can use.
Top bar	Along the top, to the right of the menu	The section name on the left. On the right: the location picker, for administrators covering every location, the bell, and your round badge.
Page	Everything below the top bar	The section itself. Most pages start with a row of figures across the top, then the working area underneath.

What your role decides

An administrator gives every account a role. The role decides which sections you see and what you can do in each. The screens follow it closely, so a button you cannot use is not shown at all.

Table 3. How your role shows on screen.

If your role can	You see
Not open a section	No menu item for it. Typing its address takes you to the dashboard, which says your role does not include that page.
Only view a section	The figures and lists, but no add, edit or delete buttons. Forms open read only, with a line saying so.
Add but not change	Add buttons and forms, but no edit pencils or delete bins on existing records.
Add, change and delete	Every button for that section.

> **Something missing?** It is almost always your role. Ask an administrator to check it rather than working round it.

Locations

The church meets in more than one place, and each place is a location. The main one is **Bahrain HQ**, and Qatar is another. Every member, session, newcomer, gift and expense belongs to one location.

Table 4. What your location decides.

Your account covers	What that means
One location	You see only that location's people, sessions and money, and anything you add belongs to it. Location choices in forms list only yours. Tap your badge at the top right to see it.
Every location	You see all locations combined, and choose the location when you add something. The top bar shows **All locations**. Only these accounts change settings that affect every location, such as roles and meetings.

Location names can be changed at any time by an administrator, as described in part 11. Nothing recorded moves when a location is renamed.

Tabs

Several sections are split into tabs: rounded buttons in a row near the top of the page, such as **Pipeline**, **Follow-up**, **Messages**, **QR Registration** and **Manual Entry** under Newcomers. The one filled in dark blue is the tab you are on. Press another to switch. On a phone, tabs that do not fit carry on to the next line, so every tab is always in view.

Getting help inside the system

Help & Guide, the last item in the menu, has short guides arranged by what you do. A small **?** beside a heading explains that part of the screen when pressed. On a phone it opens across the screen, with a cross to close it.

Table 5. The top bar, from left to right.

Part	What it does
Location picker	Only for administrators covering every location. Choose a location and every page narrows to it until you choose **All locations** again. It is remembered. On a phone it shows as a pin, with a dot on it while one location is chosen.
Service badge	Your level on the service ladder, for anyone who follows people up. Hover over it, or tap it on a phone, for your points and what brings the next level. Press it again for **My service**.
Bell	Everything waiting on you, with a count: red when something is overdue, amber when things are only waiting, none when nothing is outstanding. Tap it for the list, and tap a line to open it. People who do not oversee others see only their own follow-ups.
Your badge	Your photo, or your initials. Tap it for your name, role and location, **My profile** and **Sign out**.

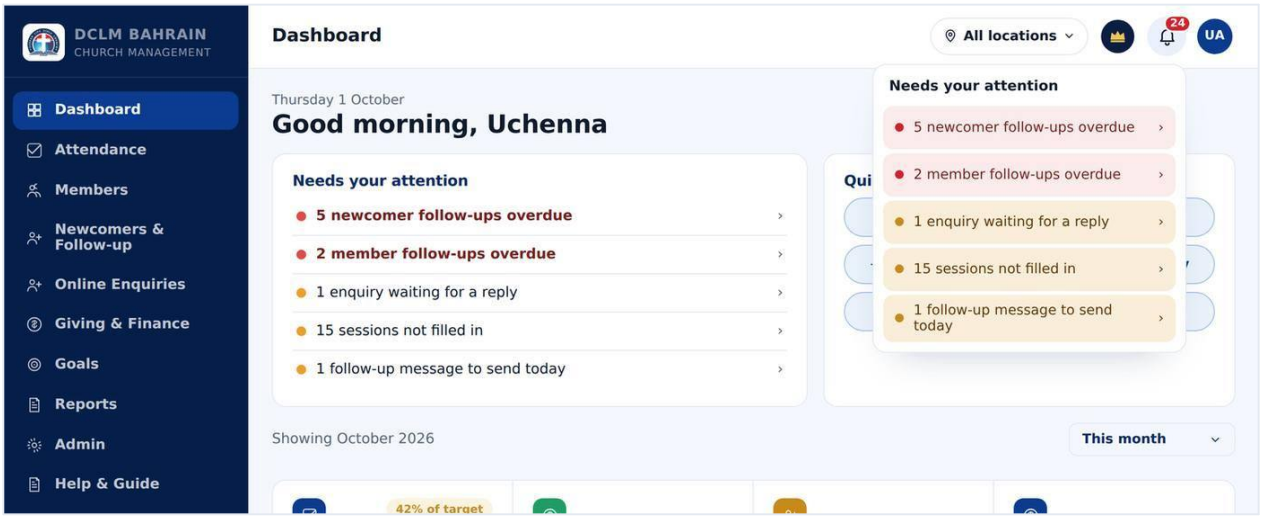

Figure 3. The bell, opened on the dashboard.

Your own account

1. Tap your badge at the top right and choose **My profile**.
2. Press **Change photo** to add or change your picture, from your phone or computer. It shows wherever the system shows you.
3. Correct your name, phone or email and press **Save changes**. Your role and location are shown but set by an administrator.
4. To change your password, type your current one, then the new one twice, and press **Change password**.

Alerts on your phone or computer

Alerts tell you when something needs you, even with the system closed: a morning summary at 7 am when something is waiting, someone given to you to follow up, new contacts and newcomers for those who handle them, a Monday summary for leaders, and church announcements.

1. On an iPhone or iPad, first add the system to your Home Screen: in Safari press **Share**, then **Add to Home Screen**, and open DCLM Bahrain from there. Android phones and computers need nothing extra.
2. Press **Turn on** in the banner at the top of the dashboard, or in My profile, under **Alerts on this device**, press **Turn on alerts**. Allow notifications when asked. **Not now** hides the banner on that device for 30 days.
3. Press **Send me a test alert** to check. Untick any kind you do not want under **Send me alerts for**.
4. Do this once on each device you use. **Turn off here** stops them on that device, and so does signing out.

> Tapping an alert opens the page it is about.

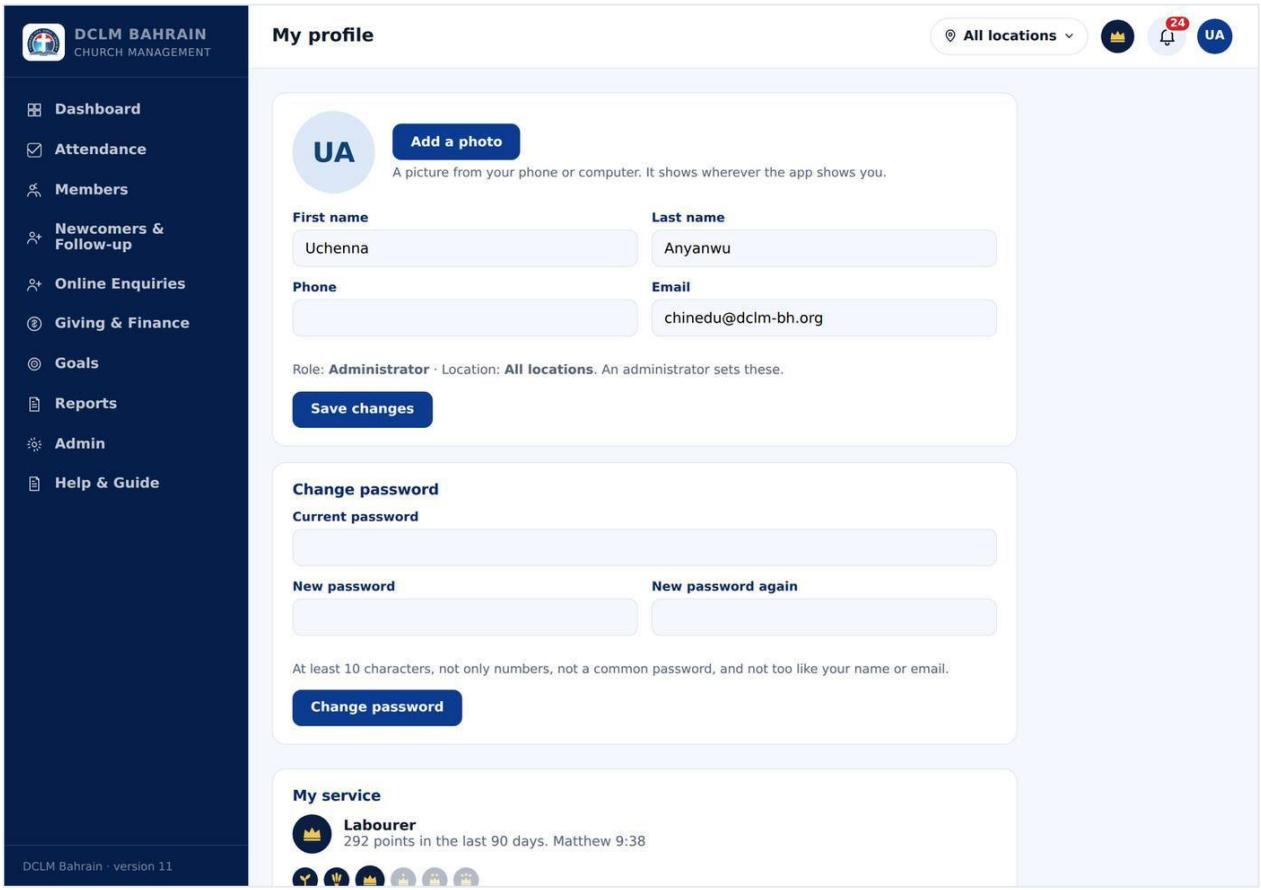

Figure 4. My profile.

The service ladder

The service ladder encourages faithful, steady follow-up. Everyone who follows people up has a level, shown by a badge. Points come from the last 90 days, so a level rises with effort and falls if effort stops. Nobody is ranked: the team is listed by level, then by name.

Table 6. The six levels.

Level	Name	Points in 90 days	Scripture
1	Sower	0 to 99	Psalm 126:6
2	Reaper	100 to 249	John 4:36
3	Labourer	250 to 449	Matthew 9:38
4	Soul Winner	450 to 699	Proverbs 11:30
5	Faithful Steward	700 to 999	1 Corinthians 4:2
6	Good and Faithful Servant	1,000 and above	Matthew 25:21

Table 7. How points are earned.

What was done	Points
A follow-up completed on time, with the visit record	10
A follow-up completed late, with the visit record	5
A planned message, or your own message, sent	2
A personal reply sent	3
A discipler step ticked for a new convert	8
A newcomer you look after returns a second or third time	5
A newcomer you look after becomes a member	15
A newcomer you look after is baptised in water	15
An absent member you followed up comes back	5

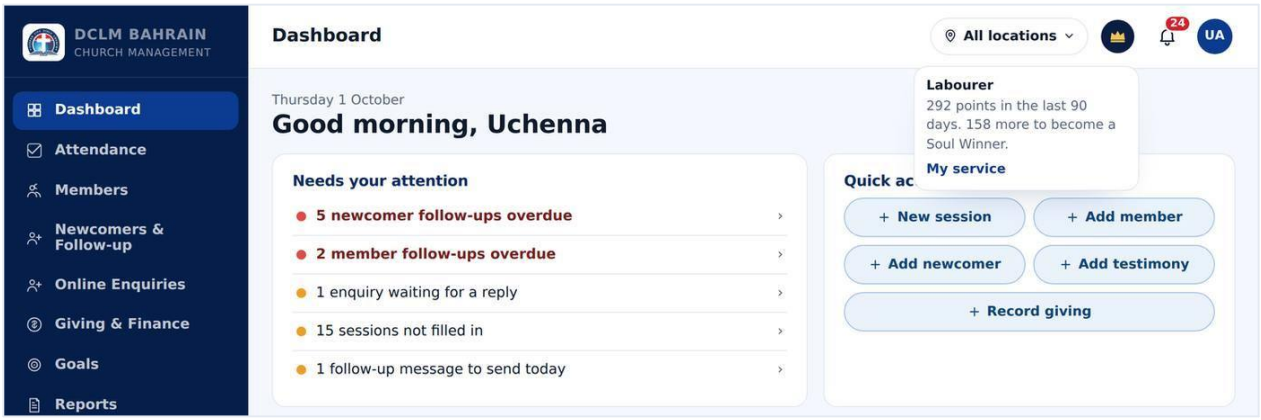

Figure 5. The service badge, with its note.

1. Hover over the service badge beside the bell, or tap it on a phone. It shows your level, your points and how many more bring the next level.
2. Press it again, or **My service** in the note, to open **My service** at the foot of My profile. It shows the six badges, with yours and those below it filled in, and the steps that bring the next level.
3. Press **See the team** for everyone at your location who follows people up, each with their badge beside their name. Hover over or tap a badge for that person's level and points.

Figure 6. My service, at the foot of My profile.

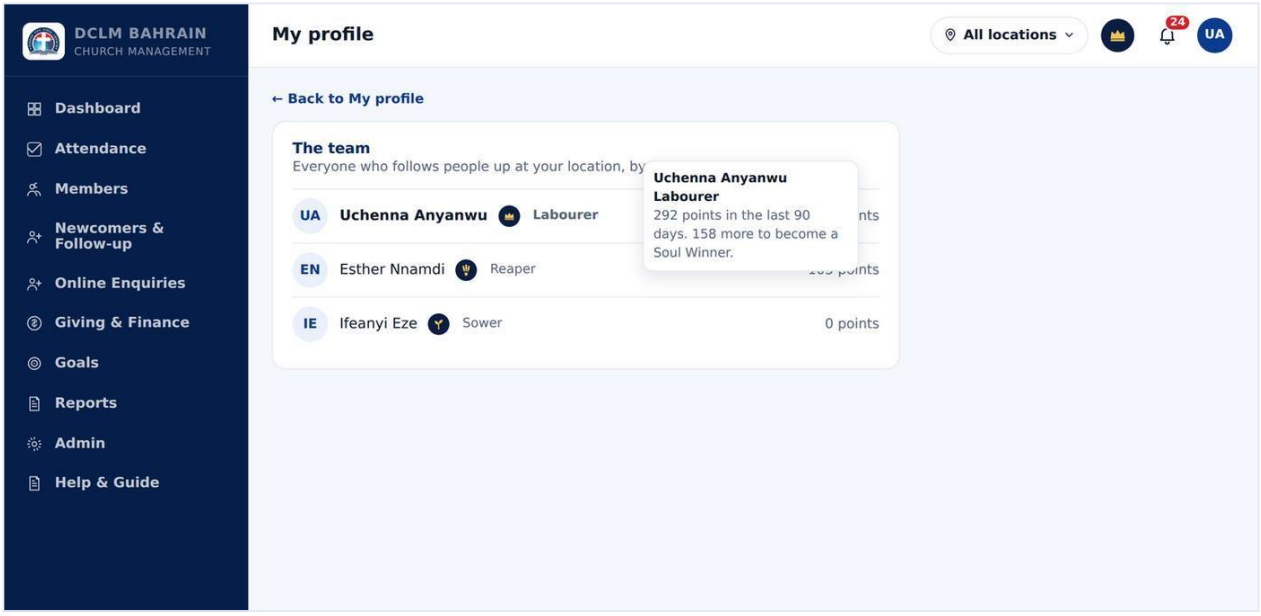

Figure 7. The team.

> Moving up is immediate. If your points fall below your level, a small note under the dashboard greeting gives you 30 days and the steps that keep it, and only then do you move down one level. A note also appears when you move up. The cross dismisses either.

On a phone

1. The menu is hidden to save space. Tap the **three lines** at the top left to open it. Close it with the **cross** at its top, or tap the dimmed page beside it.
2. Tables become cards, one per row, so nothing runs off the side of the screen.
3. On the newcomer and enquiry boards, dragging does not work on a touch screen. Use the **dropdown at the bottom of each card** to move somebody instead.

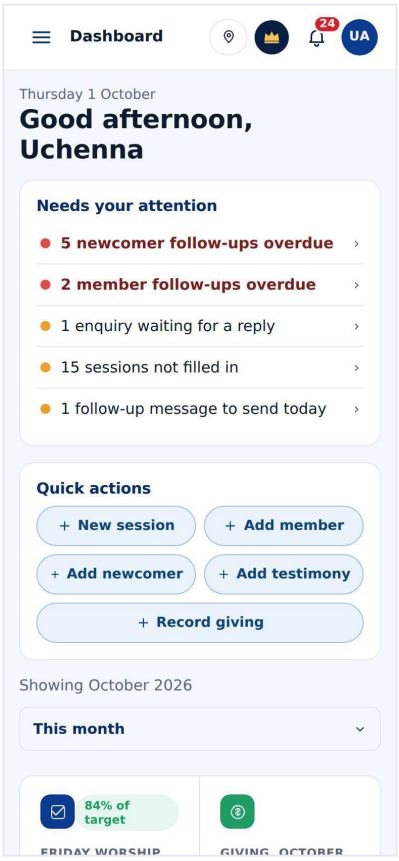

Figure 8. The dashboard on a phone.

Back to contents

2. The dashboard

Where: cms.dclm-bh.org/

The first page after signing in. It shows what needs doing, then how the church is doing. You only see the parts your role covers, with figures for your location, or for every location if your account covers them all.

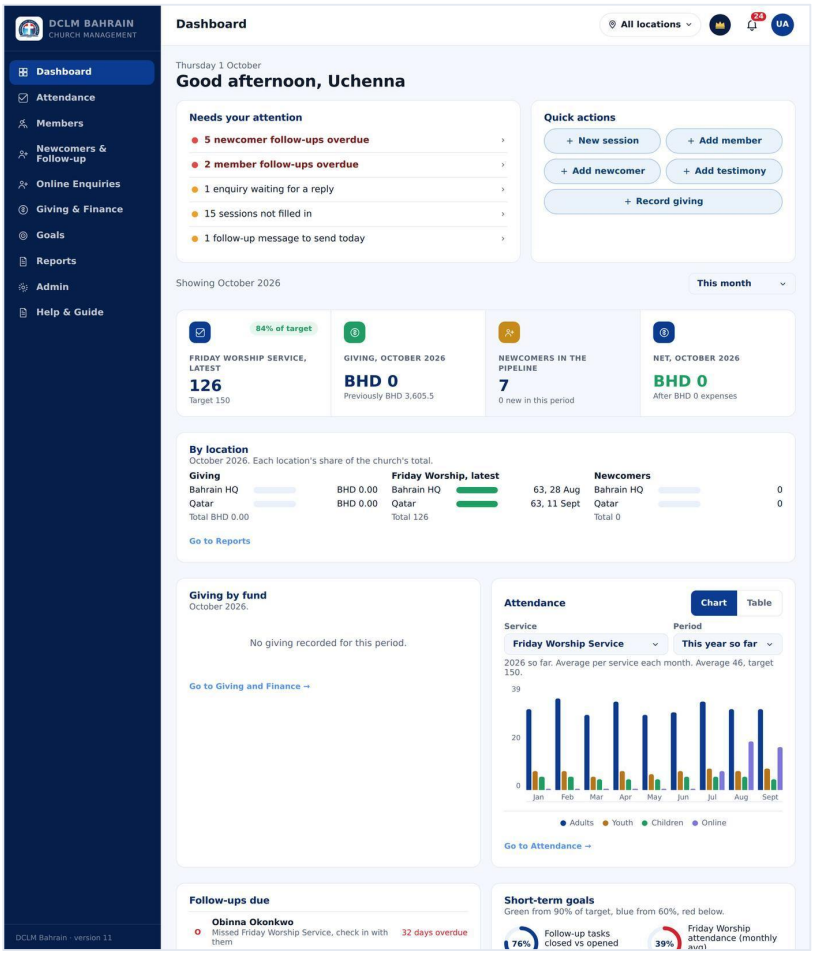

Figure 9. The dashboard.

Table 8. The parts of the dashboard, from top to bottom.

Part	What it tells you
Greeting	Today's date and a greeting.
Needs your attention	Every outstanding item you can act on, overdue in red and waiting in amber. Tap a line to open it. When there is nothing it says **Nothing needs your attention**. People who do not oversee others see their own follow-ups.
Quick actions	Buttons for the common jobs: New session, Add member, Add newcomer, Add testimony and Record giving. Only those your role can do appear.
Period dropdown	**This month**, **Last month**, **This year so far** or **Last year**. The figures and giving follow it. The attendance card has its own.
Four figures	The latest Friday Worship Service, with every location's latest added together when you view All locations, and how far it is from its target, giving for the period with the change from the period before, newcomers in the pipeline, and the net after expenses.
By location	With every location in view, each location's giving, latest Friday Worship and newcomers side by side, with totals. Only for administrators covering every location.
Giving by fund	How the period's giving divides between the funds. Tap a part of the ring, or a fund, for its amount and share.
Attendance	Choose the **Service** and its own **Period**, which opens on the year. Over a year, each group of bars is a month's average per service. **Chart** and **Table** switch the view. Tap a group of bars for its figures.
Follow-ups due	The people to follow up, members and newcomers together, most overdue first. Tap one to open them.
Short-term goals	Rings showing progress: green from 90% of the target, blue from 60%, red below. Tap a ring for its figures.
Lower cards	Recent testimonies, which move on by themselves until touched, new members, enquiries awaiting a reply, and house fellowships.

> Every card ends with a link such as **Go to Attendance** that opens the section behind it.

Back to contents

3. Members

Where: cms.dclm-bh.org/members

Everyone on the member roll, with their category, shepherd and household. The **Directory** tab lists them and the **Follow-up** tab lists those who missed a service.

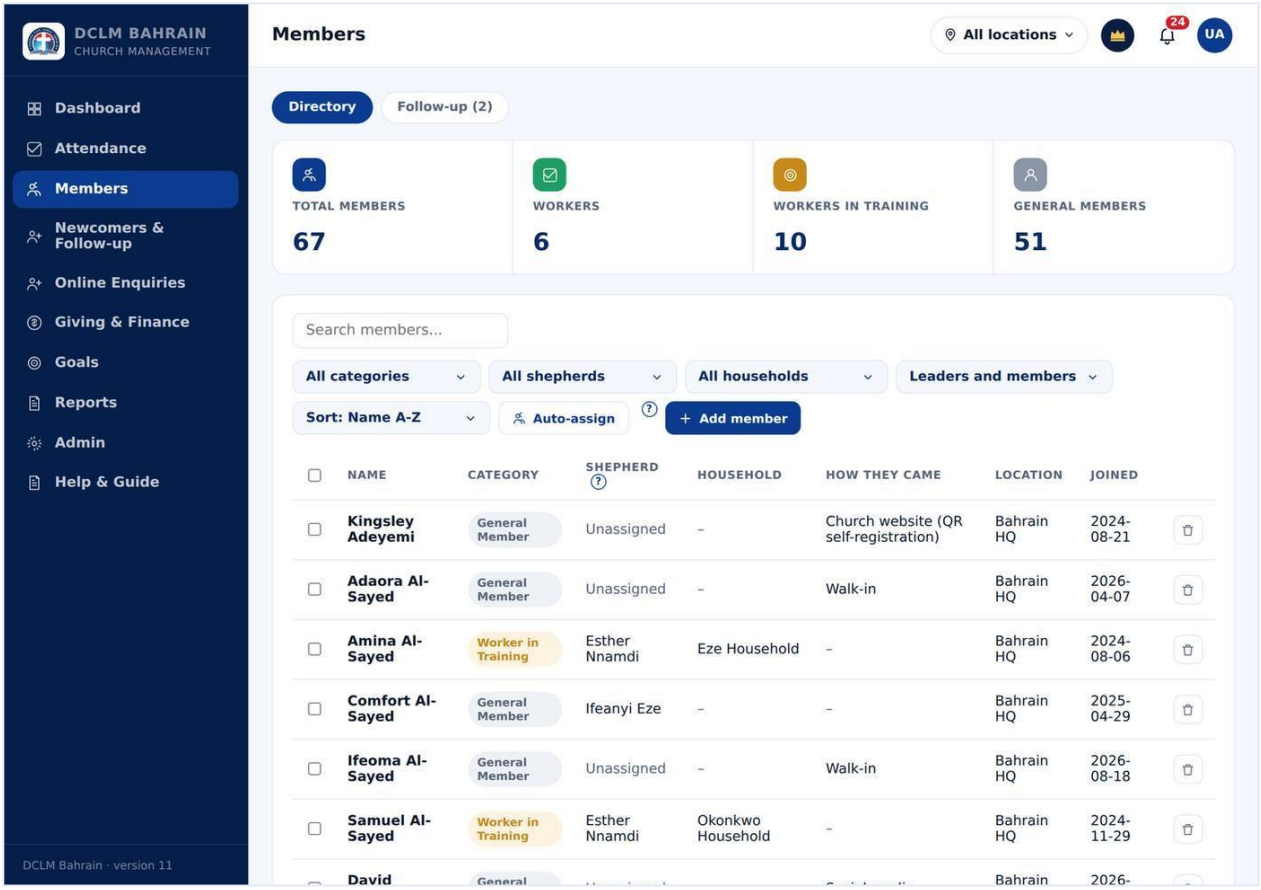

Figure 10. The members list.

Finding somebody

1. Type part of a name in the **Search** box above the list.
2. Narrow the list with the dropdowns beside it: category, shepherd (including **No shepherd**), household, and leaders.
3. Change the order with the **Sort** dropdown, such as newest joined first.
4. Press a row to open that person. **Prev** and **Next** under the list move between pages.

> The **How they came** column shows people who joined through the newcomer pipeline or an online enquiry.

Adding somebody

1. Press **Add member** at the top right of the list.
2. Fill in the **Surname** and **First name**, which are required, and anything else you know. A phone number is optional.
3. The joined date starts as today, the category as General Member and the location as yours. Change any that differ, and choose a household if they have one.
4. Press **Add member** at the bottom of the form. Their profile opens.

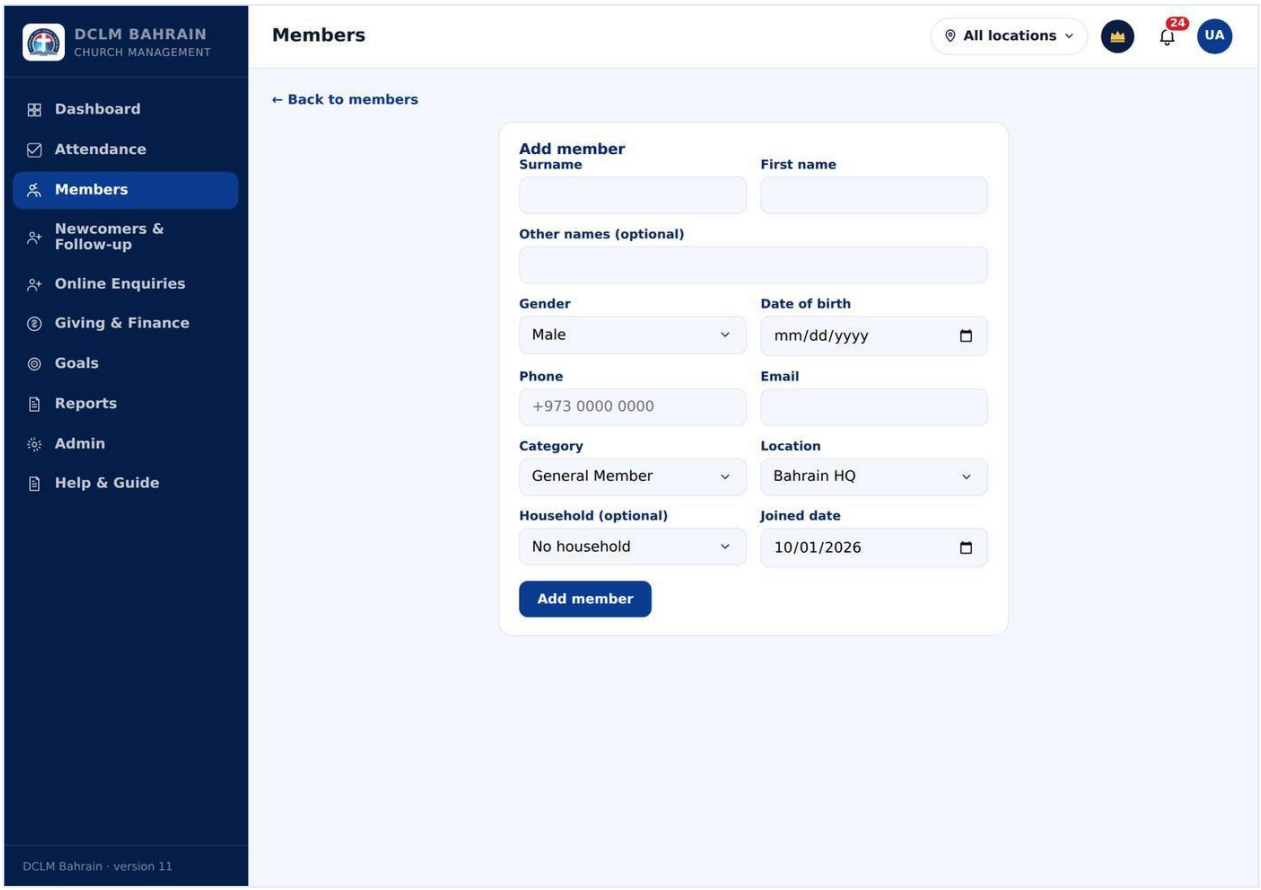

Figure 11. Adding a member.

> A phone number can belong to one member only. If it is already used, the form says so and nothing is saved.

A member's profile

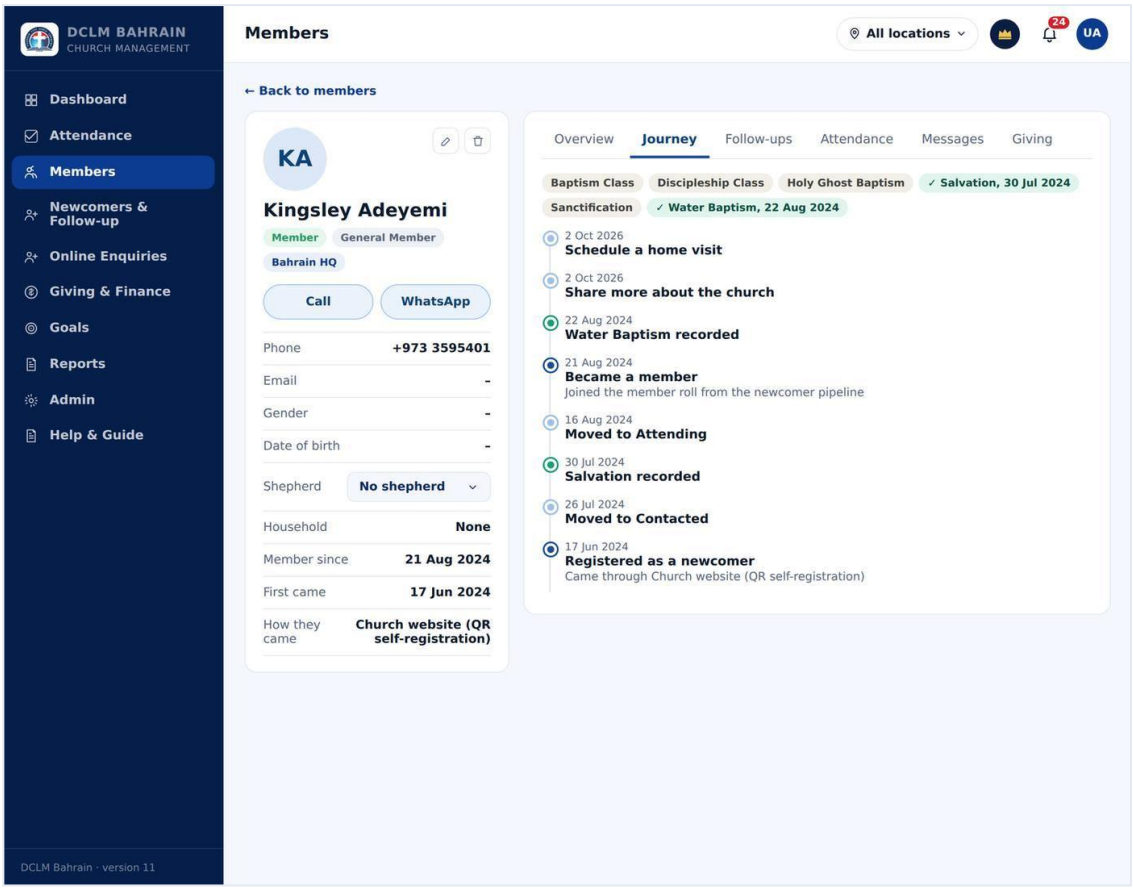

Figure 12. A member's profile.

Everyone has one profile, whether a newcomer or a member. A newcomer who becomes a member keeps the same page, and their story simply continues.

Table 9. The left panel.

Part	What it is for
Badge and name	Initials or photo, name, the Member chip, their category and location.
Call and WhatsApp	Open a call or a WhatsApp chat with their phone number.
Details	Phone, email, gender, date of birth, household, member since, and, if they came through the newcomer pipeline, when they first came and how.
Shepherd	The person who looks after them. Choose another in the dropdown to change it. Only same-gender shepherds at their location are offered, never the person themselves. A note says if their shepherd breaks the rules.
Edit pencil	Top right. The details open for editing in this panel. Press **Save changes**.
Delete bin	Beside the pencil, for roles that can delete. A member who has left is better kept, so their history stays.

Table 10. The tabs on the right.

Tab	What it holds
Overview	Time with us, milestones and open follow-ups, **Move to category**, and their household with its other members.
Journey	Every event, newest first: first came, contacts, stage changes, milestones, becoming a member and category moves. Milestones reached show in green.
Follow-ups	Open follow-ups, including any left from when they were a newcomer.
Attendance	Every check-in, as a newcomer and as a member.
Giving	The total given, for roles that can see Giving and Finance.

Assigning shepherds

Anyone with an account ticked **Can shepherd others** in Admin can be a shepherd, whatever their member category. Men follow up men, women follow up women, and nobody shepherds themselves. There are three ways to assign one.

Table 11. Three ways to assign a shepherd.

Way	How
One person	On their profile, choose in the **Shepherd** dropdown. Only shepherds of the same gender are offered, never the person themselves.
Several at once	Tick the box at the left of each row in the list. A bar appears above the list. Choose in **Choose shepherd** and press **Assign**. **Clear** removes the ticks. If anyone ticked is of the other gender, nothing is saved and the message names them.
Everybody without one	Press **Auto-assign** at the top right of the list, check the proposal and apply it, as below.

1. Press **Auto-assign**. A proposal opens above the list.
2. Each row shows the person with their gender, the proposed shepherd and why. Choose a different shepherd in a row, or **Leave unassigned** to skip that person. For a shepherd being replaced it says **Leave as it is**.
3. The strip above the rows shows each shepherd's gender and load now and after.
4. Press **Apply**. Nothing is saved until then, and all of it is saved together.

> Auto-assign only fills in people with no shepherd, so pairings chosen on purpose are left alone. The exception is a shepherd who breaks the rules, whom it always proposes to replace, as below. **Reassign everyone instead**, below the proposal, recalculates everybody, which is useful when a shepherd stops.

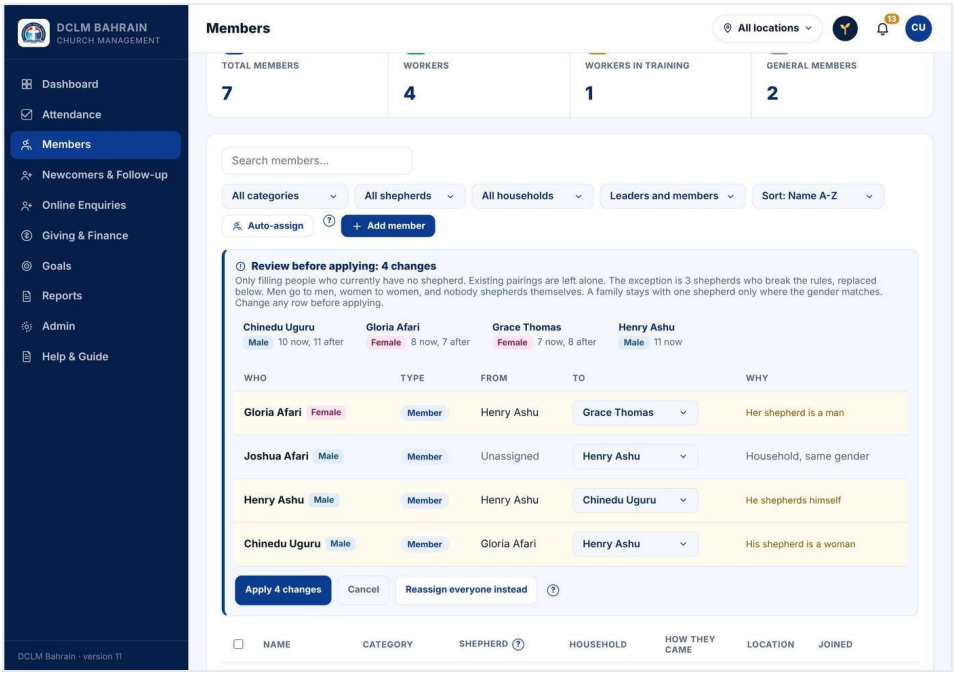

Figure 13. Reviewing auto-assign before applying it.

> Auto-assign gives men to men and women to women. It keeps a household with one shepherd where the gender matches, then gives each person to whoever of the same gender carries the fewest. Someone whose gender is not known goes to whoever carries the fewest, marked **Check before you apply**. A shepherd with no gender set, shown in a note above the proposal, is given nobody. It also gives newcomers a shepherd unless that is switched off in Admin, and their open tasks move with them.

A shepherd who breaks the rules

If a man shepherds a woman, a woman shepherds a man, or someone shepherds themselves, a box at the top of Members says how many and names them. Their row is marked under the shepherd's name, such as **A man shepherds her**, and so is their profile.

1. Press **Correct with Auto-assign** in the box.
2. Each of them is listed with the reason, such as **Her shepherd is a man**, and a proposed shepherd who keeps the rules. Change any row, or choose **Leave as it is**.
3. Press **Apply**. The box goes once everyone's shepherd keeps the rules.

Moving somebody to another category

1. Open their profile.
2. Choose General Member, Worker in Training or Worker in **Move to category**.
3. Press **Move**. The move is dated in their **Journey** and feeds the growth goals.

Following up a member who missed a service

After a meeting that counts toward absence follow-up, anyone expected who was not checked in gets a task, given to their shepherd and due 24 hours from 6:00 pm on the day. See part 13.

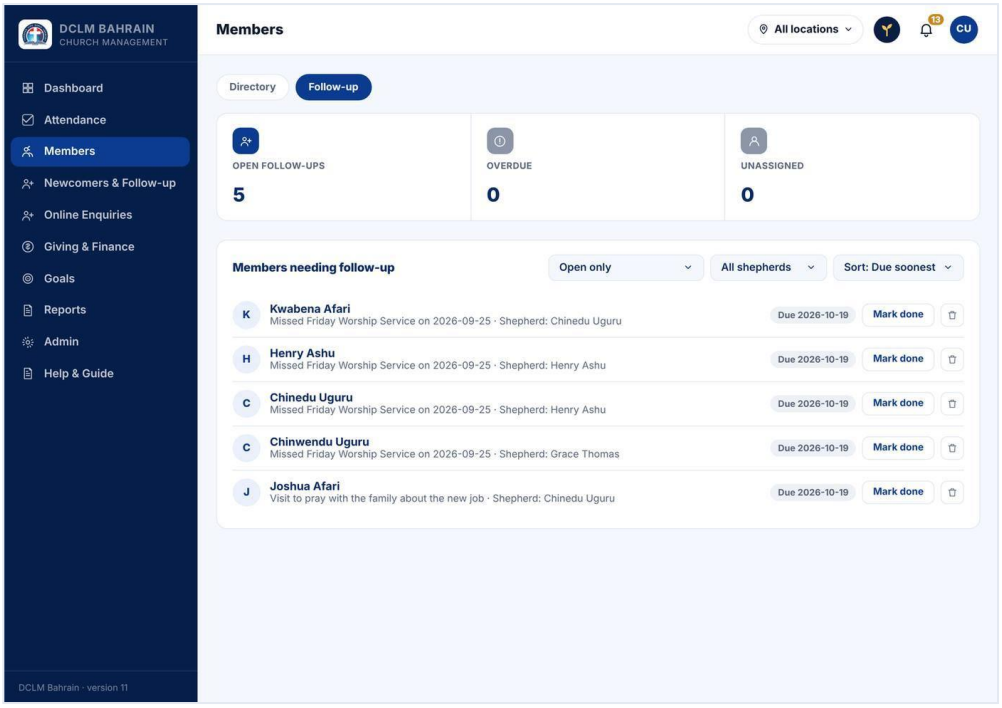

Figure 14. Members who need following up.

1. Press the **Follow-up** tab at the top of Members.
2. Narrow the list with the dropdowns: open or completed, shepherd, and order.
3. Visit or call them, then press **Mark done** on their row.
4. Choose how you reached them, check the date of the visit, which starts as today, and fill in all four boxes: **Goal of the visit**, **Scripture shared**, **Root cause** and **Next step agreed**.
5. Press **Save & mark done**.

> All four are required, because a tick with no record is little use to whoever reads it next month. If there was no opening for scripture, write None this time. A completed record can be corrected with **Edit**.

Adding a follow-up by hand

For a visit or call nobody's absence started, such as praying with a family about a new job.

1. Open the member's profile and press the **Tasks** tab.
2. Type what needs doing in **Task**, and check the **Due date**, which starts two days ahead.
3. **For** starts as their shepherd. Choose another shepherd if needed.
4. Press **Add task**. It appears on the Follow-up tab under Members, and is done the same way.

> Tasks for those who missed an older service, or a meeting not followed up automatically, are made from its check-in page. See **After the service** in part 4.

Back to contents

4. Attendance

Where: cms.dclm-bh.org/attendance

Every service, fellowship and meeting, with a chart of attendance over time. Sessions for regular meetings are created on their own each week, so you only fill them in.

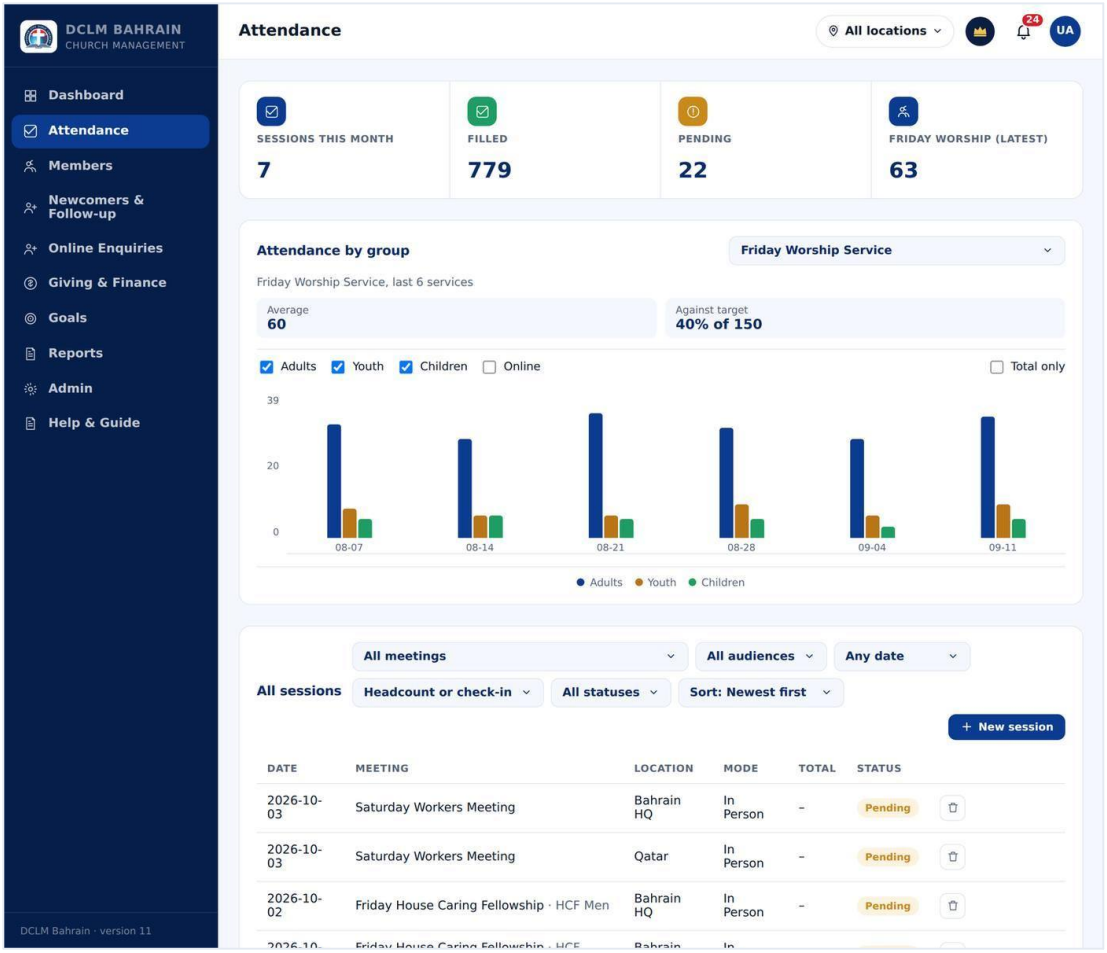

Figure 15. The attendance page.

Reading the chart

1. Choose the meeting in the dropdown at the top of **Attendance by group**.
2. Untick a group, such as Youth, to hide its bars.
3. Tick **Total only** for one bar per service.

Finding a session

All sessions lists every session, newest first. The dropdowns above it narrow the list by meeting, audience, date, headcount or check-in, and **Filled** or **Pending**, and change the order. A fellowship's session shows the fellowship's name beside the meeting. On a phone, press **Show** beside Filters to open the dropdowns.

Recording a service

1. Press the session's row in **All sessions**. Its **Status** says what is still to do.
2. Check the **Mode**: **In person and online**, **Online** or **In person**. It starts as the meeting is usually held. Change it for a week held differently.
3. In the grid, type the numbers for each group: **In person** in the first column and **Online** in the second. A meeting set to Detailed has six rows, and one set to Simple has two. An Online session shows only the Online column.
4. Fill in **New comers** and **New converts** if there were any.
5. Under **Offering collected**, type the amount for each fund.
6. To record who came by name after the service, tick **Track named attendance for this session**, then search for and tick each person.
7. Press **Save session**. Its **Status** changes to **Done**.

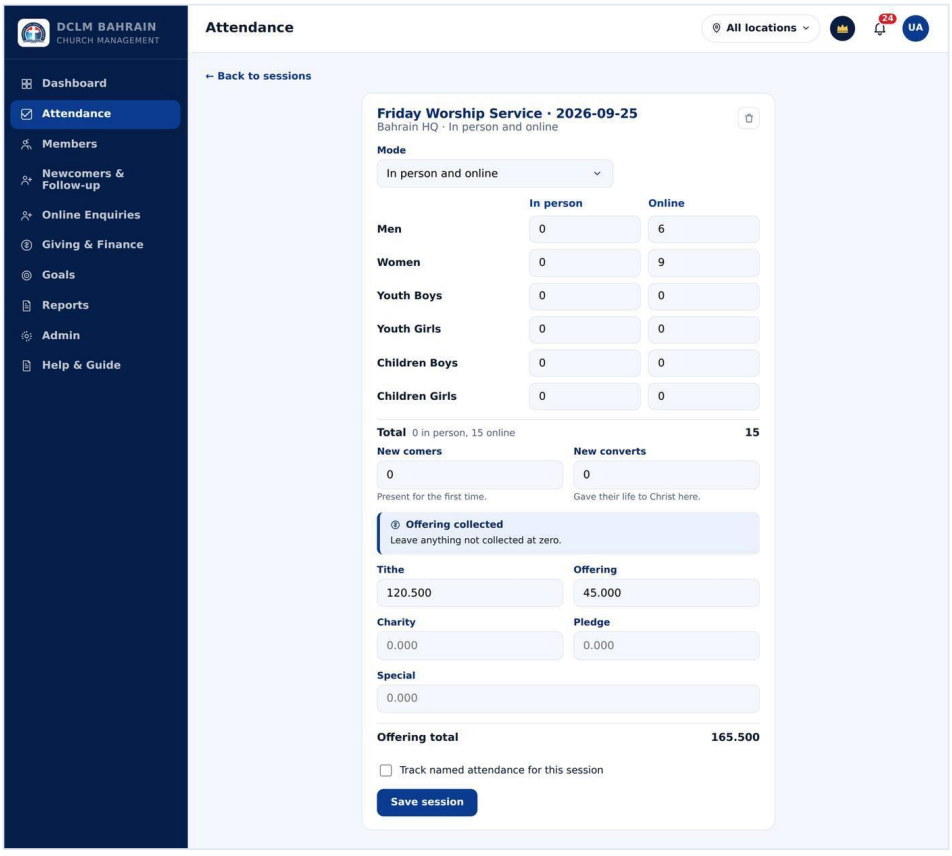

Figure 16. Recording a service and its offering.

The offering is recorded as giving for that service, dated to it. Correcting it later changes that giving rather than adding more. A meeting that does not collect an offering, such as the Global Crusade, has no offering boxes.

A service that has not happened yet cannot be recorded. Its form says so and **Save session** is greyed out until the day.

Ticking people off by name

1. On the day, press **Check in** on the session's row in **All sessions**.
2. Type part of a name in **Search members and newcomers**, or scroll the list. Members are grouped by category, and **Newcomers** come after them.
3. Tap a name as each person arrives. It saves straight away. Tap again to undo. On Friday Worship, each newcomer shows their Fridays so far.
4. Press **Mark online** for anybody joining remotely.

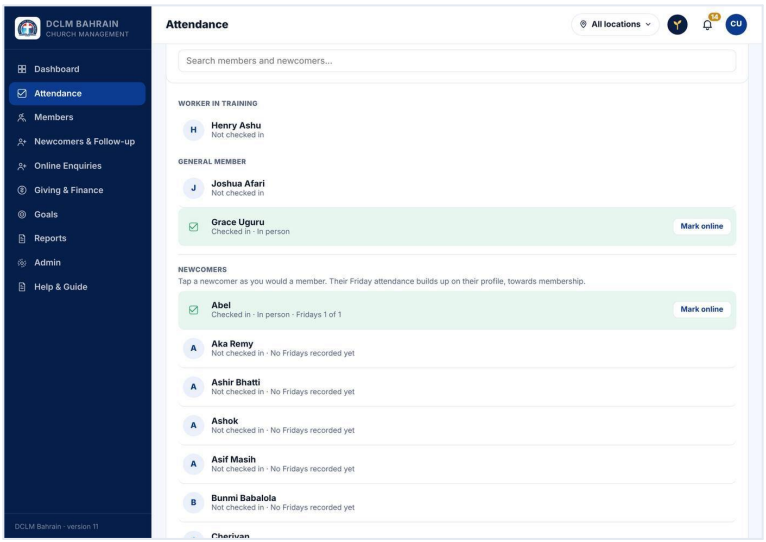

Figure 17. Ticking people off by name.

Several ushers can check people in at once without overwriting each other. The headcount stays the official figure. Checking members in drives absence follow-up, and checking newcomers in builds their Friday attendance towards membership. Somebody registered as a newcomer on the day, by QR code or Manual entry, is checked in automatically.

After the service. A session already filled in has a white **Check in** on its row, to tick who came that day. The headcount is not changed. On a service from the last 7 days that follows up absence, members not ticked get a follow-up task, so tick everyone who came. On an older service, or a meeting not followed up automatically, tick everyone who came, then press **Follow up** under **Follow up those not ticked** at the bottom. Check the names and press **Create tasks**. Each goes to the member's shepherd, due in 24 hours. Anyone with an open follow-up is skipped.

A one-off meeting

1. Press **New session** at the top right of **All sessions**.
2. Choose the **Meeting**, **Date**, **Location** and **Mode**. For a house fellowship meeting, choose **Which fellowship** too.
3. For an occasional meeting, such as GCK or Ministerial Renewal, fill in **Edition name**, the theme or title of this edition, and **Where it is held**, the host city or venue.
4. Press **Create session**, then fill it in as above.

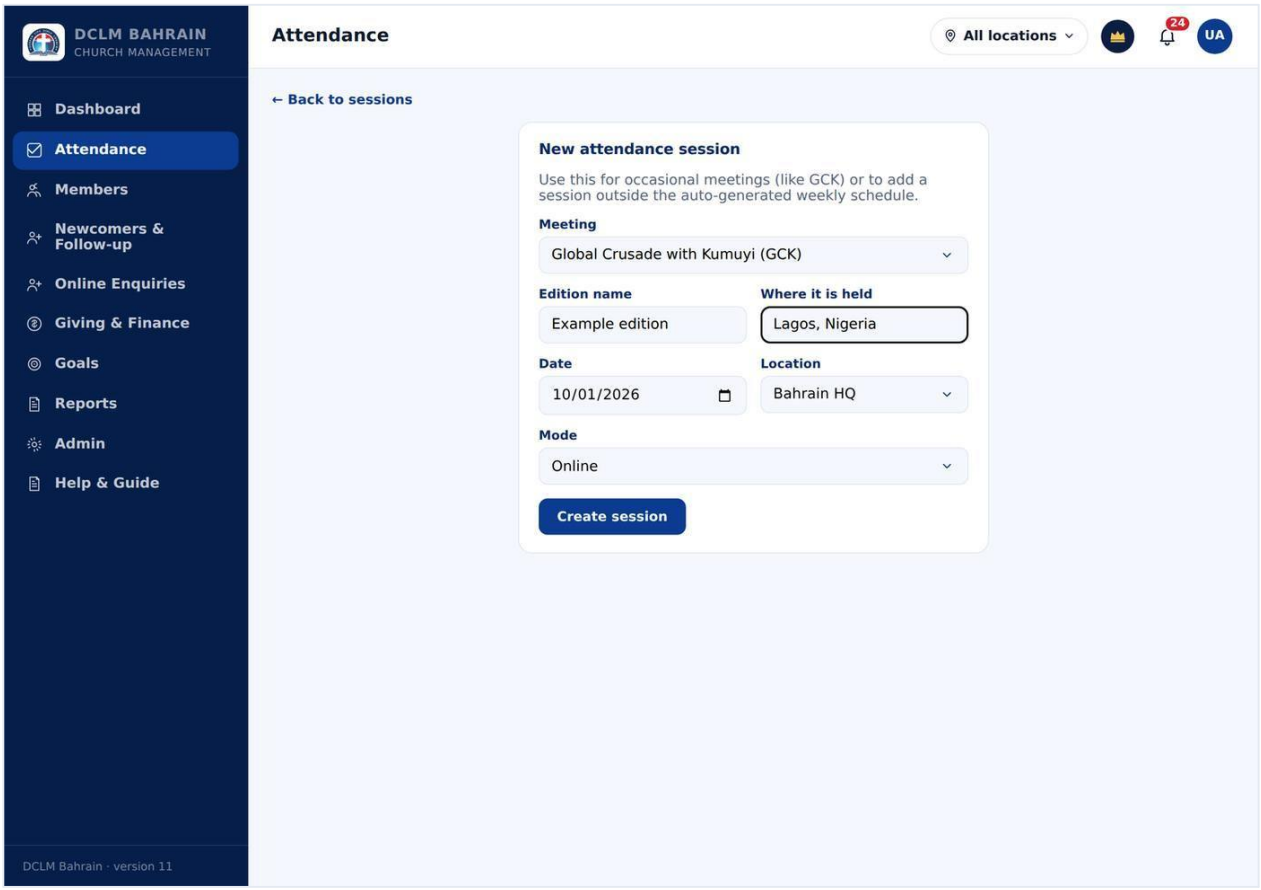

Figure 18. Starting a one-off session.

> The edition and place show under the meeting's name in **All sessions** and on the session itself, where they can be corrected.

House fellowships

Each fellowship gets its own Friday evening session at its location. The **House fellowships** card at the bottom of the attendance page lists them.

1. Open your fellowship's session from **All sessions**. Its name is on the row.
2. Choose who led it in **Led by**, and note the **Lesson studied**.
3. Fill in the numbers and the offering, and press **Save session**.

Back to contents

5. Newcomers and follow-up

Where: cms.dclm-bh.org/newcomers

Everybody who has visited but is not yet a member, from their first visit until they join. Each is given a shepherd from their location as soon as they are registered.

Registering somebody new

Register them before they leave, in one of two ways. Both collect the same details and both put them in the pipeline of the location they attended.

1. **On their own phone:** press the **QR Registration** tab. If you cover more than one location, choose this service's location in **Code for**. Show them the code, or project it during the announcement. They scan it with their phone camera and fill in the form.
2. **From a paper card:** press the **Manual Entry** tab and work down the form, which matches the card field for field. Press **Add newcomer**.

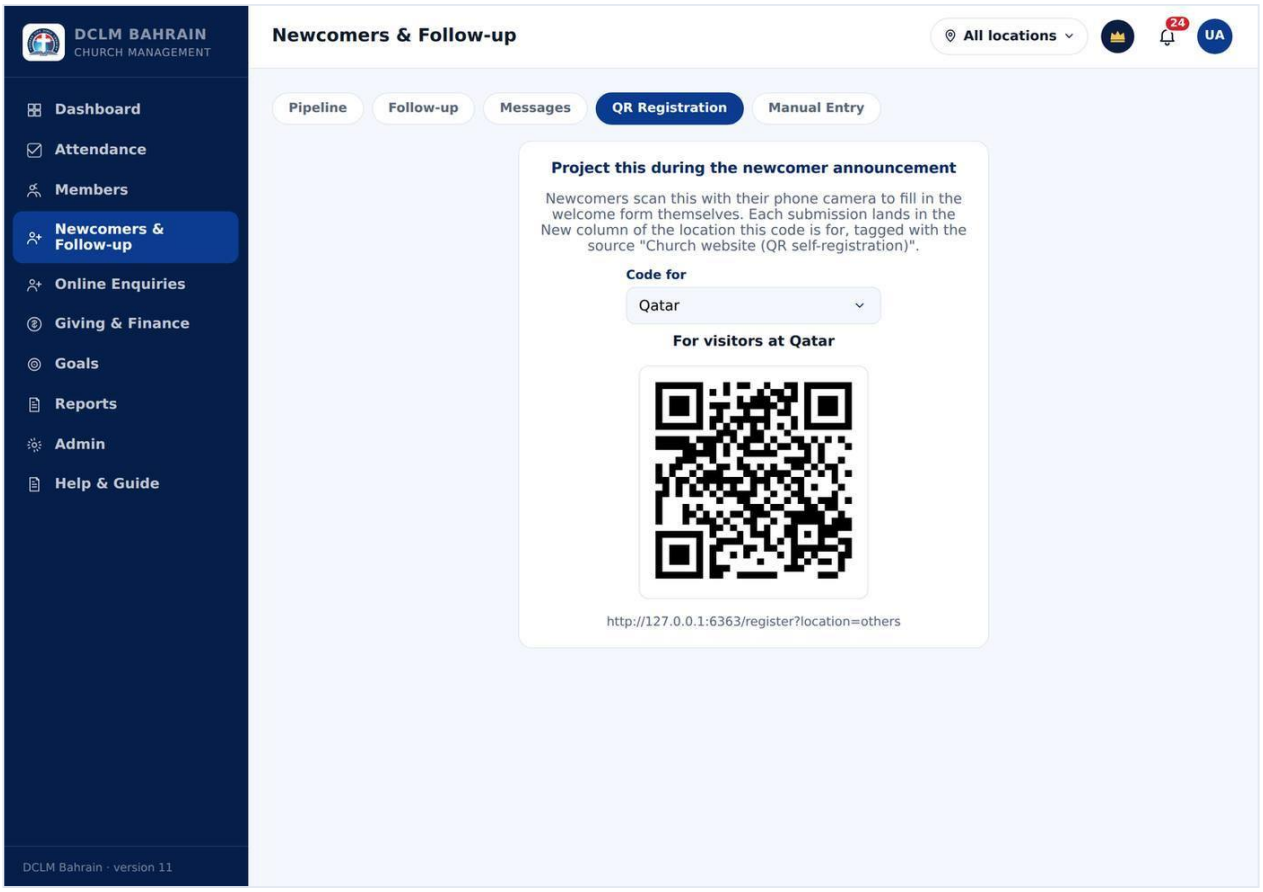

Figure 19. The QR code for one location.

Each location has its own code, and a printed code keeps working. Three tick boxes on the form matter: **Would like a visit**, **Would like to know more about the church** and **Want to know about being a Christian** each create a task straight away, the last with the shortest deadline. A fourth, **Keep in touch with me with a short word of encouragement**, is ticked unless they untick it, and starts their follow-up messages.

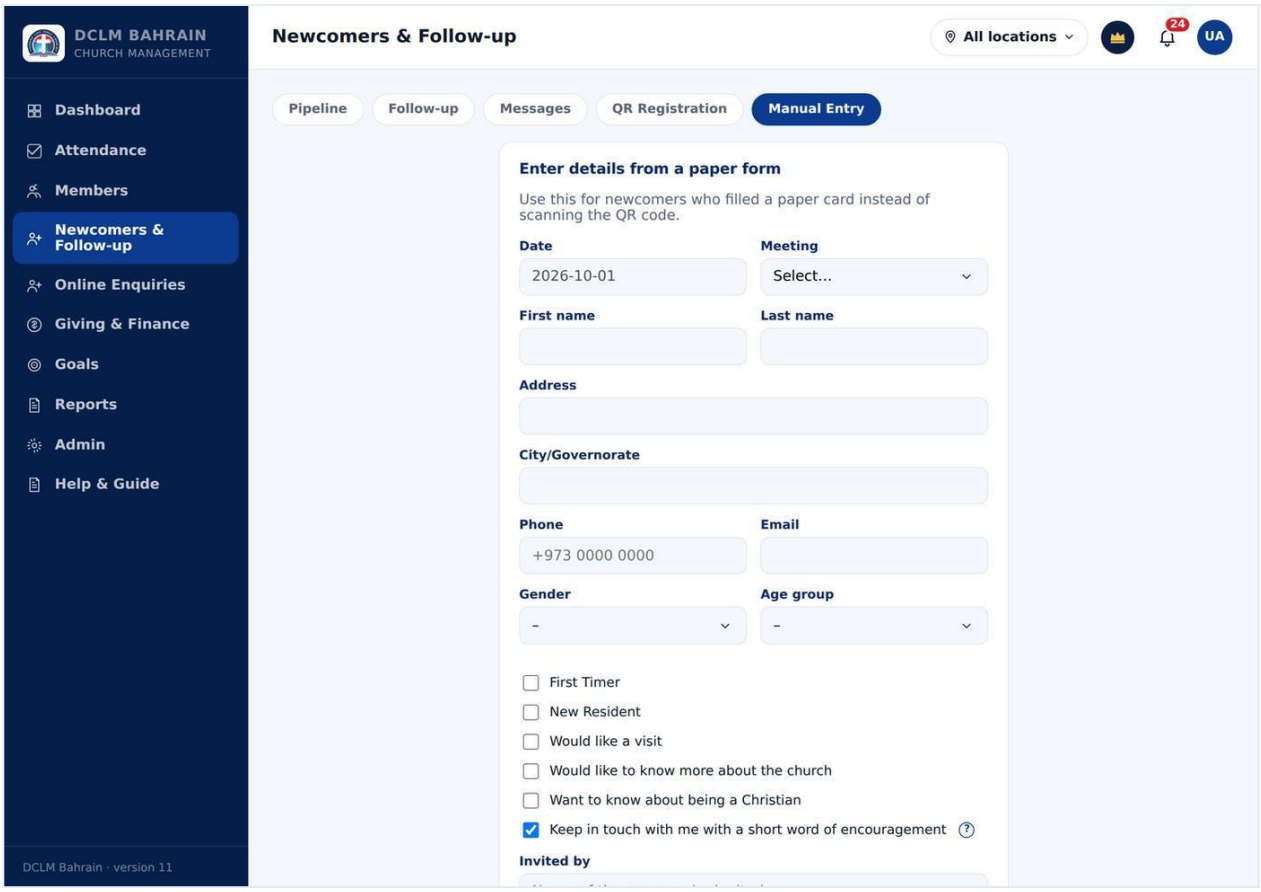

Figure 20. Typing in a paper card.

The pipeline board

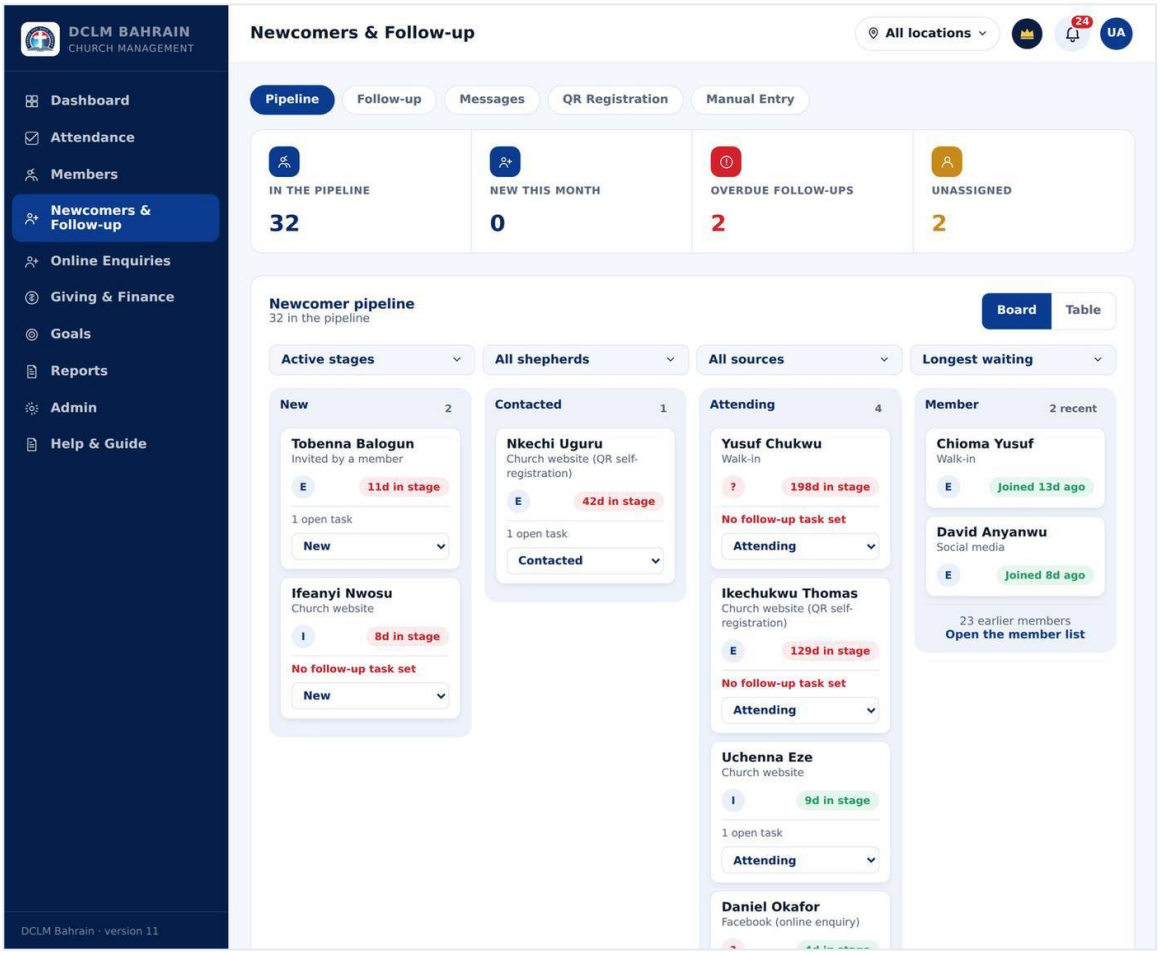

Figure 21. The newcomer pipeline.

Table 12. The columns of the pipeline.

Column	Means
New	Registered, and nobody has reached them yet.
Contacted	Somebody has spoken to them.
Attending	They have come to a service at least once.
Member	They joined in the last 30 days. **Open the member list** at the foot of the column shows everybody who joined through the pipeline.

Reading a card

Table 13. What a card shows.

Part	Means
Name and source	Who they are and how they came.
Circle with a letter	Their shepherd's first initial.
Days in stage	How long they have waited at this stage. Green is recent, amber is getting long, red is overdue. The longest waiting are at the top.
Task line	Open tasks, or **No follow-up task set** in red when nothing is planned.
Dropdown	Moves them to another stage.

Moving somebody along

1. Choose the new stage in the dropdown at the bottom of their card, or drag the card to another column. On a phone, only the dropdown works.
2. Dropping a card on **Member** asks you to confirm, because it adds them to the member roll. See part 6.

Finding somebody

The dropdowns above the board narrow it by stage, shepherd and source, and change the order. The heading says what is showing. **Board** and **Table** switch between the columns and a single list with the same filters.

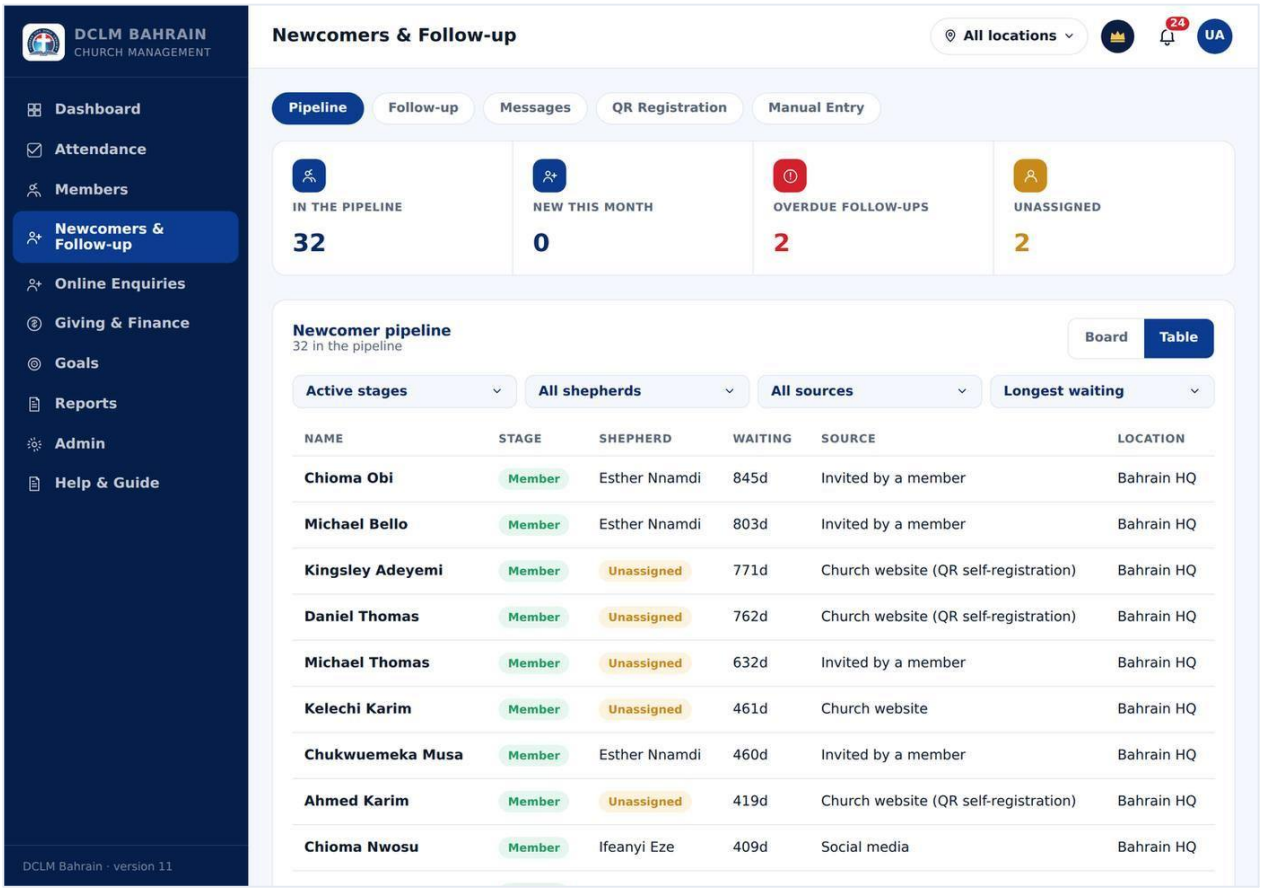

Figure 22. The same newcomers as a table.

A newcomer's profile

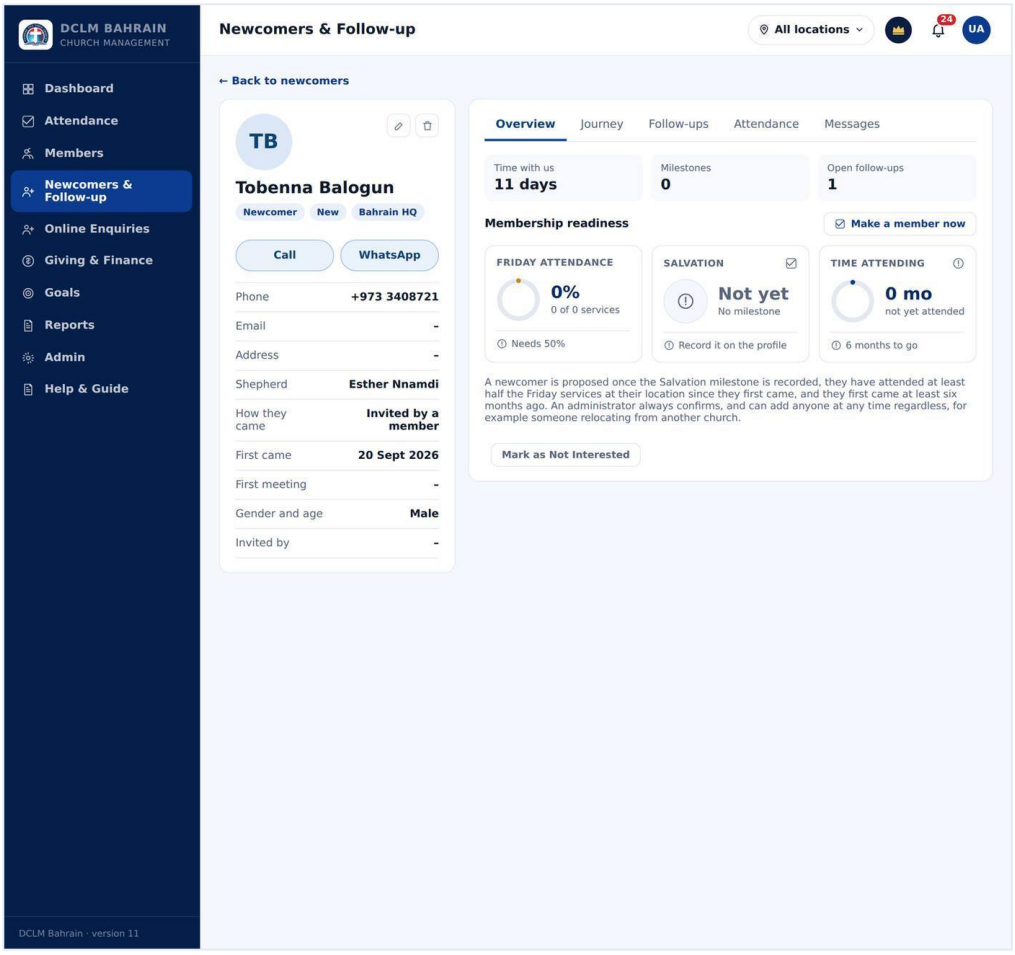

Figure 23. A newcomer's profile.

A newcomer's profile is the same page as a member's, with the parts that matter before membership. On the left: their initials, the Newcomer chip and their stage, Call and WhatsApp, their details, shepherd, how and when they first came, the meeting they came to, who invited them, and any prayer request.

Table 14. A newcomer's profile.

Part	What it is for
Edit pencil	Top right of the left panel. The details open for editing right there: name, source, phone, email and address, or another location, where they get a shepherd if theirs cannot serve it. Press **Save changes**.
Overview tab	Time with us, milestones and open follow-ups, **Membership readiness** with its three conditions and **Make a member now**, and **Mark as Not Interested**.
Journey tab	Tick spiritual milestones as they happen, read every contact and stage change, and record an attempt that did not get through.
Tasks tab	Every task with its attempts, reasons and result, and a form to add one.
Attendance tab	Every service they have been checked in at.

Recording a contact that did not get through

1. Open their profile.
2. Under **Tried and could not reach them?**, choose how you tried and add a short note.
3. Press **Log the attempt**. It appears in their journey.

Follow-up tasks

1. To plan one, type it under **Task** on their profile, choose a **Due date**, and press **Add task**.
2. To see everybody's, press the **Follow-up** tab at the top of Newcomers.
3. After the visit or call, press **Mark done**, choose how you reached them, fill in all four boxes, and press **Save & mark done**, as for members in part 3.

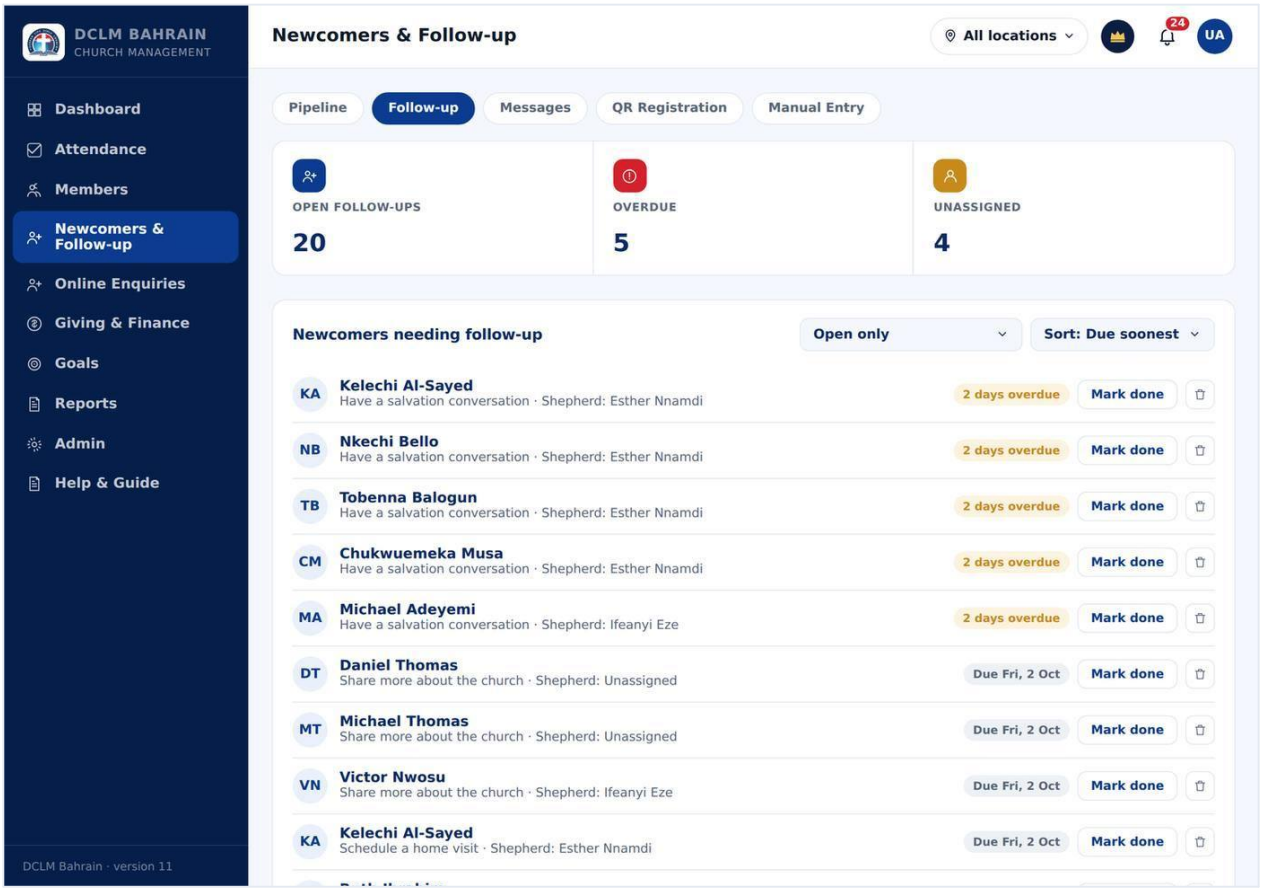

Figure 24. Newcomer follow-up tasks.

Follow-up messages

Everyone we follow up receives a short, planned message now and then, sent by the person looking after them from their own WhatsApp. There are three journeys, and each person is on one at a time. Moving between them is automatic and keeps their history.

Table 15. The three follow-up journeys.

Journey	Who	Pace	Ends
Online contacts	People who reached us online and have not yet attended	Days 1, 3, 7, 14 and 21, then monthly for three months	When they attend, they move to Newcomers
Newcomers	Visitors who ticked Keep in touch when registering	The same day, then every three or four days for about six weeks	When they become a member, or after the final gentle message
New converts	Anyone who has given their life to Christ	Daily for two weeks, then twice a week to week 12	After 12 weeks. It carries on if they become a member

From their third visit, newcomers receive Belonging messages instead, about house fellowship, serving and membership. The Keep in touch tick on the registration forms is ticked unless they untick it.

Today's messages

Open **Newcomers & Follow-up**, then the **Messages** tab. You see everyone you look after who is due a message today. Coordinators and administrators see everyone at their location. The bell also says how many are waiting.

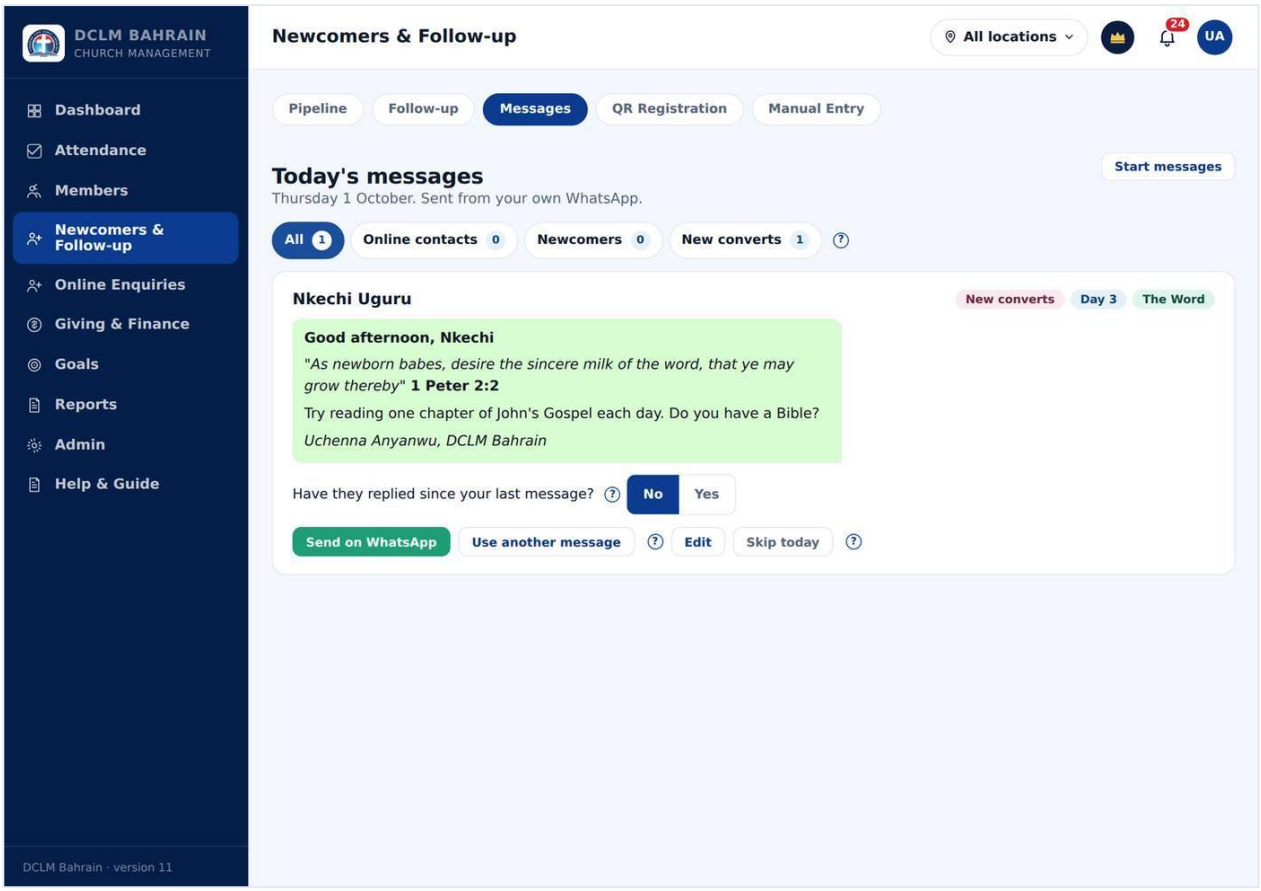

Figure 25. Today's messages.

1. Read the message. It already has their name, the right greeting, and the next service.
2. Answer **Have they replied since your last message?** If not, leave it on **No**.
3. Press **Send on WhatsApp**. WhatsApp opens with the message ready, to their number.
4. Check it and send it in WhatsApp, then come back.
5. Press **Yes, record it**. The card shows Sent, and the message is kept in their journey.

Start messages, at the top right, lists newcomers not yet on a journey, such as those added before messages began. Tick the ones to start, or **Select all**, and press **Start messages**. Each starts on day 1 that day. They were not asked about keeping in touch, so start only those you know are happy to hear from the church.

Skip today sends nothing today, and their plan carries on at the next planned day. If you pressed Send but did not send it, press **Not yet**.

When they have replied

1. Choose **Yes** for **Have they replied since your last message?**
2. Write a personal reply. The short phrases above the box, such as I'm praying for you, add themselves when pressed.
3. Press **Send reply on WhatsApp**, send it, then press **Yes, record it**.

Today's planned message is not lost. It moves to the next day, so the plan never talks over a real conversation.

Another message, or your own

Use another message opens the message bank for their journey, with themes such as Encouragement or Prayer, and messages for any journey, such as life moments and seasons. You can also choose one of **My saved messages**, or **Write my own**. **Edit** changes today's message before you send it.

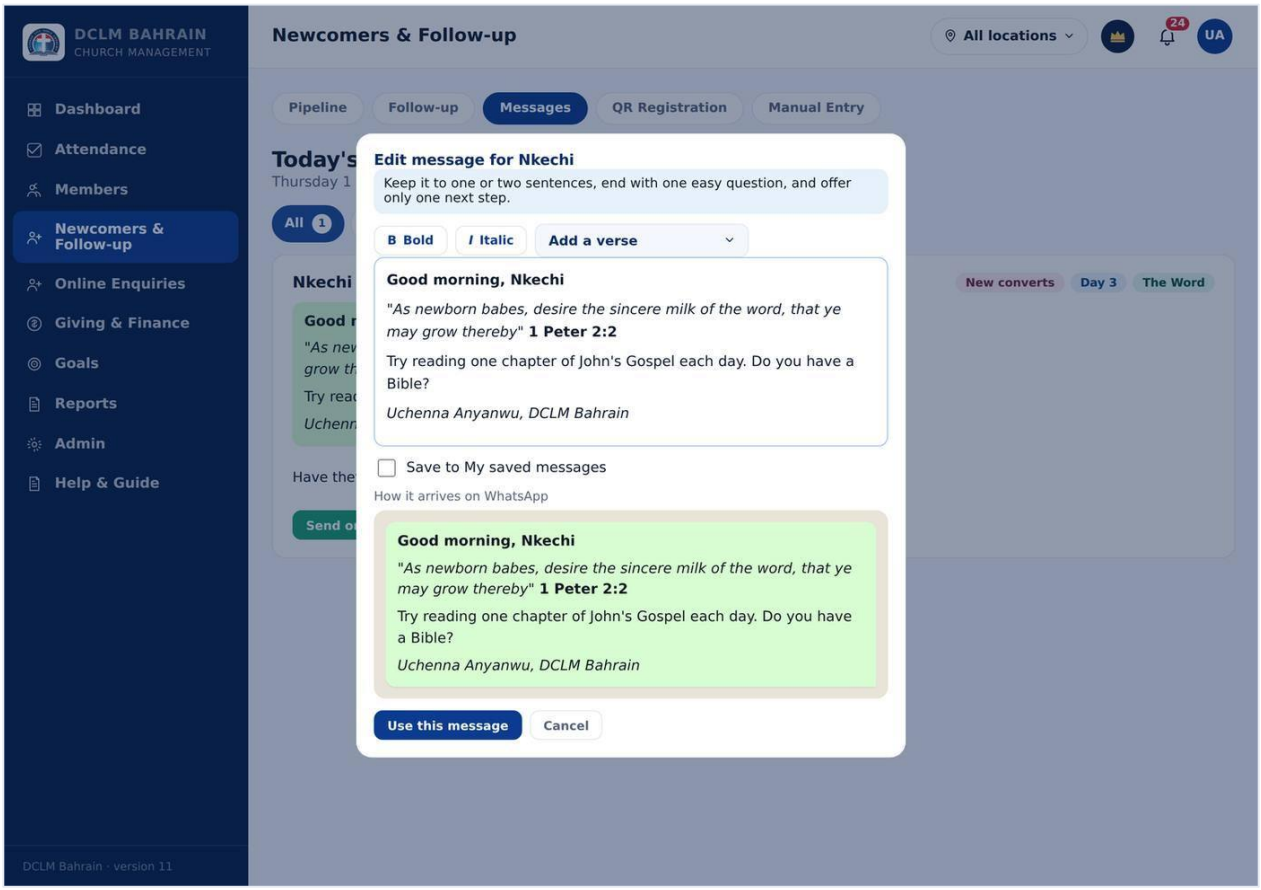

Figure 26. Editing a message.

1. Select words and press **Bold** or **Italic**. The message arrives exactly as the preview shows.
2. **Add a verse** puts in a verse from the bank, quoted exactly from the King James Version.
3. Tick **Save to My saved messages** to use it again. Only you can see your saved messages.
4. Press **Use this message**, then send it as usual.

> Keep it to one or two sentences, end with one easy question, and offer only one next step.

A person's messages

On anyone's profile, the **Messages** tab shows their journey: the plan, what was sent and skipped, and any earlier journeys with the reason each ended.

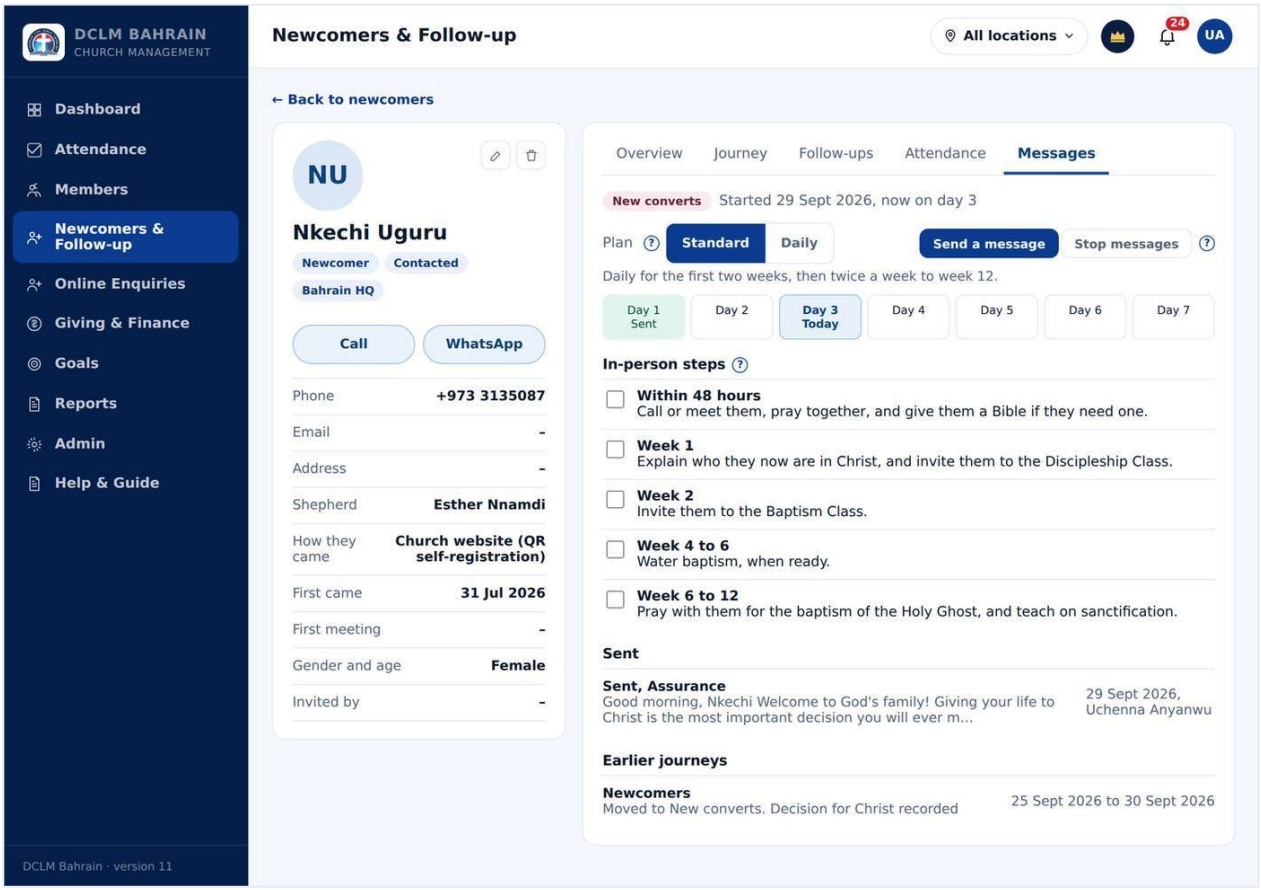

Figure 27. A new convert's messages.

Table 16. On the Messages tab.

Part	What it does
Standard or Daily	Daily sends one every day. Standard follows the plan for their journey.
Send a message	Any day, besides their plan. Choose from the bank by theme, one of your saved messages, or write your own, check it, send it on WhatsApp and record it. Their planned messages carry on unchanged.
Stop messages	Stops their planned messages, for example if they asked. **Restart messages** starts them again.
Start messages	For someone with none running, such as a newcomer added before this feature, or who unticked Keep in touch.
Record a decision for Christ	Moves them to New converts, and records the Salvation milestone for a newcomer.
In-person steps	For a new convert, the discipler's steps alongside the messages. Tick each one when done.

They said they are not interested

Press **Mark as Not Interested** on their profile, write briefly why, and press **Confirm**. They leave the active pipeline but are not deleted, so they can be brought back if things change.

Back to contents

6. Becoming a member

A newcomer is proposed for membership once three things are true. The system only proposes it. Somebody confirms it.

Table 17. The three conditions for membership.

Condition	Means
Salvation	The **Salvation** milestone is ticked on their profile, with its date.
Attendance	They have been checked in at at least half the Friday Worship Services held at their location since their first check-in.
Time	They first came at least six months ago, counted from the **First came** date on their profile.

Membership readiness on their profile shows each condition and how far they are, so it is always clear why somebody is or is not proposed. Check newcomers in at every Friday Worship Service, so their attendance counts.

1. When all three are met, a green banner at the top of their profile says **Ready for membership**. Press **Make a member** in it.
2. Anybody can be made a member at any time with **Make a member now** under **Membership readiness**, such as somebody moving from another church.
3. Or drag their card to the **Member** column and confirm.

You are asked to confirm first. They join the member roll as a General Member at their location, keeping their shepherd if that person shepherds members there, and otherwise auto-assign gives them one. They keep the same profile: their card under Member opens it, and their journey simply continues.

Making a member needs permission to add members as well as to change newcomers. Without it, the buttons are not shown.

Back to contents

7. Online enquiries

Where: cms.dclm-bh.org/enquiries

Messages from people who have not visited yet, such as a question on Instagram or a website form. Enquiries are not tied to a location until the person attends. Each can have a **follow-up person** who looks after them.

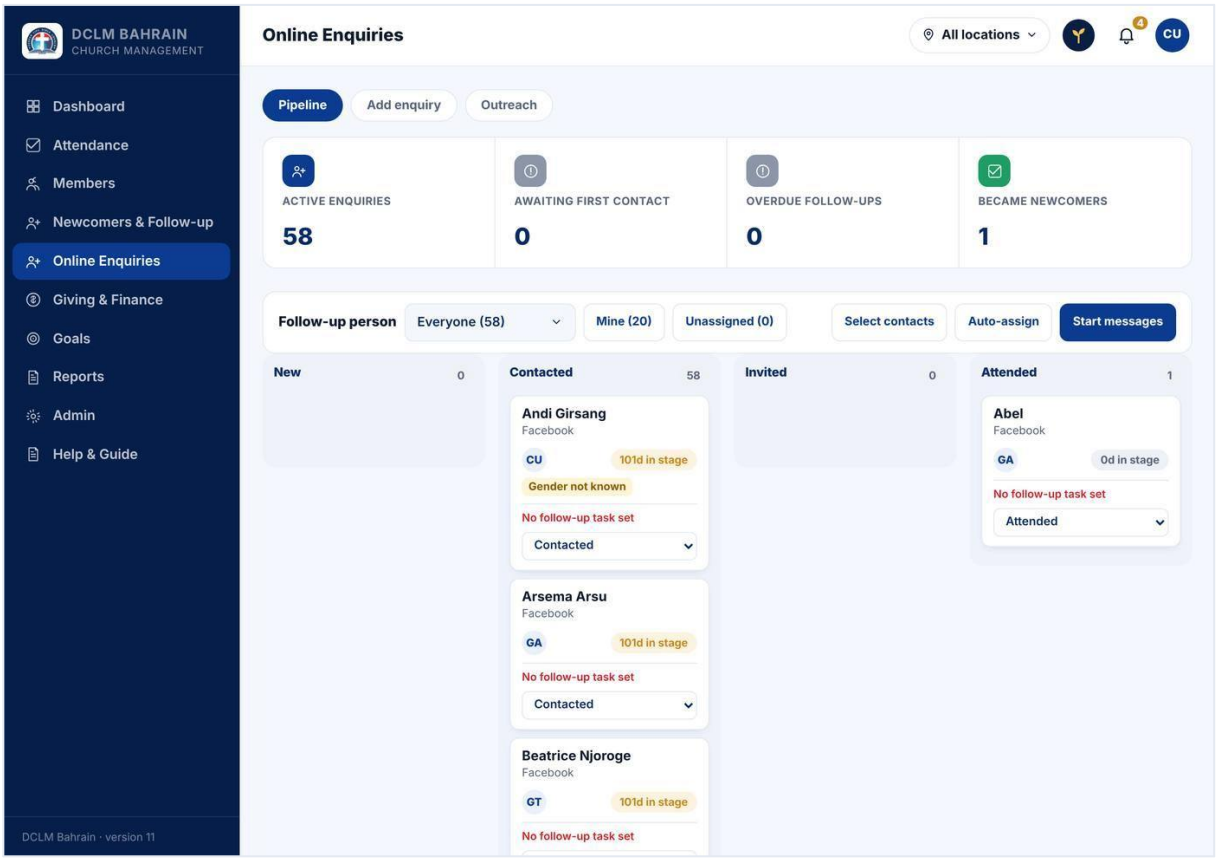

Figure 28. The enquiries board.

Adding an enquiry

1. Press the **Add enquiry** tab.
2. Fill in **Name**, choose where they **Came through**, and record at least one way to reach them: **Phone**, **Email** or **Social handle**.
3. Add **What they asked about**, their **Gender** if known, a **Follow-up person**, and the **Campaign** if it came from one.
4. Press **Add enquiry** at the bottom.

Answering an enquiry

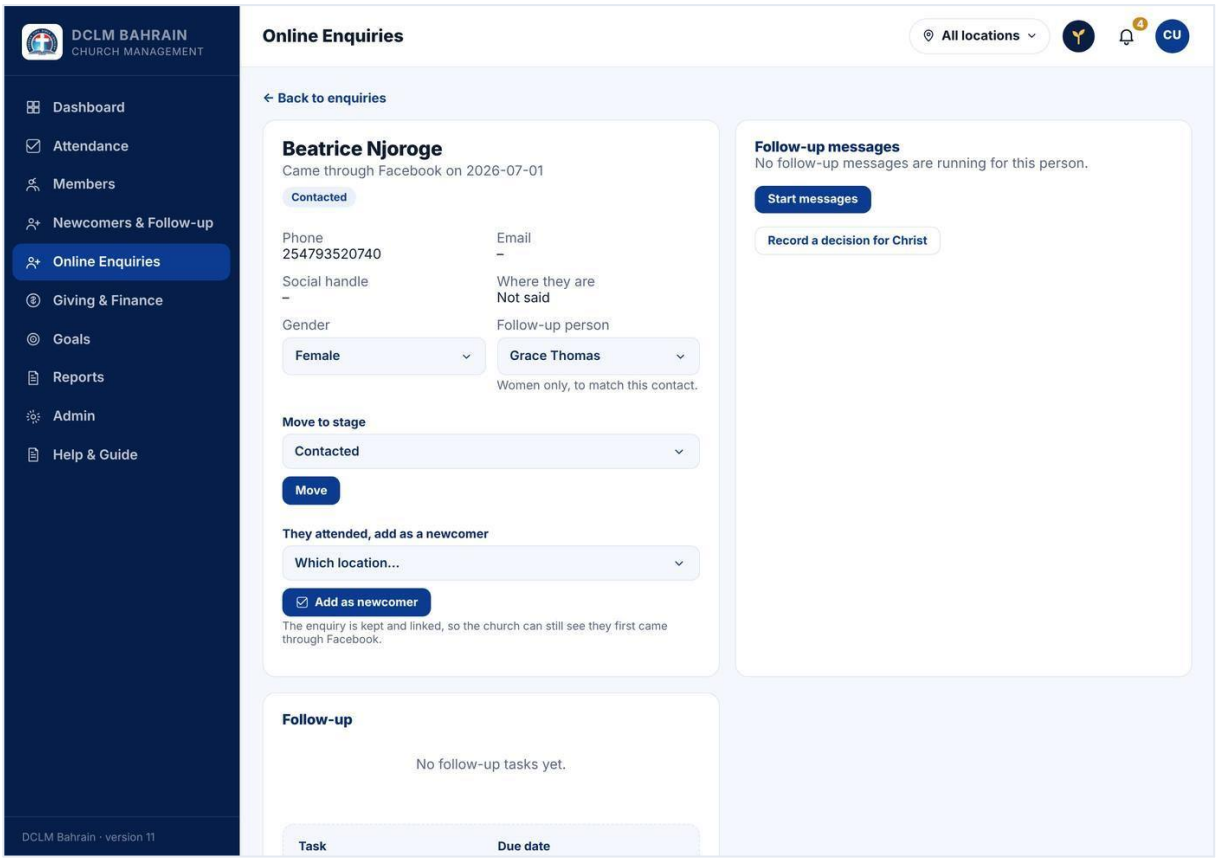

Figure 29. An enquiry.

1. Press the enquiry's card to open it.
2. Reply to them the way they reached the church.
3. Choose the new stage in **Move to stage** and press **Move**.
4. To plan a follow-up, type it under **Task**, choose a date and press **Add task**.
5. When done, press **Mark done**, choose how you reached them, and press **Save & mark done**. The other four boxes are optional here.

> If they will not be pursued, choose **Not pursuing** and say why. Such enquiries can be brought back with **Reactivate** on the board.

When they turn up

1. Open the enquiry.
2. Choose the location they attended under **They attended, add as a newcomer**.
3. Press **Add as newcomer**. Their follow-up person becomes their shepherd if they shepherd at that location and are of the same gender, and otherwise they get one from there. Their gender comes with them, and the enquiry stays linked so the church can see where they came from.

A follow-up person for every contact

Anyone ticked **Can shepherd others** in Admin whose role can follow up newcomers can be given contacts. Men follow up men and women follow up women. The **Follow-up person** bar above the board narrows it to **Mine**, **Unassigned** or one person's contacts, and each card shows its person's initials.

1. **One contact:** open it, set **Gender** if you know it, and choose in **Follow-up person**. Only people of the same gender are offered.
2. **Several at once:** press **Select contacts**, tick the cards, choose a person in the bar and press **Assign**. If any ticked contact is of the other gender, nothing is saved and the message names them.
3. **Everyone without one:** press **Auto-assign**. Each contact goes to the follow-up person of the same gender with the fewest. Change any row or choose **Leave unassigned**, then press **Apply**. Nothing is saved until then.

> A contact whose gender is not known can go to anyone. Auto-assign marks the row **Check before you apply**, and the card keeps the **Gender not known** tag until someone sets the gender on the contact. A follow-up person with no gender set in Admin is given nobody by auto-assign.

Messages to online contacts

A new enquiry starts the **Online contacts** journey at once, so its messages appear in **Today's messages** for its follow-up person. Contacts not yet on a journey are started together with **Start messages** on the board: tick the ones to start and press **Start messages**. Its **Follow-up messages** card, on the enquiry, shows the plan and what was sent. When they attend and are added as a newcomer, they move to the Newcomers journey, and their history comes with them.

Which streams work

The **Outreach** tab compares campaigns: what each cost, how many enquiries it brought, how many attended, the share who attended, and the cost per enquiry and per newcomer.

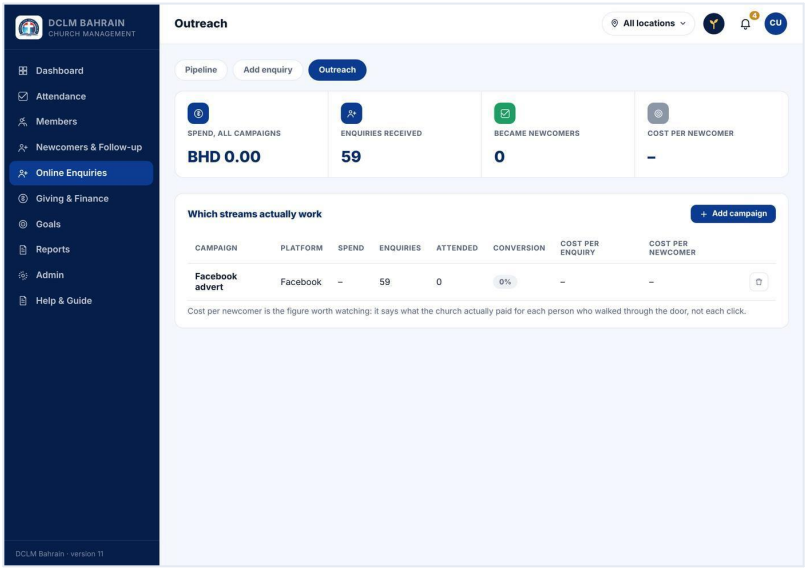

Figure 30. Comparing outreach campaigns.

Back to contents

8. Giving, expenses and remittance

Where: cms.dclm-bh.org/finance

Giving and expenses for your location, or every location for an administrator covering them all. Only roles with finance access see any of it.

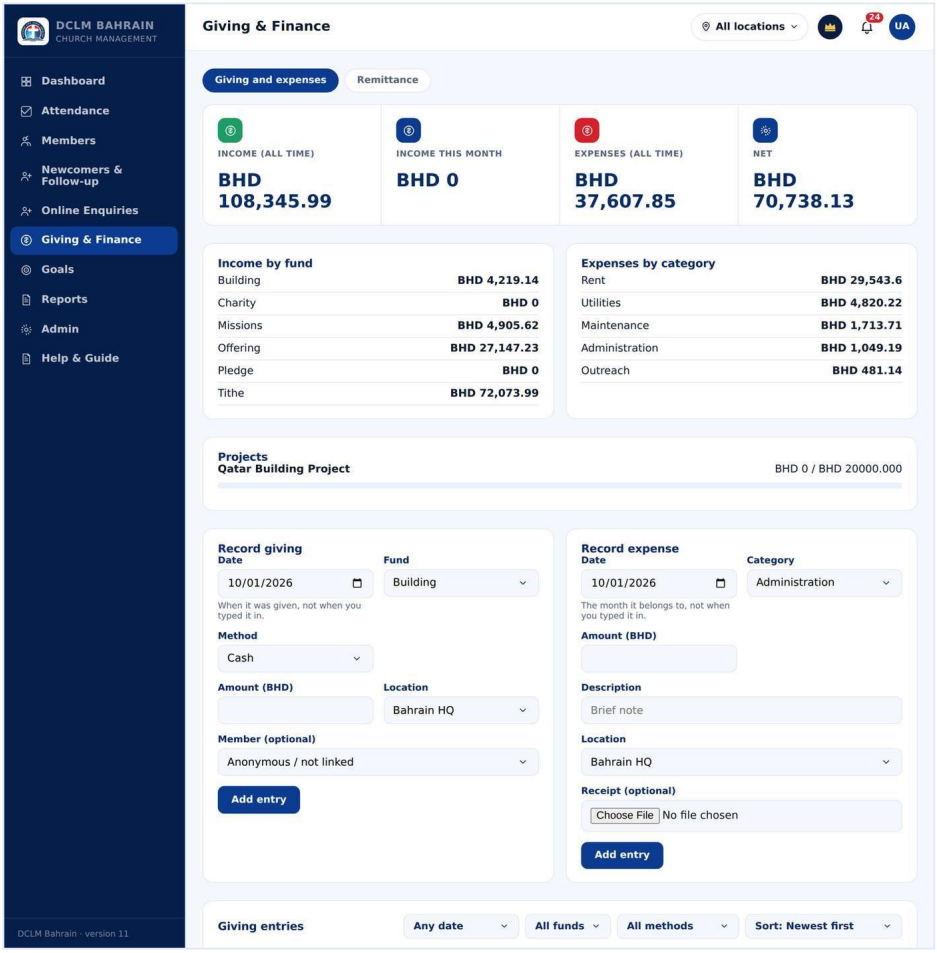

Figure 31. Giving and finance.

Recording giving

1. In **Record giving**, set the **Date** it was given.
2. Choose the **Fund** and **Method**, and type the **Amount (BHD)**.
3. Choose the **Location** if more than one is offered.
4. Choose who gave it in **Member (optional)**, or leave it blank for anonymous giving.
5. Press **Add entry**. It appears in **Giving entries**.

> Offerings typed on a session form are already recorded. Only record giving that came in another way.

Recording an expense

1. In **Record expense**, set the **Date** to the month the expense belongs to.
2. Choose the **Category**, type the **Amount (BHD)** and a short **Description**.
3. Attach the receipt under **Receipt (optional)**. A photo or a PDF will do.
4. Press **Add entry**.

Correcting an entry

1. Find it in **Giving entries** or **Expense entries**. Newest are first, and each expense shows its description.
2. Press the pencil on its row. The page moves up to the form, marked **Editing**, with its details, including the date, filled in.
3. Change what was wrong and press **Save changes**, or **Cancel** to leave it. The bin on the row deletes an entry recorded in error.

The monthly remittance

Once a month, what is left after expenses is sent on. Each location records its own, from its own figures.

1. Press the **Remittance** tab. Each month shows whether it has been sent.
2. If you cover more than one location, choose whose remittance in the dropdown at the top right.
3. Press **Record** on the month. The form shows what was collected, the expenses, and what is due for each fund.
4. Check the amount actually sent for each fund and where it went. If it differs from what is due, say why in the box that appears.
5. Add the date sent and the bank reference, and press **Record this remittance**.

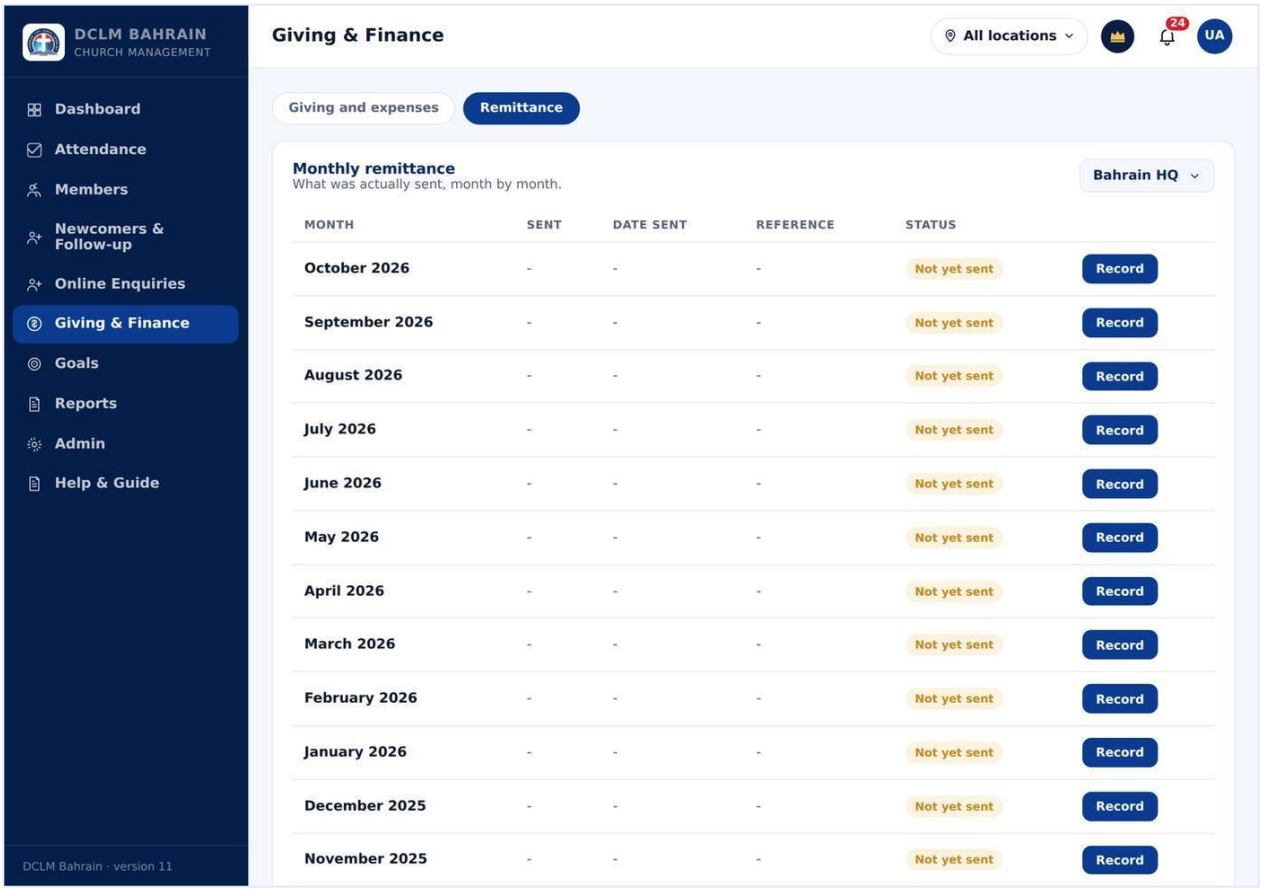

Figure 32. Each month's remittance.

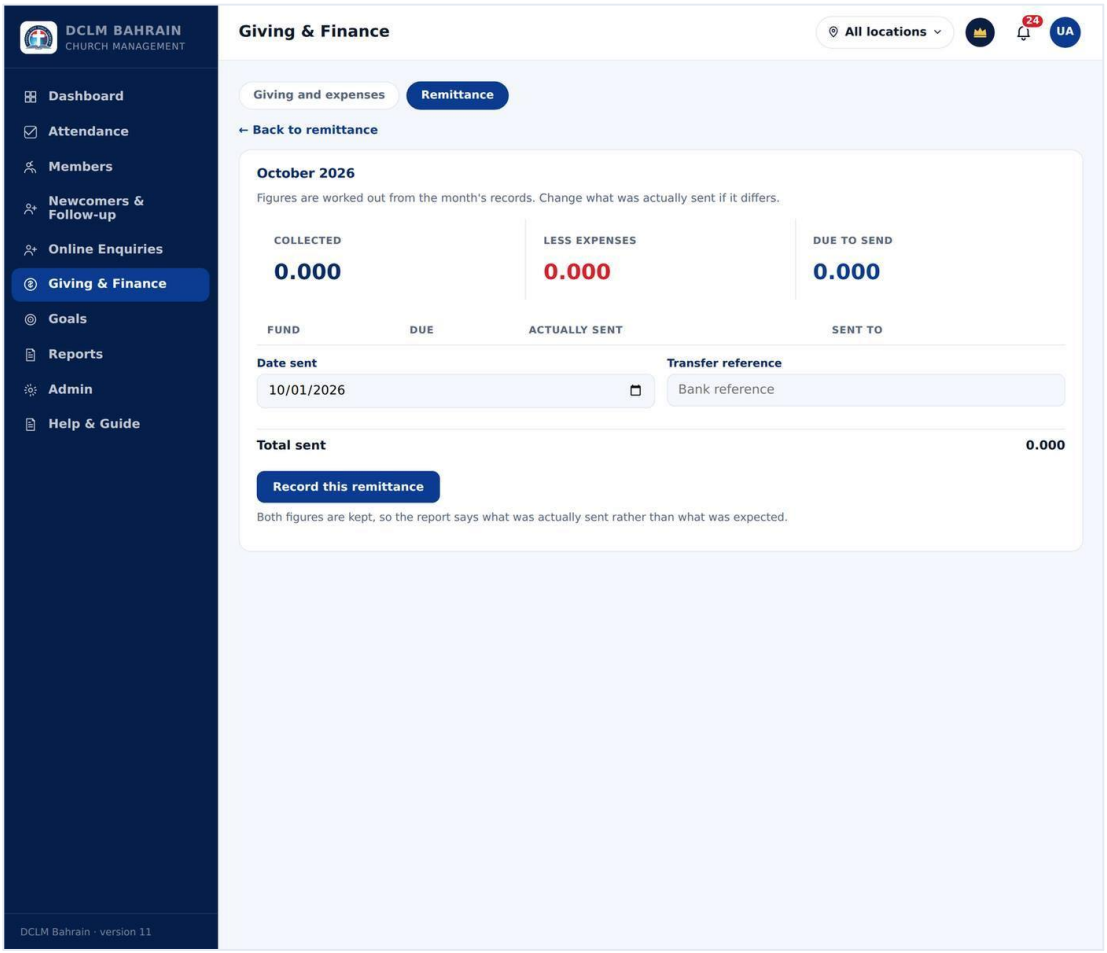

Figure 33. Recording what was sent.

> A recorded month shows **Edit** instead of Record, to correct it later.

Back to contents

9. Goals

Where: cms.dclm-bh.org/goals

The church's goals, grouped as short-term, medium-term, long-term and spiritual growth, each with a bar showing progress toward its target, its target date and how it is measured.

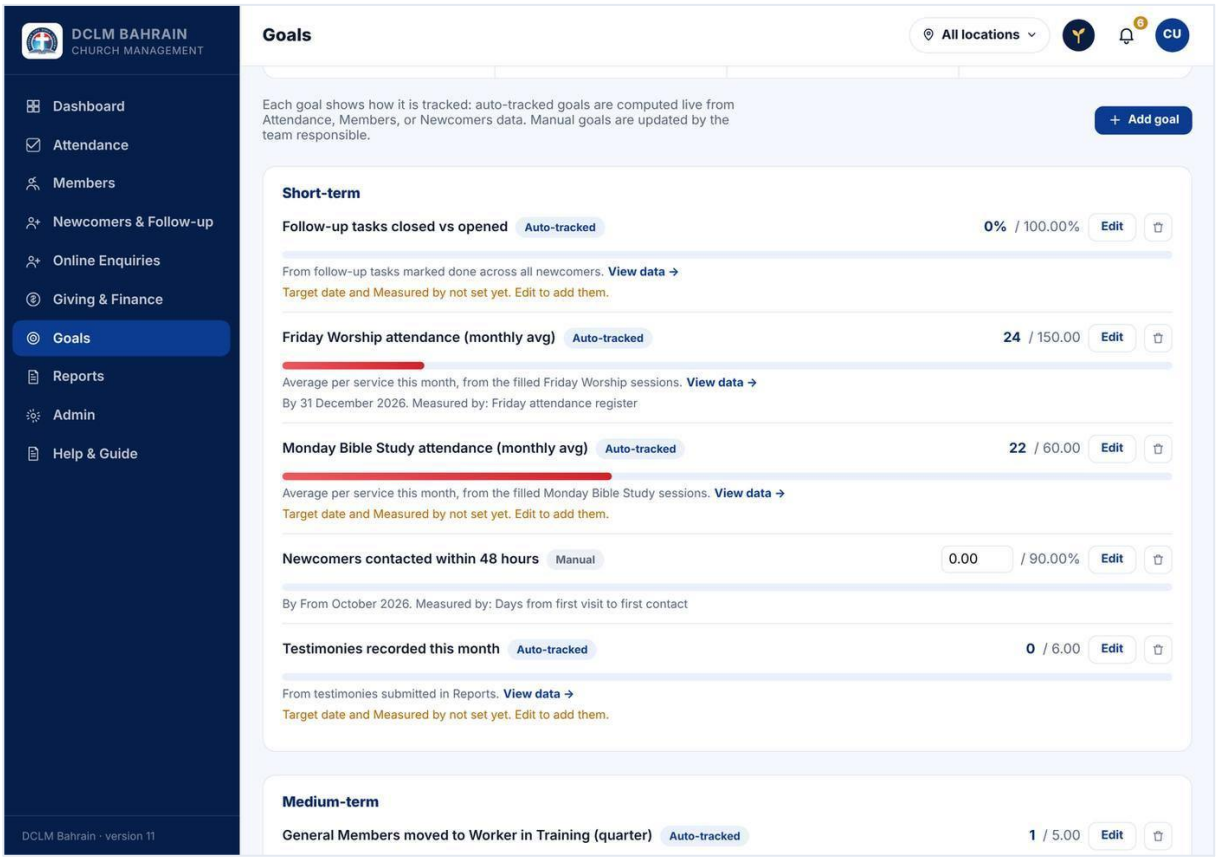

Figure 34. The goals page.

Table 18. The two kinds of goal.

Kind	How it moves
Auto-tracked	Works itself out from attendance, members, newcomers or testimonies, and the line under it says how. **View data** opens the screen behind it. The attendance goals are the average per service this month.
Manual	Something no record can measure. Type the new figure in the box beside it and press Enter, or click elsewhere. **Saved.** appears under the goal.

A bar is green at 90% of its target or more, blue from 60% to 90%, and red below 60%. The bin beside a goal removes it, for roles that can delete.

1. To set a new goal, press **Add goal** at the top right.
2. Fill in **Goal name**, choose the **Horizon**, and type the **Target**. **Unit (optional)** is for something like %.
3. Type the **Target date**, such as December 2026 or From October 2026, and what it is **Measured by**, such as Newcomers registered each month.
4. Press **Add goal** under the form. New goals are manual.

Changing a goal

1. Press **Edit** beside the goal, for roles that can edit goals.
2. Change the name, horizon, target, unit, target date or what it is measured by.
3. Press **Save**. **Cancel** leaves it as it was.

> The overseer report lists every goal with its **Target date** and **Measured by**. A goal still showing **Target date and Measured by not set yet** appears there as Not set, so add them before you generate it.

Back to contents

10. Reports

Where: cms.dclm-bh.org/reports

The overseer report, the zonal monthly report, and the weekly notes and testimonies.

The overseer report

The church's own report, for as many months as you choose: one month makes the monthly report, and three make the quarterly report for the overseer. Tables, charts and figures are filled in from the system.

1. On the **Reports** tab, under **Report type**, choose **Overseer report**.
2. Choose the first month in **From** and the last in **To**. **Report title** shows what it will be called.
3. If you cover more than one location, choose what it covers in **Covers**: All locations for the whole church, or one location.
4. Under **Written by you**, update the **Summary**, **Challenges and responses**, **Worker training and assumptions** and **Conclusion**. They are brought forward from your last overseer report. Leave a box empty to leave that part out.
5. Press **Preview** to see it without saving, or **Generate report** to save it. It appears under **Past reports**. Press **Open PDF** to open it.

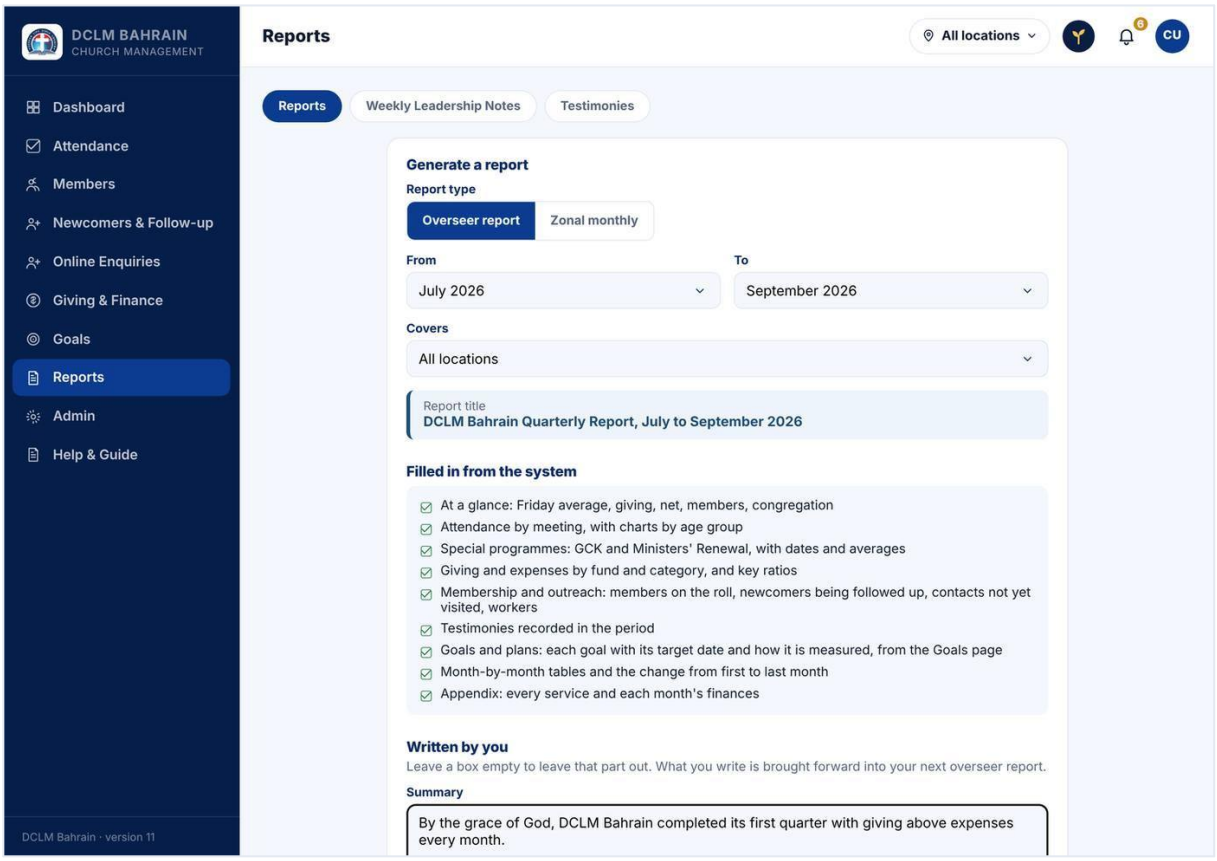

Figure 35. Generating a report.

Membership figures are as they stand on the day it is generated. Month-by-month tables appear when it covers two months or more. Somebody limited to one location always gets their own location's report. To make the same report again, delete it from **Past reports** first.

The zonal monthly report

The layout Zonal asks for, a section for each month, with nothing to type.

1. Under **Report type**, choose **Zonal monthly**, then **From** and **To**.
2. Press **Generate report**, or **Spreadsheet** for the same tables as an Excel file with a sheet for each month.

A weekly service that gave way to GCK is marked GCK. Amounts sent to the DLBC account come from the remittances recorded in Giving and Finance.

Weekly leadership notes

1. Press the **Weekly Leadership Notes** tab.
2. Choose the **Department**, name the **Week**, and set **Week starting**.
3. Fill in **Highlights**, **Challenges** and **Prayer points / needs**.
4. Press **Submit note**. Leaders read the notes under **Recent notes**.

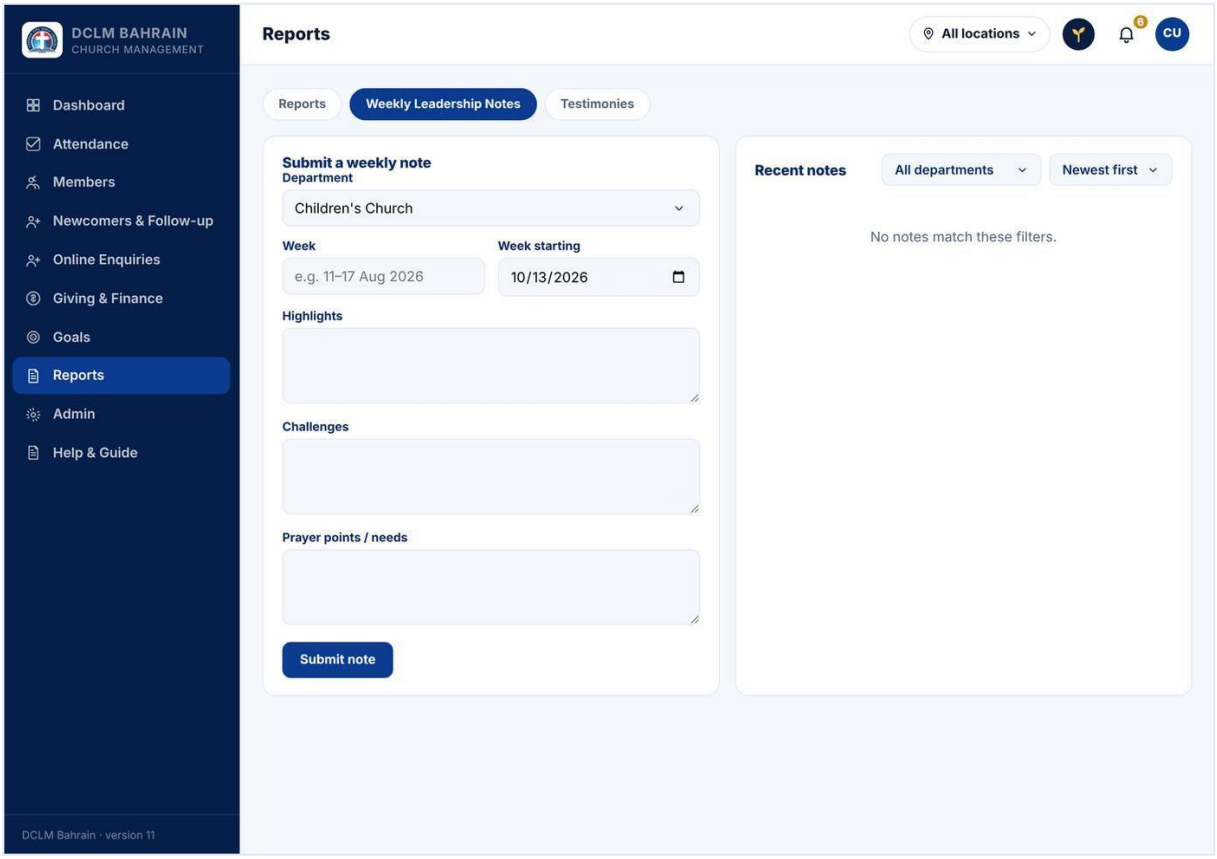

Figure 36. A weekly leadership note.

Testimonies

1 Press the **Testimonies** tab.

2 Type the name under **Name** (if not anonymous), or tick **Submit anonymously**.

3 Choose the **Service** and type the **Testimony**.

4 Press **Submit**. Testimonies go into the overseer report for their month and onto the dashboard.

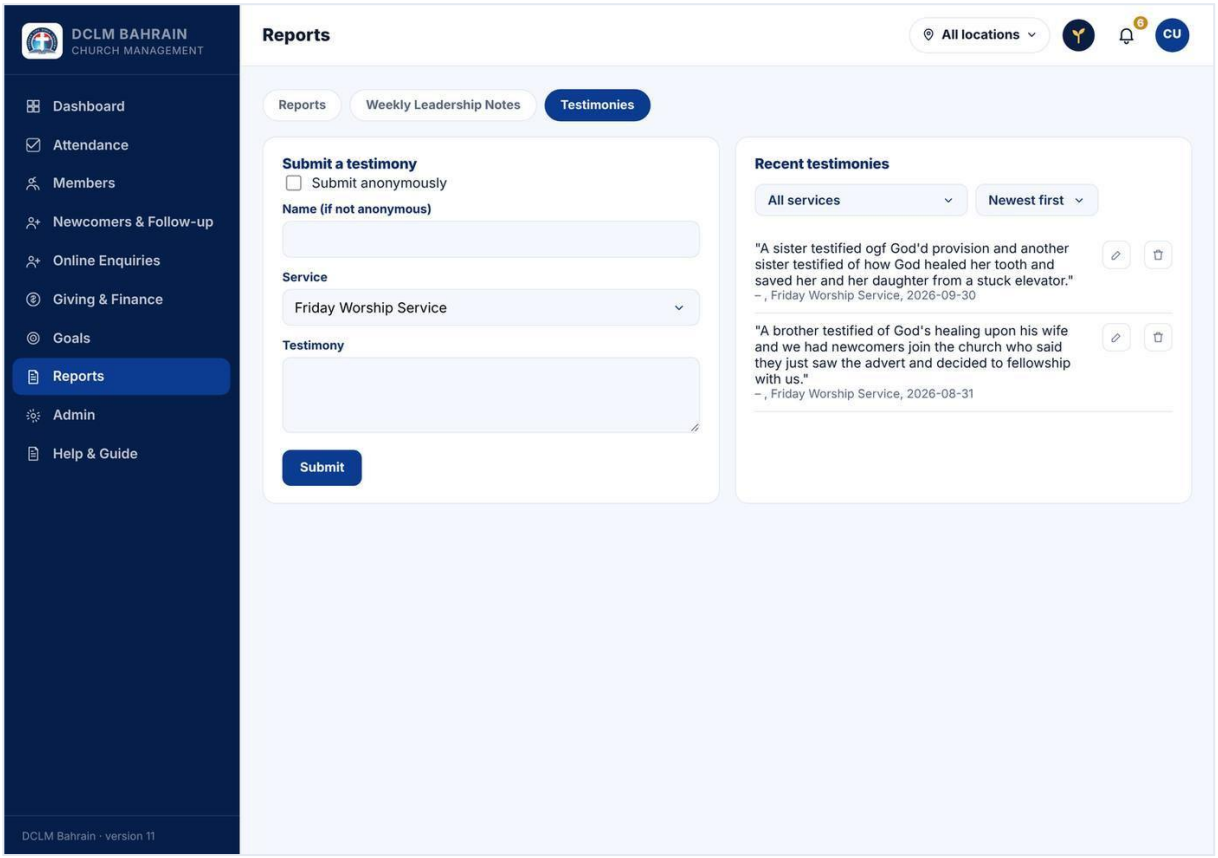

Figure 37. Recording a testimony.

Back to contents

11. Settings and people

Where: cms.dclm-bh.org/admin

Accounts, roles, meetings, households, fellowships, locations and the lists the rest of the system chooses from. Only roles with access to Admin see it.

Table 19. Who changes what in Admin.

Setting	Changed by
Roles and their permissions, meeting types, locations, and the follow-up assignment switch	An administrator whose account covers every location, because these affect every location.
Accounts	Somebody limited to one location adds accounts at that location only, with roles no more powerful than their own.
Households and fellowships	Anybody whose role can change members or attendance.
The lists: funds, payment methods, expense categories, sources, milestones, services and departments	Anybody who can open Admin whose role also covers that list's section, such as finance for funds.

Adding somebody to the system

1. On the **Users & Roles** tab, press **Add user**.
2. Fill in **First name**, **Last name**, **Email** and a starting **Password**.
3. Choose their **Role** and **Location**. Only roles you are allowed to give are offered.
4. Tick **Can shepherd others** if people may be assigned to them to follow up, and choose their **Gender**. If they are on the member roll under exactly the same name, the account is linked to that member record.
5. Press **Add user** under the form, and tell them their email and password privately. They can change the password themselves in My profile.

Table 20. Roles and shepherding.

Setting	What it decides
Role	Which sections and buttons the person has. A ready-made **Follow-up** role suits people who look after members and newcomers: it can view and correct members, record visits, add and follow up newcomers, and add testimonies.
Can shepherd others	Whether people can be assigned to them, whatever their member category. It shows under each person's role in the list, and can be ticked or unticked there at any time.
Gender	Men follow up men and women follow up women. Choose it in the **Gender** column. A shepherd left on **Not set** is given nobody by auto-assign, and a note above the list names them.
Member record	Which person on the member roll the account belongs to, so nobody is ever given themselves to shepherd. Choose it in the **Member record** column, or leave **Not a member** for someone not on the roll. A member record belongs to one account only. Once linked, the account shows the name on the member record.
Worker category	Church status only. Being a Worker gives no powers in the system.

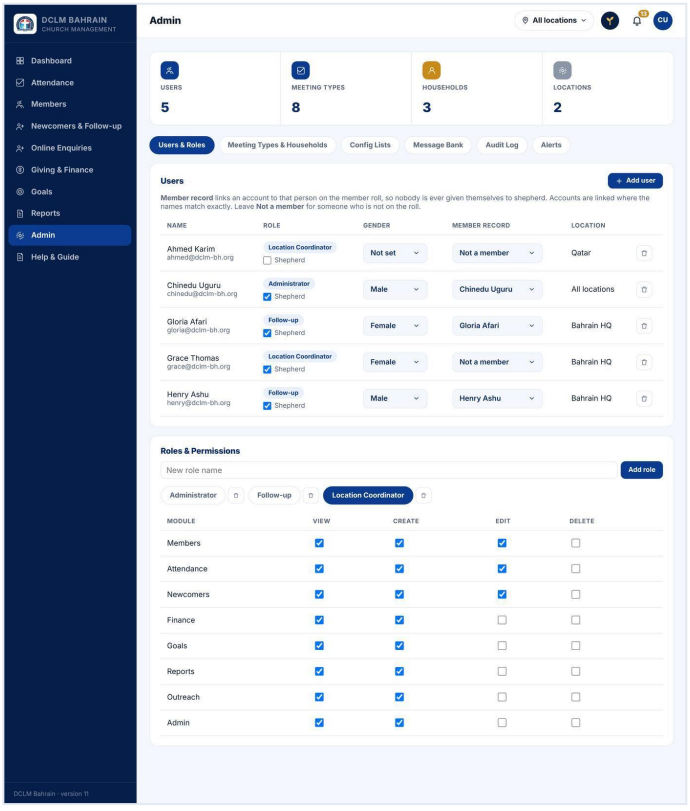

Figure 38. Accounts, and a role's permissions.

Roles and permissions, below the accounts, lists each role. Press a role to see its grid of **View**, **Create**, **Edit** and **Delete** ticks for each module, which is each section of the system. Changing a tick takes effect at once for everybody with that role. Give the narrowest role that lets somebody do their job.

Meetings

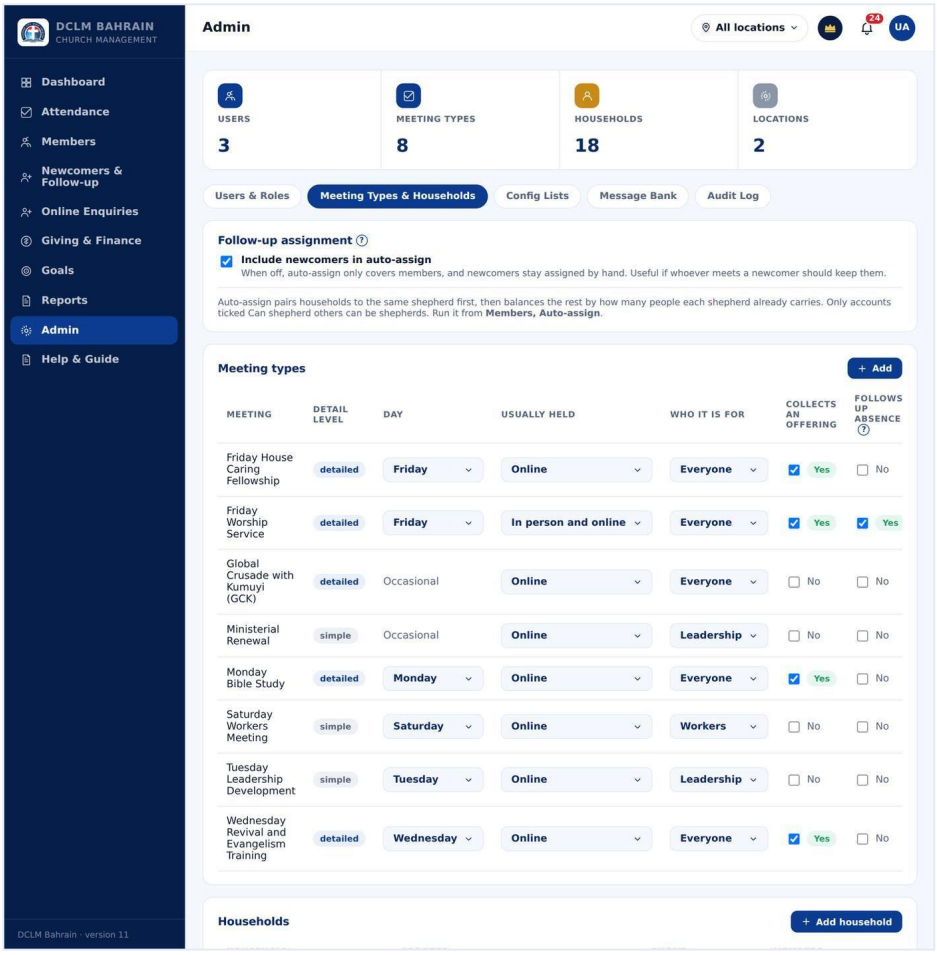

Figure 39. Meeting types.

Table 21. What each meeting type sets.

Column	Decides
Detail level	Detailed has six attendance boxes. Simple has men and women only.
Day	The day it meets. Its session is created that day, unless set in **Settings**.
Usually held	In person and online, Online, or In person. Weekly sessions are created this way, and each session's Mode can still be changed.
Who it is for	Everyone, Workers or Leadership. Only they are followed up when absent.
Collects an offering	Whether its session form has offering boxes.
Follows up absence	Whether missing it makes a task. It needs a start time, set in **Settings**.

1. To add one, press **Add** above the table.
2. Type a short **ID**, such as tue-prayer, and the **Name**. The ID cannot be changed later.

3. Choose the **Day**, **Level** and **Frequency**, and press **Add meeting type**.
4. Set the other columns in its row of the table.

> **Follow-up assignment**, at the top of this tab, decides whether auto-assign also gives newcomers a shepherd. Turn it off if whoever meets a newcomer should keep them.

Households

1. On the same tab, press **Add household**.
2. Fill in **Household name**, **Address** and **Phone**, and press **Add household**.
3. Link each person to it from their profile, with the edit pencil.

House fellowships

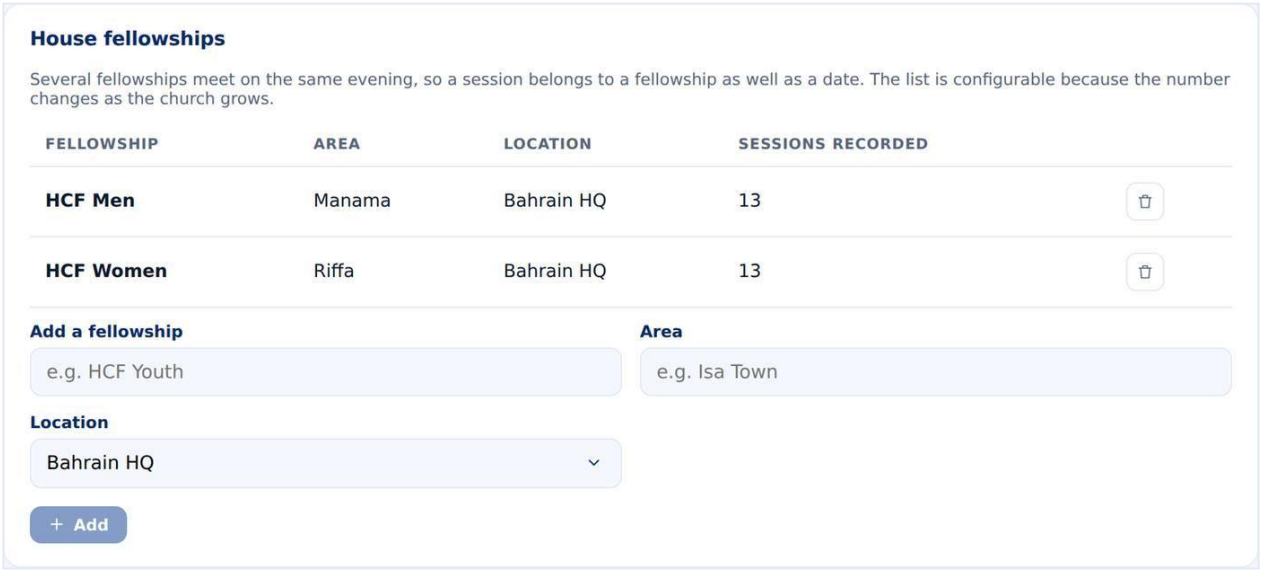

Figure 40. The house fellowships.

1. At the bottom of the same tab, type the name under **Add a fellowship**, and its **Area**.
2. Choose the **Location** where it meets.
3. Press **Add**. Its session for the coming Friday is created at once, and one each week after.

> A fellowship with sessions recorded cannot be removed, so their history keeps what it belongs to.

Locations and lists

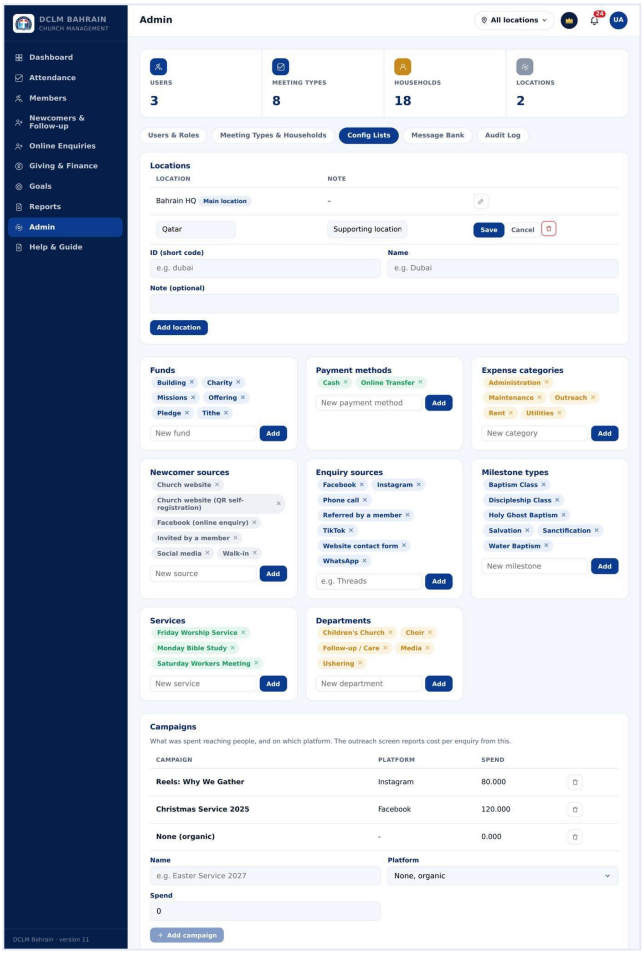

Figure 41. Locations and lists, with one location being renamed.

1. On the **Config Lists** tab, **Locations** comes first.
2. To rename one, press the pencil on its row, change the name or note, and press **Save**. Every screen shows the new name at once, and nothing recorded moves.
3. To add one, fill in the short code and name below the table and press **Add location**. The short code cannot be changed later.
4. Each list below works the same way: type a new entry and press **Add**, or press the cross on an entry to remove it.

> **Bahrain HQ** is marked **Main location**. It cannot be removed, and it is where anything without a location goes. **Campaigns** and **Projects** are further down, each with its own add form.

The message bank

Admin, then **Message Bank**, holds every follow-up message, by journey and theme, with the plan day each is used on. Everyone following people up reads it. Only administrators covering every location can change it, and a change applies to everyone at once.

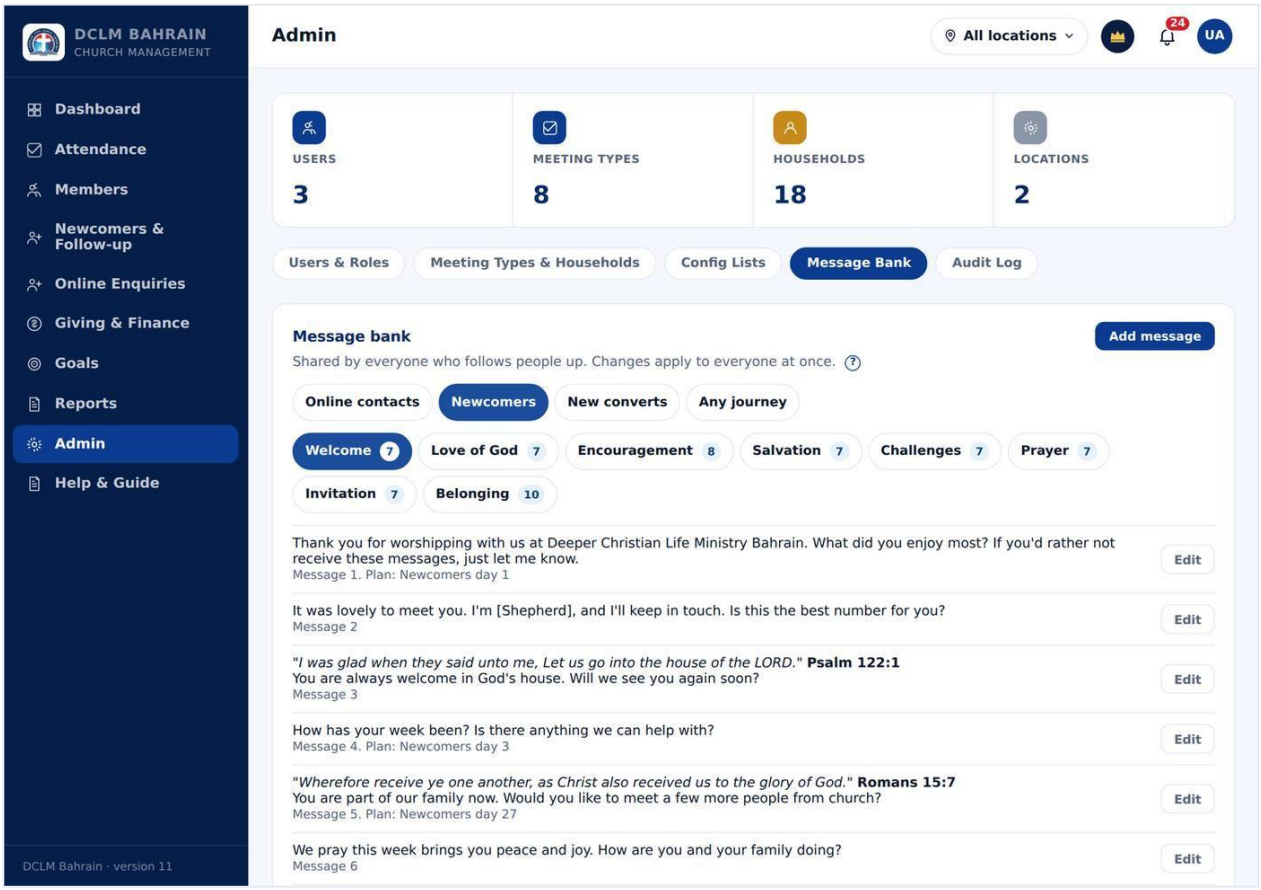

Figure 42. The message bank.

1. Choose the journey, then the theme.
2. Press **Edit** on a message, change the verse, reference or wording, and press **Save changes**. Or press **Add message** to add one to the theme on screen.
3. **Switch off** hides a message from the choices. A message a plan uses cannot be switched off, so no plan day is left empty. Reword it instead.

> Quote verses exactly from the King James Version. Keep each message to one or two sentences ending with one easy question.

The audit log

The **Audit Log** tab lists every change: when, by whom, what, and the details. Type in the filter box to narrow it, such as Member or Giving. Sign-in attempts are listed below, including failed ones.

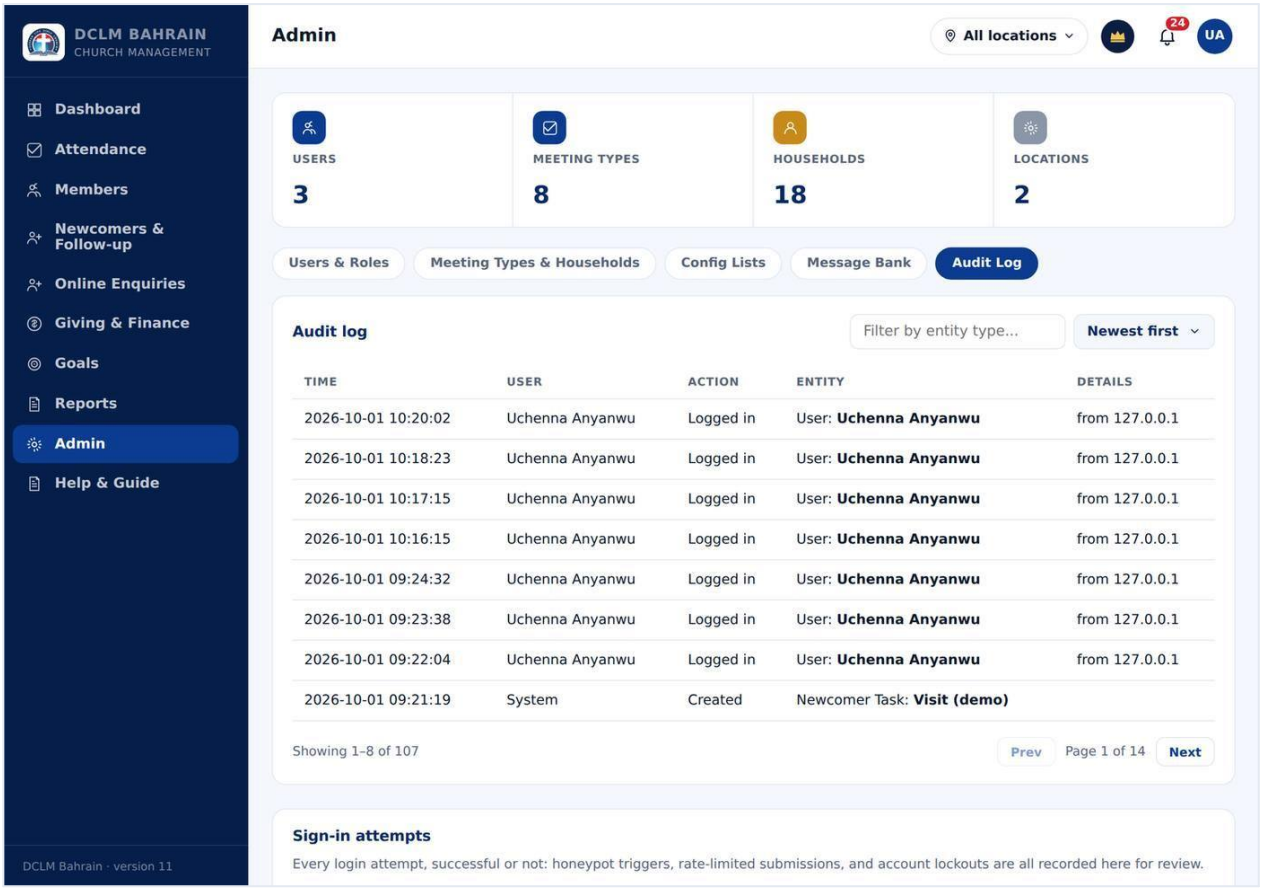

Figure 43. The audit log.

Sending an alert

For church announcements, such as a change of service time. Only roles that can change Admin send them, and someone limited to one location reaches only that location.

1. In Admin, open the **Alerts** tab.
2. Type a **Title** and a **Message**. Your name is added at the end.
3. Choose who in **Send to**: everyone, shepherds and follow-up people, or everyone with one role, and the **Location**.
4. Press **Send alert** and confirm. The page says how many people and devices it reached, and it is listed under **Sent alerts** and in the audit log.

> It reaches only people who have turned alerts on, and who have not unticked **Church announcements**.

Back to contents

12. If something goes wrong

Table 22. Common problems and what to do.

What happens	What to do
A button or section I expected is missing	Your role does not include it. Ask an administrator to check your role.
A form opens but I cannot type in it	Your role can view that section but not change it. The form says so.
Save session is greyed out	The service has not happened yet. Record it on the day or after.
I typed the wrong attendance number	Open the session again, correct it, and press **Save session**. It replaces the old figure.
I ticked the wrong person at check-in	Tap their name again. It unticks at once.
I cannot choose another location	Your account covers one location. Anything you add belongs to it.
A newcomer landed at the wrong location	They scanned another location's QR code. Press the edit pencil on their profile, choose the right **Location** and press **Save changes**. Their open tasks move with them.
A phone number is refused	Another member already has it. Search for them first.
The remittance will not save	The amount sent differs from the amount due. Say why in the box that appears, then save.
Remittance or report figures look low	Each covers one location, unless you chose All locations. Check which it covers.
A member has stopped coming	Check the **Follow-up** tab under Members. If nothing is there, the service may be more than 7 days old or its meeting may not follow up absence. Open its check-in page and press **Follow up** under **Follow up those not ticked**, or add a task on their profile.
A shepherd is stopping and has people assigned	In Admin, untick **Shepherd** under their role. Then press **Auto-assign** and **Reassign everyone instead**, check the proposal and press **Apply**.
Auto-assign says nobody is set up to shepherd	Tick **Can shepherd others** on at least one account at that location in Admin.
Auto-assign gives a shepherd nobody	Their gender is not set. In Admin, Users, choose **Male** or **Female** in their **Gender** column.
The person I want is not offered as shepherd or follow-up person	Only people of the same gender are offered. Check the gender of the person being followed up, and the shepherd's gender in Admin.

What happens	What to do
Someone has a shepherd of the other gender, or shepherds themselves	In Members, press **Correct with Auto-assign** in the box at the top, check the proposal and press **Apply**. If an account shepherds its own member record, set its **Member record** in Admin, Users.
I do not get alerts	Open My profile on that device. If alerts are blocked, allow notifications for the site in the phone or browser settings. On an iPhone, open the system from its Home Screen icon. Then press **Send me a test alert**.
Somebody else's alerts arrive on this phone	They did not sign out on it. Sign them out, or press **Turn off here** in their My profile.
I have no service badge	The badge is for people who follow others up: shepherds, and roles that can change newcomers.
My level went down	Points count the last 90 days. A note gives 30 days' warning with the steps that keep your level, before you move down one level.
There is no Edition name on a new session	It appears only for occasional meetings, such as GCK and Ministerial Renewal.
My Today's messages list is empty	Nobody you look after is due a message today. Planned messages come every few days. Check a person's Messages tab to see their plan.
I pressed Send on WhatsApp but didn't send it	Press **Not yet**. Nothing is recorded until you press **Yes, record it**.
Someone asked us to stop messaging them	On their profile, open **Messages** and press **Stop messages**.
A newcomer is getting no messages	They may have unticked Keep in touch, or were added before this feature. Press **Start messages** on their Messages tab, or use **Start messages** on Today's messages to start several.
I have forgotten my password	Press **Forgotten your password?** on the sign-in page and follow the email.
Somebody gave money but is not a member	Record it with **Member (optional)** blank. It still counts in every total.
The name of a location is wrong	An administrator renames it in Admin, Config Lists.
I am locked out after wrong passwords	Wait 15 minutes, then sign in with the right password, or reset it with **Forgotten your password?**

Still stuck? The **Help & Guide** page in the menu has short guides arranged by what you do, and an administrator can see every change in the audit log.

Back to contents

13. Follow-up accountability

Version 11.14 makes sure everyone who misses a service is followed up on time, by someone, and that the Follow-up Coordinator can see it happening. Every time and number below is the value decided on 26 October 2026. An administrator covering All locations can change any of them in **Admin, Follow-up Rules**.

Table 23. The follow-up clock, for a Friday 30 October service.

When	What happens
6:00 pm Friday	The clock starts for everyone not ticked at the service. If names are ticked after the absence check has run, it starts when the task is made instead, so nobody starts out late.
9:00 pm Friday	The absence check makes a task for each person not ticked, three hours after the start time. Administrators are reminded to tick names if none are ticked.
6:00 pm Saturday	Each task is due, 24 hours after the clock started. A newcomer's first-visit task is also due in 24 hours.
6:00 pm Sunday	A task still open needs a reason and a new date from the shepherd, 48 hours after the start. The shepherd is alerted.
6:00 pm Monday	A task still open is on the Follow-up Coordinator's Review list, 3 days after the start, and they are alerted.
6:00 pm Wednesday	The Follow-up Coordinator decides by now, 5 days after the start. If not, the administrators are alerted.

> The app checks the clock twice an hour, so an alert can arrive up to 30 minutes after its time. Due times are always exact, and always Bahrain time, whatever time zone a phone is set to.

My follow-up

My follow-up in the menu is one list of everyone you follow up, members and newcomers together, with late tasks first. Each missed service has its own task, under the person's name. **Priority** means they have missed the same meeting twice or more in a row, so your Follow-up Coordinator has been alerted too.

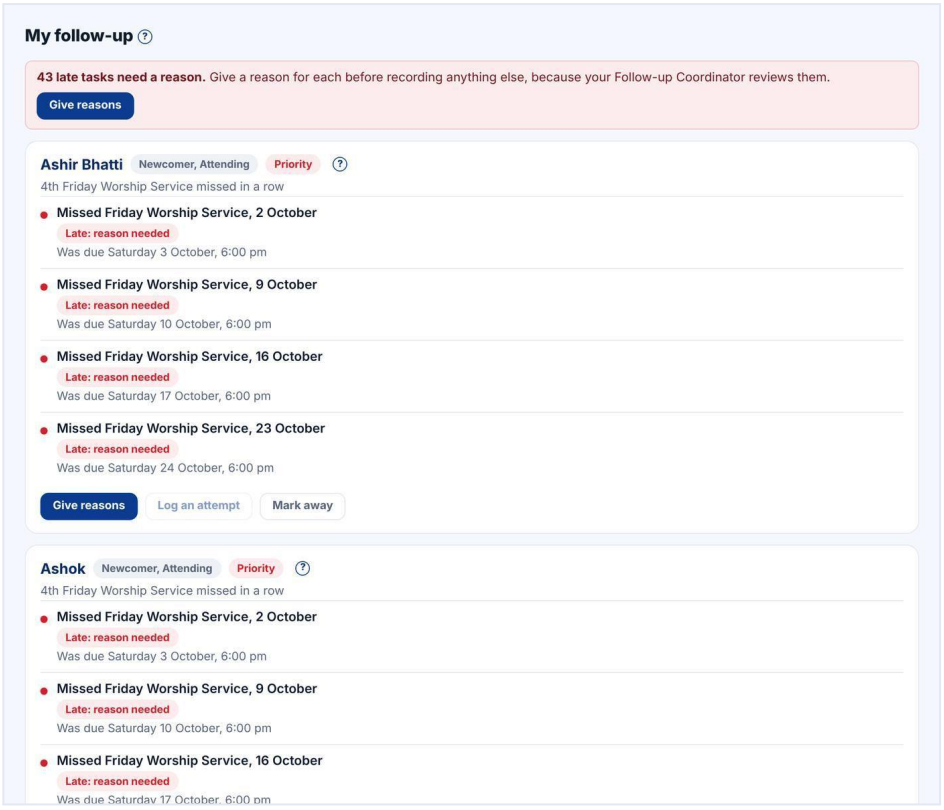

Figure 44. My follow-up, as a shepherd sees it.

1. Open **My follow-up** in the menu.
2. If a red box says late tasks need a reason, press **Give reasons** first. Nothing else can be recorded until each has one.
3. Visit or call the person, then press **Record result** on their card.
4. Press **Mark away** for someone travelling, sick or working abroad, with the dates. No tasks are made for them while they are away.

Recording a result

One visit closes every open absence task for the person, so it is recorded once. The box says how many it closes.

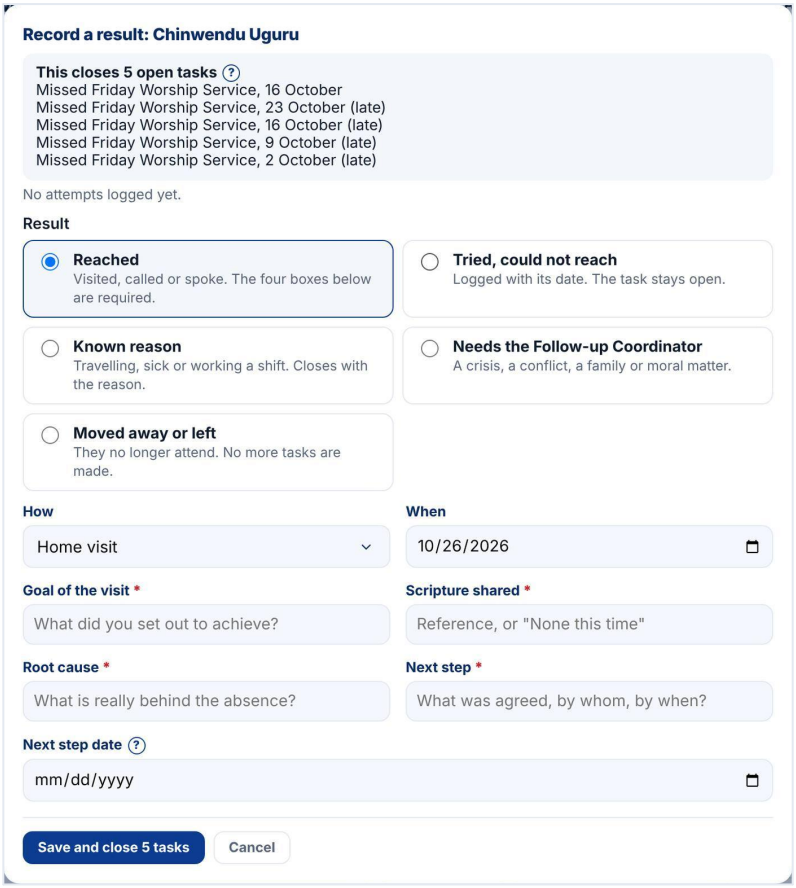

Figure 45. Recording a result.

Table 24. The five results.

Result	What it does
Reached	Visited, called or spoke. Goal of the visit, Scripture shared, Root cause and Next step are required. A **Next step date** makes a new task for you on that day.
Tried, could not reach	Logs the attempt with how you tried. The task stays open. After 3 attempts it goes to the Follow-up Coordinator, who is told.
Known reason	Closes the task with the reason, such as travelling until 15 November. Away dates are optional, and stop tasks while they are away.
Needs the Follow-up Coordinator	For a crisis, a conflict, or a family or moral matter. Say briefly what it is. It goes on the Review list.
Moved away or left	A member's status becomes Moved away, and a newcomer becomes Not Interested. No more tasks are made.

Giving a reason for a late task

A task still open 48 hours after the service needs a reason. Each late task needs its own, even for the same person, because the Follow-up Coordinator sees each one.

1 Press **Give reasons** in the red box, or on the person's card.

2 For each task, choose a **Reason**, add a short note, and choose a **New date**. It can be up to 7 days ahead.

3 Press **Send**. If the new date passes with the task still open, it is late again and needs a new reason.

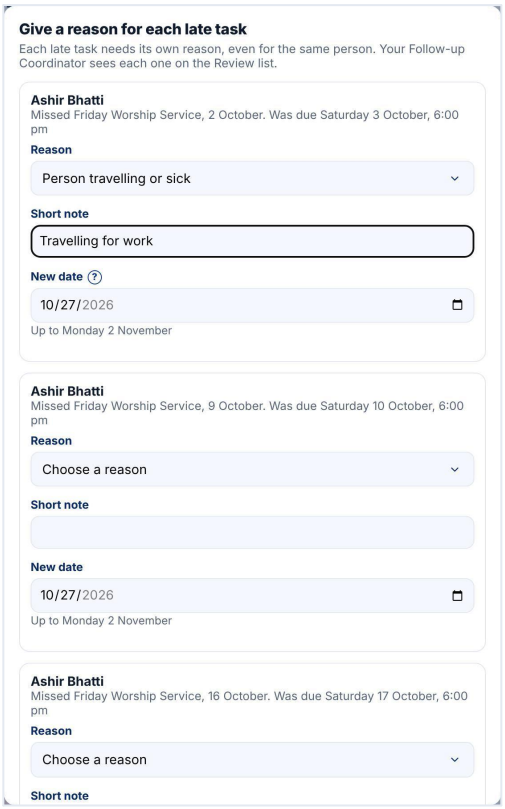

Figure 46. Giving a reason for each late task.

Alerts and the bell

The bell shows what needs your attention, then **Alerts**: tasks given to you, reasons owed, the Review list, repeated absences, someone ticked present after all, and reminders to tick names. The same alerts reach your phone when phone alerts are on in **My profile**. Opening the bell marks them read.

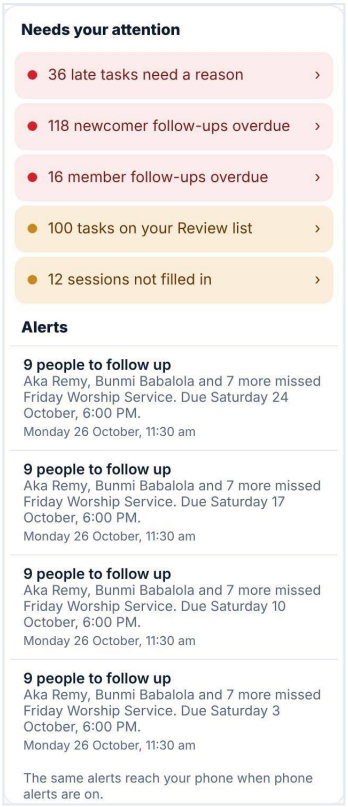

Figure 47. Alerts in the bell.

The Follow-up Coordinator

The Follow-up Coordinator reviews late tasks and their reasons, is alerted on repeated absences, and sees every shepherd's people and record. Any account can be one, through the **Follow-up Coordinator** tick in **Admin, Users**, so an administrator can be one too. It covers All locations or one location. Late tasks and alerts go to the coordinator for the person's location first, then one for All locations, then the administrators. Someone missing three times in a row also gives the coordinator a visit task of their own, one for the whole run.

The **Follow-up Coordinator** role is for people who do only this work: it can view members, newcomers, attendance and reports, and use Follow-up review. It sees no giving and no Admin.

The Review list

Follow-up Review in the menu opens the Review list: late tasks with their reasons, tasks where the shepherd could not reach the person after 3 attempts, matters that need the coordinator, and people with no shepherd. Each shows when it must be decided by.

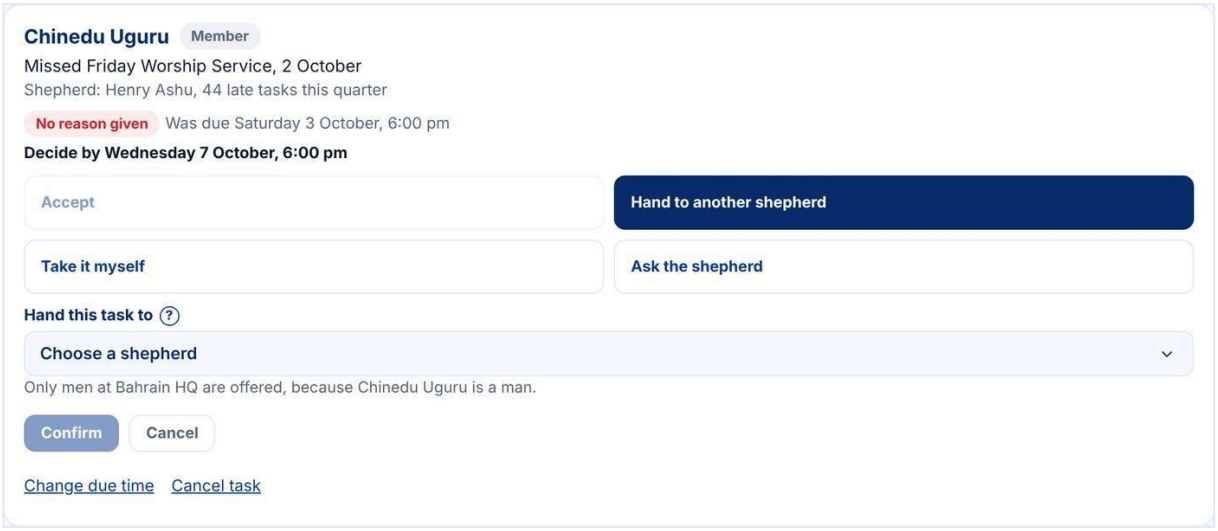

Figure 48. A task on the Review list, being handed to another shepherd.

Table 25. The four choices.

Choice	What happens
Accept	The reason and new date stand. The task is due on the new date.
Hand to another shepherd	This one task goes to another shepherd of the same gender at the same location, with a fresh 24 hours. The person keeps their shepherd, giving the benefit of the doubt.
Take it myself	The coordinator takes the task, with a fresh 24 hours.
Ask the shepherd	A question goes to the shepherd on the task, in the bell and by phone alert. Write the question.

Every reason and decision is kept on the task, so the record can be read later. **Change due time** and **Cancel task** are under each task for a coordinator or an administrator. Cancelling needs a reason, because a cancelled task never reaches the shepherd's record, and it stays in the Audit Log.

The Overview

The **Overview** tab shows the month's measures against the targets, and one row per shepherd: how many people they carry against the limit of 6, open tasks, on time, reached, and late tasks with no reason. Press a row to see that shepherd's people. Below are the people away, and services whose names were not taken.

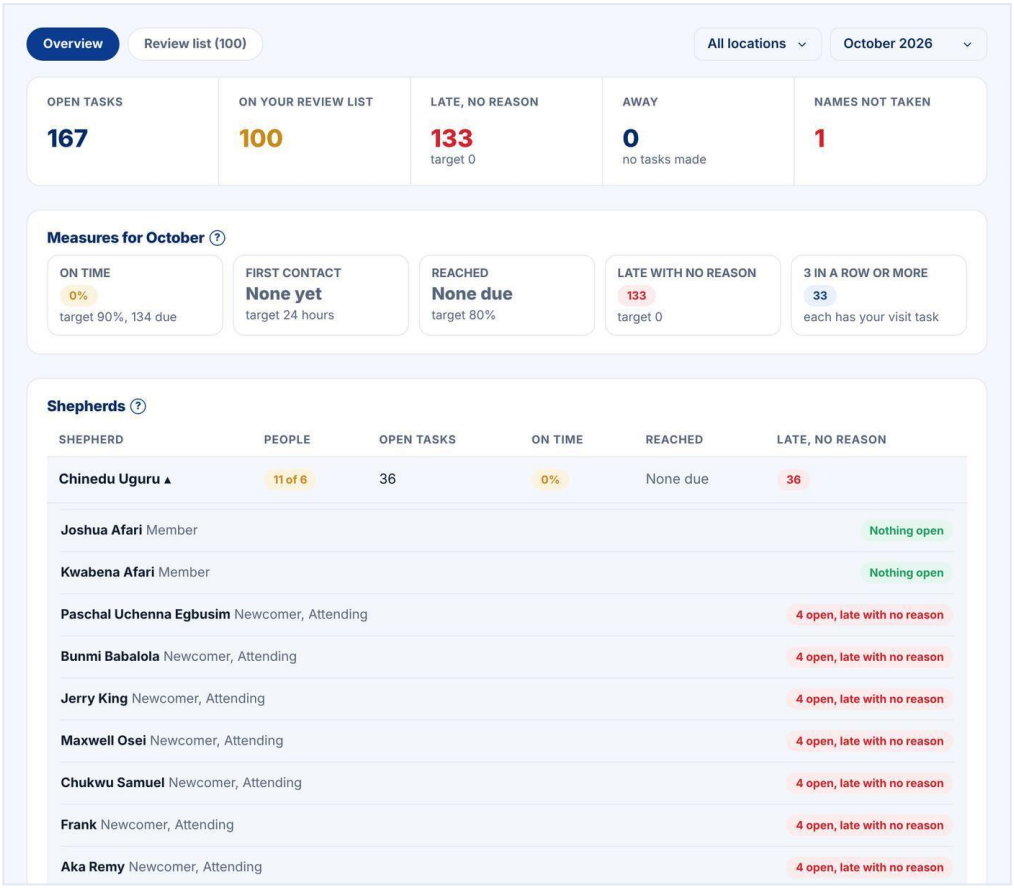

Figure 49. The Overview, with one shepherd's people opened.

Table 26. The measures.

Measure	Means
On time	Tasks with a result by their due time. Target 90%.
First contact	Average hours from the clock start to the first call, message or visit. Target 24 hours.
Reached	Tasks closed as Reached, out of all closed. Target 80%.
Late with no reason	Tasks needing a reason now. Target 0.
3 in a row or more	People who have missed the same meeting 3 times or more, each with your visit task.

> Tasks closed as Was present or Cancelled are left out of every measure, because they were never really owed.

A person's Tasks tab

On a member's or newcomer's profile, the **Tasks** tab lists every task with when it was made, each attempt, each reason and decision, and how it ended. Coordinators and administrators also see **Hand to another shepherd**, **Change due time** and **Cancel task**.

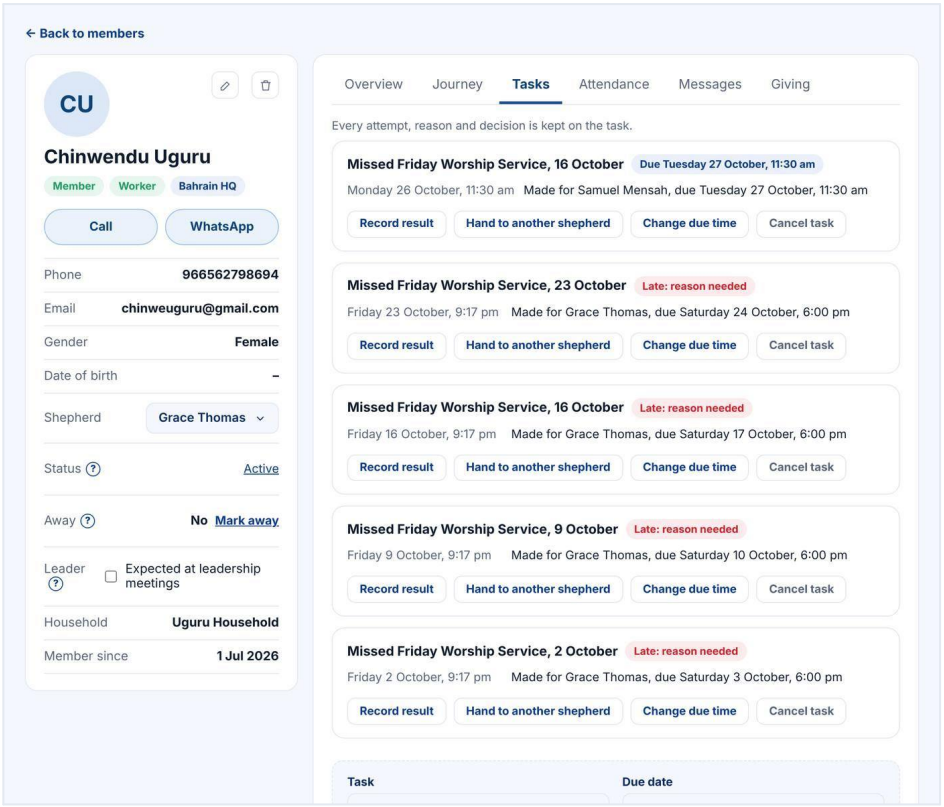

Figure 50. A member's Tasks tab.

On the profile, **Status** sets Active, Moved away or Left the church. Anyone not Active stops being followed up and is hidden from Members, but keeps their history. Delete now says what it would remove, and offers **Set status instead**. **Away** sets dates when no tasks are made. **Leader** means expected at leadership meetings. On a newcomer's profile the **Shepherd** can be chosen, and Not Interested needs a note.

Attendance

Each meeting's session is created on its day, at 2:07 am, unless set to be created earlier, so a future service is never mistaken for one not filled in. The **Status** column says where each stands.

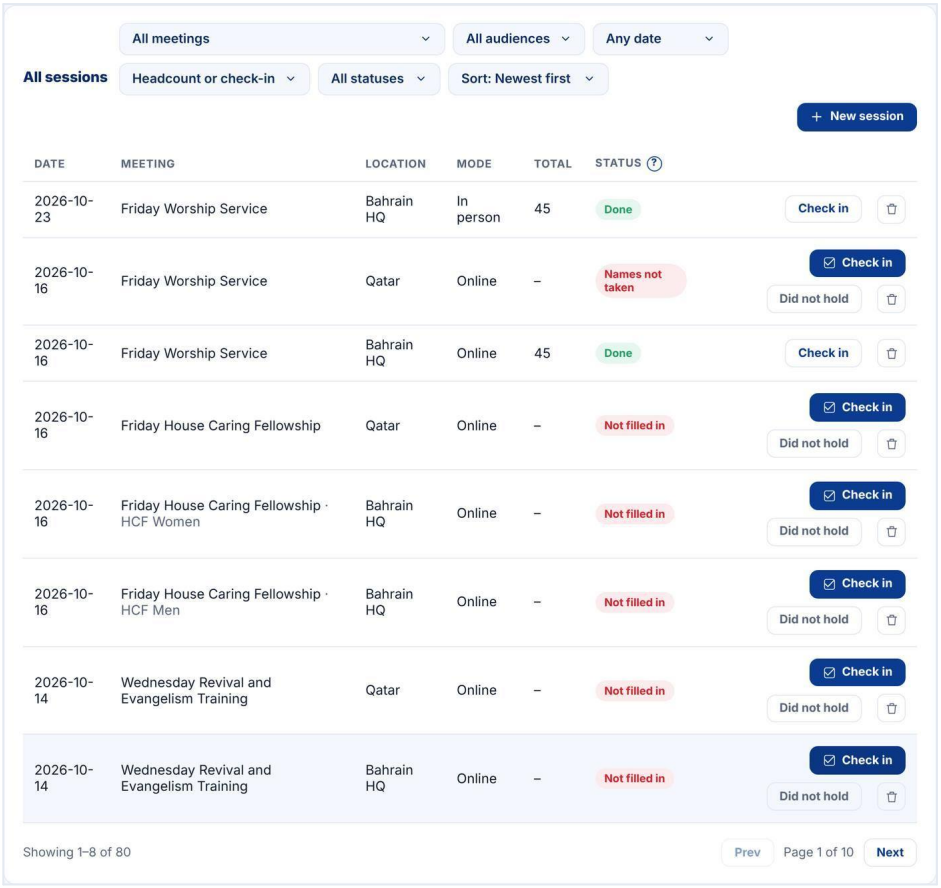

Figure 51. All sessions with their status.

Table 27. Session status.

Status	Means
Upcoming	Its day has not come, so nothing is expected yet.
Waiting for names	Names can be ticked.
Names not taken	Still no names at 6:00 pm the next day, so nobody can be followed up. The Follow-up Coordinator is alerted.
Done	Names ticked.
Did not hold	The service did not take place, such as a public holiday. Press **Did not hold** on its row and say why. Nobody is followed up and it is left out of averages. It can be undone.

Names ticked after the absence check has run make their tasks at the next check, within 30 minutes, with the 24 hours starting then. The check-in page says so. Someone ticked after their task was made closes it as **Was present**, and their shepherd is told. Reopening a filled session now shows its saved new comers, new converts, leader, lesson and offering, and saving keeps the offering unless its boxes are changed. Offerings recorded on a service show **From session** on the Giving page and are changed on the session.

Settings

Admin, Follow-up Rules holds every follow-up time and number: the clock, reasons, the Review list and decision times, repeated absences, the shepherd limit, which newcomer stages are followed up, reminders and targets. A worked example shows what the times mean for next Friday. Every change is written to the Audit Log, and **Put back the decided values** restores those of 26 October 2026.

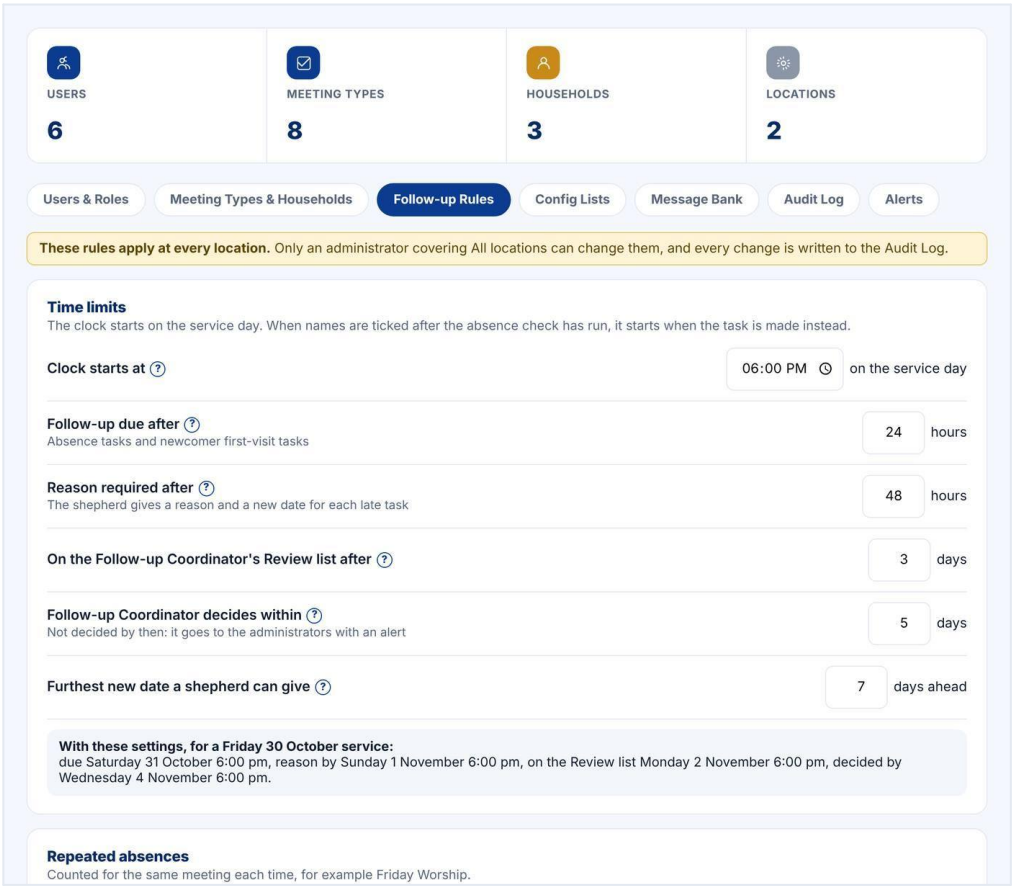

Figure 52. Admin, Follow-up Rules.

In **Admin, Meeting Types**, **Settings** on each meeting sets its start time, how many days before the meeting its session is created, and the locations it is held at. A meeting that follows up absence with no start time is never checked, and its row says so.

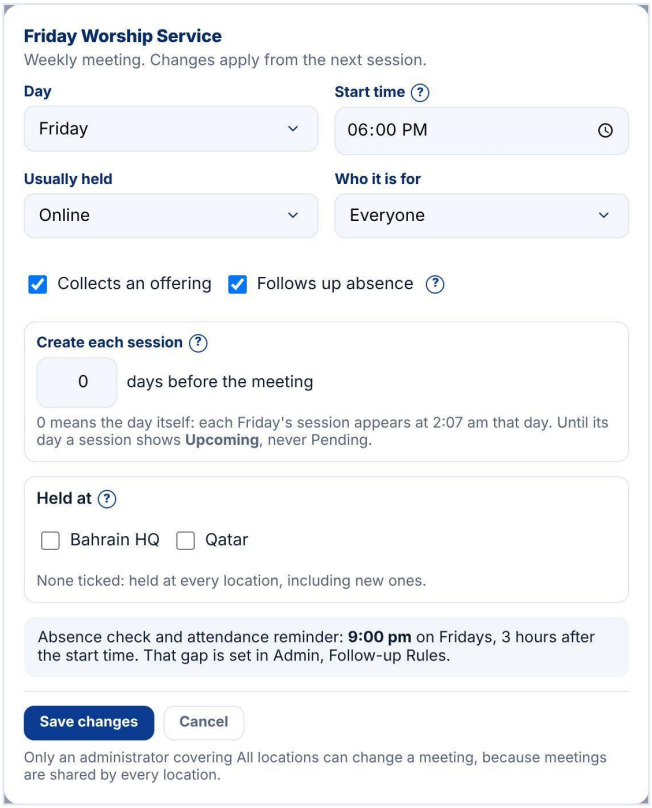

Figure 53. A meeting's settings.

In **Admin, Users**, **Edit** on each account changes the name, email, role, location, gender and member record, the **Can shepherd others** and **Follow-up Coordinator** ticks, and what the coordinator covers. **Send password reset link** emails a link that works once, for one hour. **Switch off** stops someone signing in and hands their open tasks to the Follow-up Coordinator, keeping their history. **Add to member roll** makes a member record from the account.

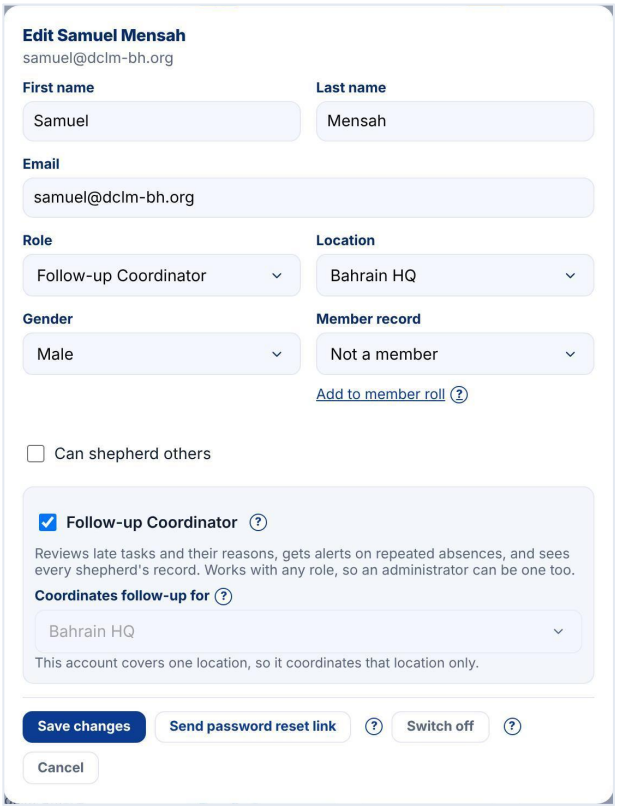

Figure 54. Editing an account.

Table 28. Other changes in version 11.14.

Where	What changed
Today's messages	**Missed** lists planned messages from the last 14 days not sent or skipped. **Send now** records it on that day's plan, **Dismiss** removes it.
Start messages	Nobody is ticked to begin with. Those who unticked Keep in touch on their form are listed apart and cannot be started.
Newcomers table	Tick several, choose a shepherd and press **Assign**. Their open tasks move too.
Goals	**Automatically** measures average attendance, sessions held, people checked in by name, a fund total, or giving less expenses, for a meeting and a location.
QR form	Each phone can send 5 forms a day, so visitors on the church Wi-Fi never block each other. **Phones turned away today** on the QR page lets them in.
Locations	A location with accounts or house fellowships cannot be removed. The message names them.
Any refused save	A message says why, in the server's own words.
Phone alerts	If alerts are blocked, My profile gives the steps for that phone or computer.

Table 29. Follow-up problems and what to do.

What happens	What to do
I cannot record a result	Give the reasons for your late tasks first, from the red box in My follow-up.
Someone was there but got a task	Tick them on the session's check-in page. The task closes as Was present. A coordinator can also cancel it with a reason.
A service did not take place	Press Did not hold on its row in Attendance and say why.
Nobody got tasks after a service	Names must be ticked, and the meeting needs a start time. Check the meeting's Settings.
Late tasks go to the administrators	No Follow-up Coordinator covers that location. Tick one in Admin, Users.
A newcomer who stopped coming keeps getting tasks	Mark them Not Interested on their profile, with a note.

14. Month-end balance

Each month the money held is balanced: what the records say should be there against what is actually there. The Accounts person counts and balances the month, a different person approves it, and the month is then closed, so the figures in the month-end report never change afterwards. This is general practice for church money: every month checked by two people, and any later change made on purpose, with a reason.

Table 30. Who does what.

Step	Who
1. Record giving and expenses through the month, on the day	Accounts, in **Giving & Finance, Giving and expenses**. Offerings recorded on a service are included.
2. Count the money, balance the month and send it for approval	Accounts, in **Giving & Finance, Month-end balance**, from the last day of the month.
3. Approve and close	A Finance Approver, or anyone whose role includes **Approve month-end**. Never the person who prepared the month.
4. Reopen a closed month, if something must change	An administrator, with a reason kept in the Audit Log.

Balancing a month

1. Open **Giving & Finance**, then the **Month-end balance** tab, and choose the month.
2. Check the figures: the opening balance, plus giving, less expenses, less remittance sent, give the **Expected closing balance**.
3. Two people count the cash together on the last day of the month. Type the amount in **Cash counted**, and both names in **Counted by** and **And by**. A photo of the count sheet can be added.
4. If it says **It balances**, press **Send for approval**. If there is a difference, look for a missing entry first, such as an expense not recorded. If it cannot be found, explain it, then send.

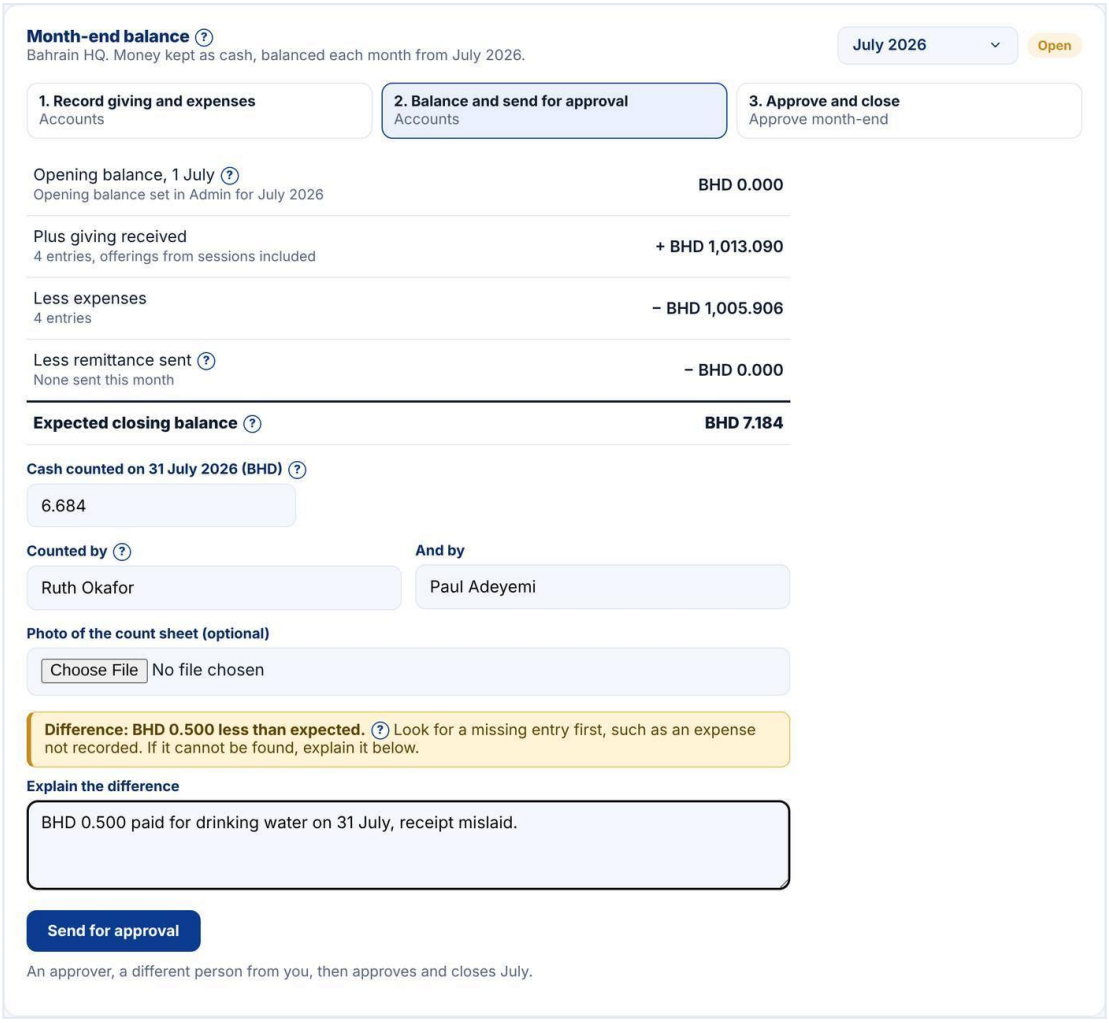

Figure 55. Balancing July, with a difference explained.

Table 31. The figures.

Figure	Means
Opening balance	The approved closing balance of the month before. For the start month, the opening balance set in Admin.
Plus giving received	Every giving entry dated in the month, offerings from services included.
Less expenses	Every expense dated in the month.
Less remittance sent	Remittances by the date they were sent, whichever month's money they were. Example: September's remittance sent on 3 October comes out of October.
Expected closing balance	What the records say should be held on the last day of the month.
Cash counted	What two people counted. With a bank account, the closing balance on the bank statement.
Difference	Cash counted less the expected closing balance. Shown to the fils, so even BHD 0.005 shows.

Approving and closing

The approver gets an alert in the bell and on their phone. They open the month, check the figures and the counters, and press **Approve and close**. If something needs correcting, **Send back with a note** returns it to the Accounts person, who sees the note at the top.

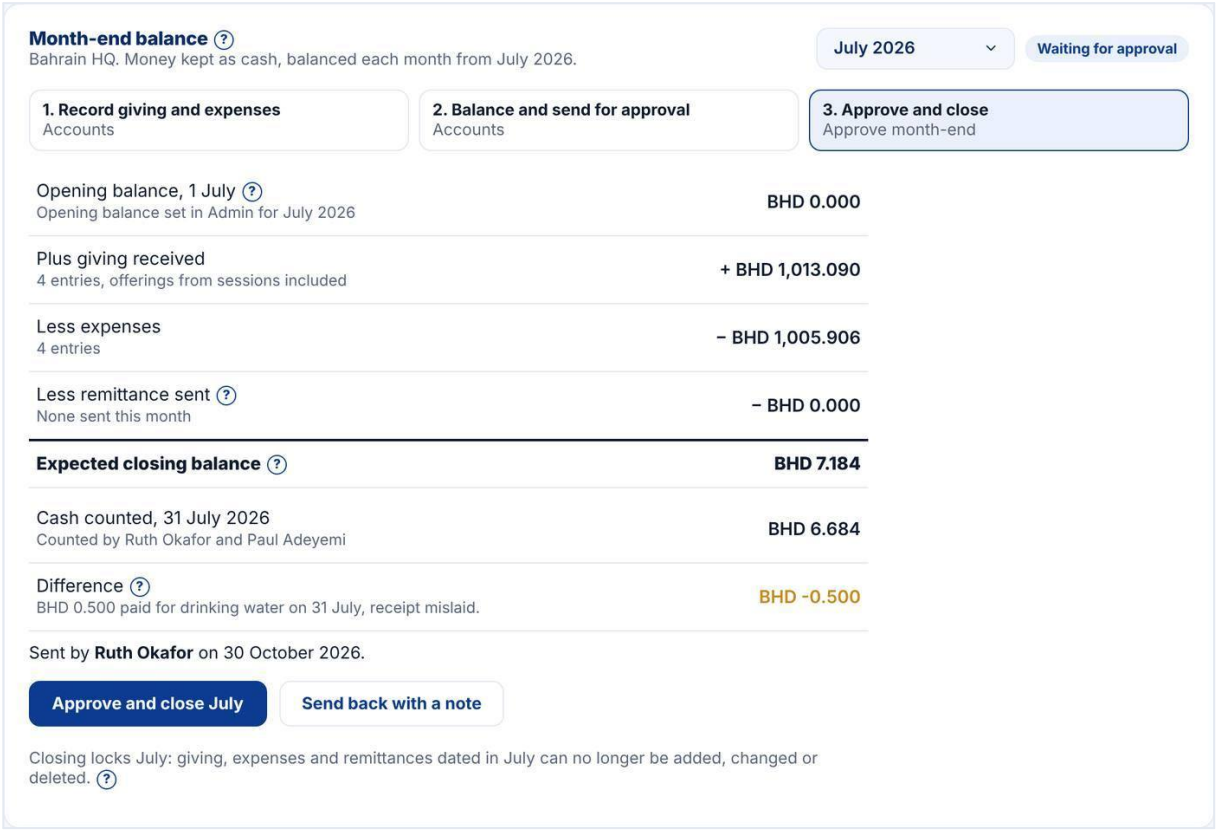

Figure 56. July waiting for approval.

> While a month waits for approval, and once it is closed, giving, expenses, offerings and remittances dated in it cannot be added, changed or deleted. The app says so, and says what to do.

Each month opens with the closing balance of the month before, so the months are closed in order. The list under the month shows every month from the start month, with its closing balance, difference and who approved it.

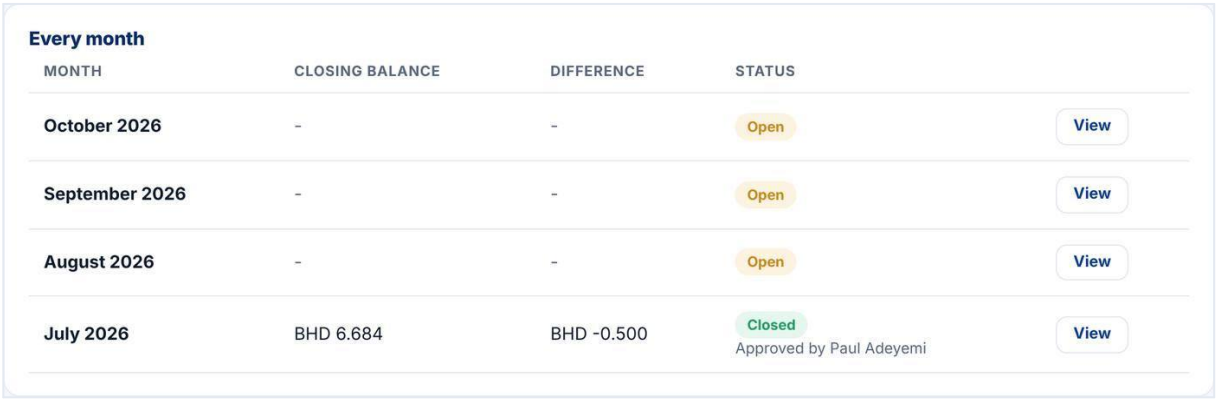

Figure 57. Every month, with July closed.

Reopening a month

An administrator presses **Reopen** on the month and says why, for example a receipt handed in late. The reason is kept in the Audit Log, and the month must be balanced and approved again. Only the latest closed month can be reopened, because each later month opens with its closing balance: to reopen September with October closed, reopen October first.

Settings

In **Admin, Config Lists, Money**, an administrator sets for each location how the money is kept, **Cash** or **Bank account**, the **Start month**, and the **Opening balance** on the first day of that month. Bahrain HQ starts in July 2026 with BHD 0.000. The start month and opening balance can change until the first month is sent for approval.

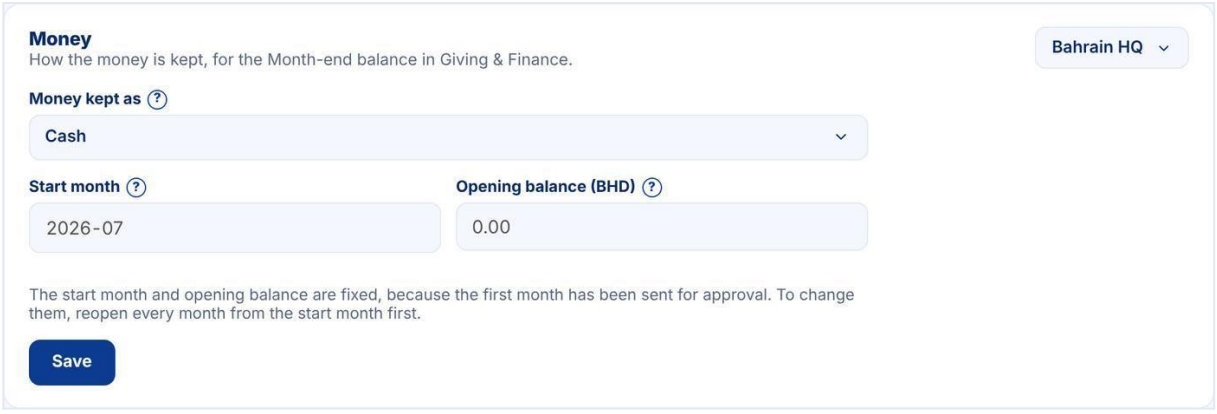

Figure 58. Admin, Config Lists, Money.

The **Finance Approver** role can view giving and reports and approve month-end. Any role can be given **Approve month-end** in **Admin, Roles & Permissions**. The month-end report shows a table of the money held at each month end, with any difference explained.

Table 32. Month-end problems and what to do.

What happens	What to do
It does not balance	Look for an expense not recorded or giving recorded twice. If it cannot be found, explain the difference.
I cannot send August	Close July first. August opens with July's closing balance.
The month has not ended yet	It can be balanced from its last day.
I cannot approve the month	You prepared it, so someone else approves it. Or your role does not include Approve month-end.
An expense dated October is refused	October is closed or waiting for approval. Use a November date, or ask an administrator to reopen October.
The start month is wrong	Change it in Admin, Config Lists, Money, before the first month is sent for approval.

15. Finding people and ticking newcomers

Newcomers and online contacts can be found by name, phone or email, an online contact's details can be corrected, Salvation has one clear place, and newcomers can be ticked wherever names are ticked.

Finding a newcomer

1. Open **Newcomers & Follow-up**.
2. Type part of a name, a phone number or an email in the search box above the filters. Phone numbers match on digits, so **3312 4455** finds **+973 33124455**.
3. The board or table shows only those who match. The search looks in active stages. Choose **All stages** to include Not Interested.

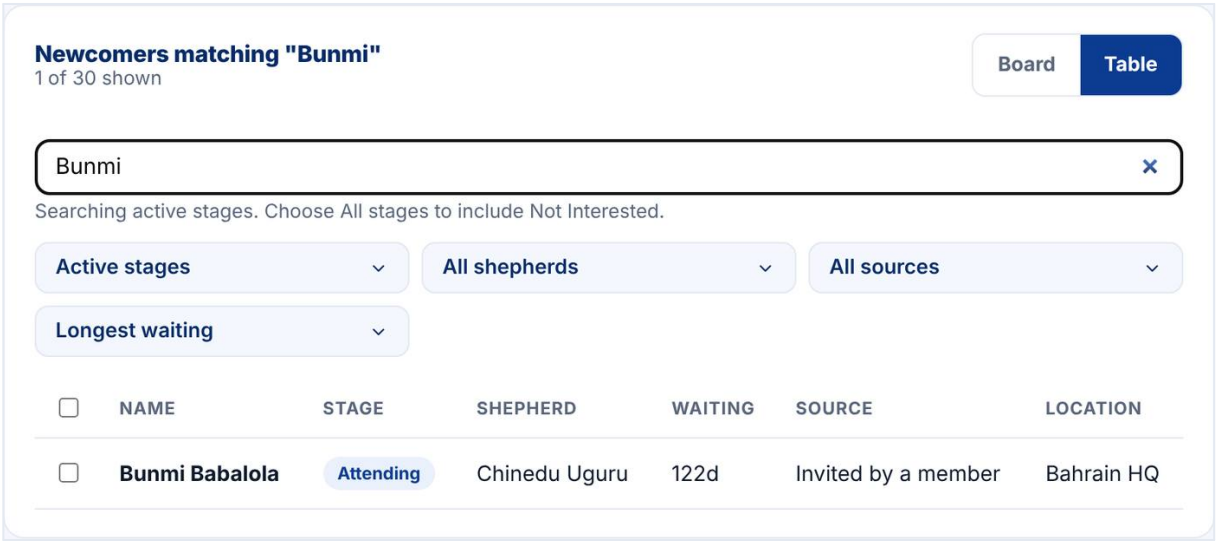

Figure 59. Searching newcomers, in the table.

Recording Salvation

Salvation and the other milestones are ticked on the newcomer's **Journey** tab, under **Spiritual milestones**. The date is saved for you. The Salvation card on the Overview says **Tick Salvation on the Journey tab**, and **Go to Journey** opens it. The pencil edits contact details only, and its form has the same **Go to Journey** link.

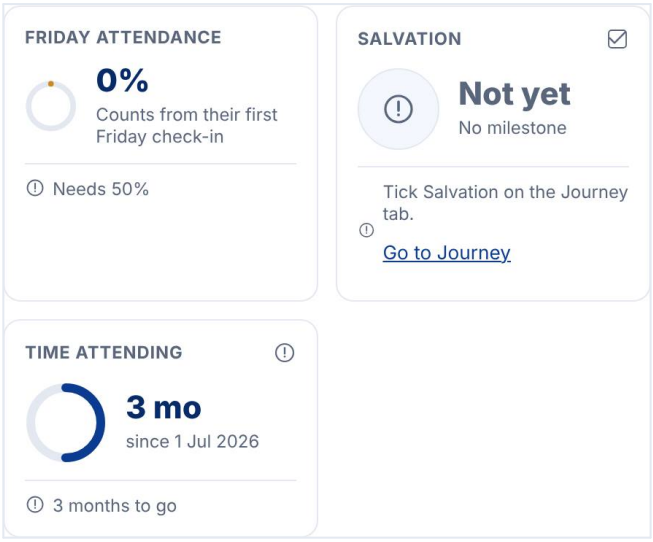

Figure 60. The Salvation card, with Go to Journey.

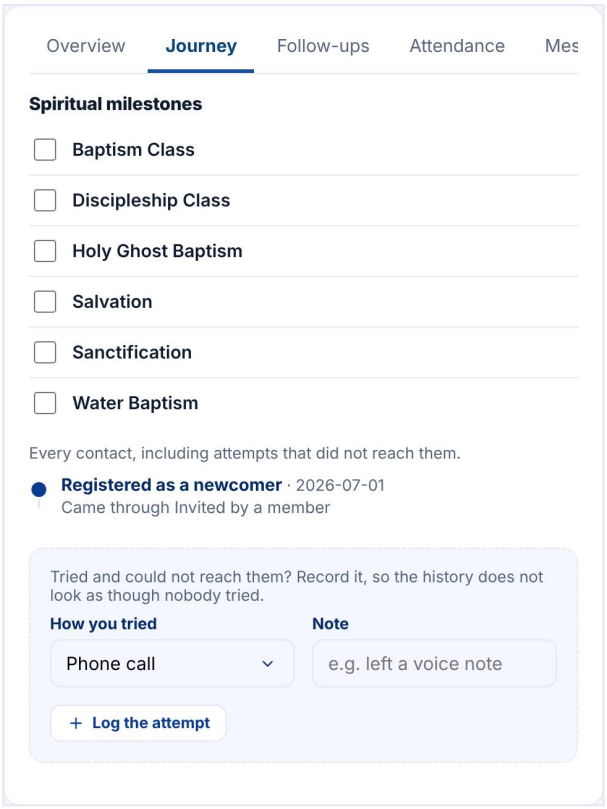

Figure 61. The Journey tab, where Salvation is ticked.

Finding and correcting an online contact

1. Open **Online Enquiries** and type a name, phone, email or handle in **Find a contact**. The number found shows under the box.
2. Open the contact and press the pencil beside the name.
3. Correct the name, phone, email, social handle, where they are, or what they asked, then press **Save changes**.

At least one of phone, email or social handle must stay filled in, so someone can reach them. Gender, follow-up person and stage are changed lower down the page, as before. Each change is kept in the

Audit Log.

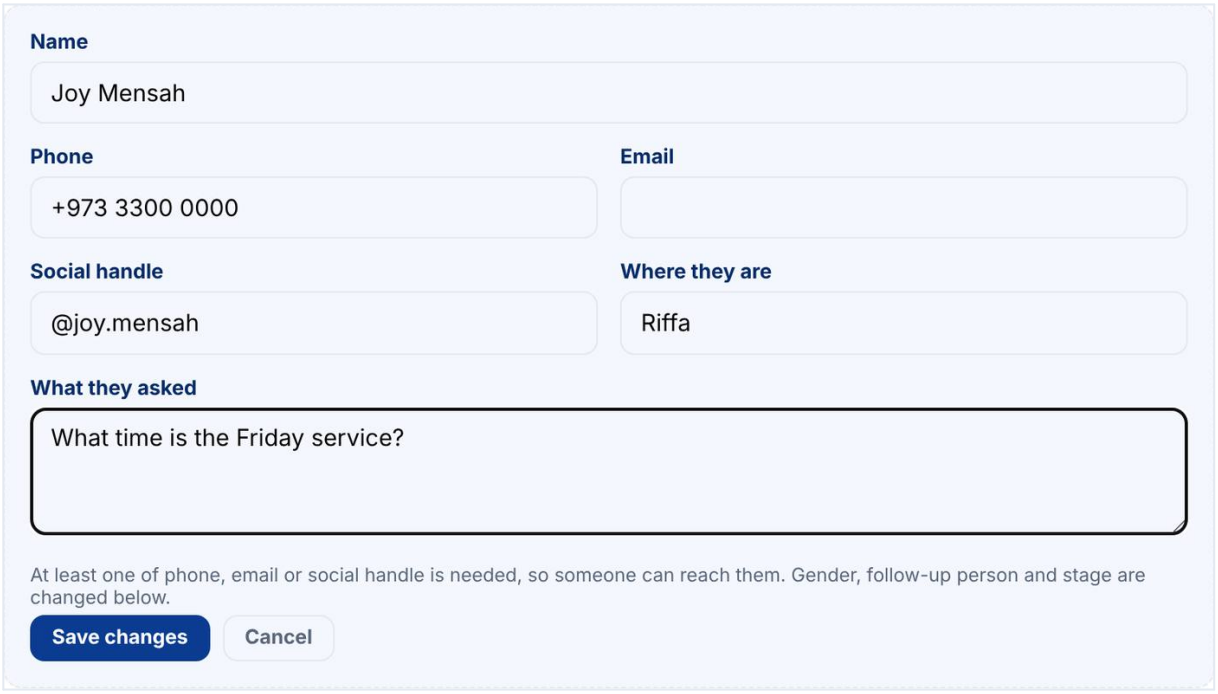

Figure 62. Correcting an online contact's details.

Ticking newcomers by name

Newcomers being followed up at the session's location, in stages New, Contacted and Attending, are listed wherever names are ticked: on **Check in** and under **Track named attendance** on the session page. They are listed first, as there are few of them. Four buttons narrow a long list.

Table 33. Narrowing the list.

Button	Shows
Everyone	Newcomers first, then members by category.
Members	Members only.
Newcomers	Newcomers only, each with their stage.
Not ticked	Everyone not ticked yet, to see who is left.

Check in shows 50 names at a time. Press **Show more** for the next 50, or search. On the session page, tick **Track named attendance for this session**, tick each person who came, and press **Save session**. Unticking someone and saving removes them. A newcomer checked in online at the door stays online.

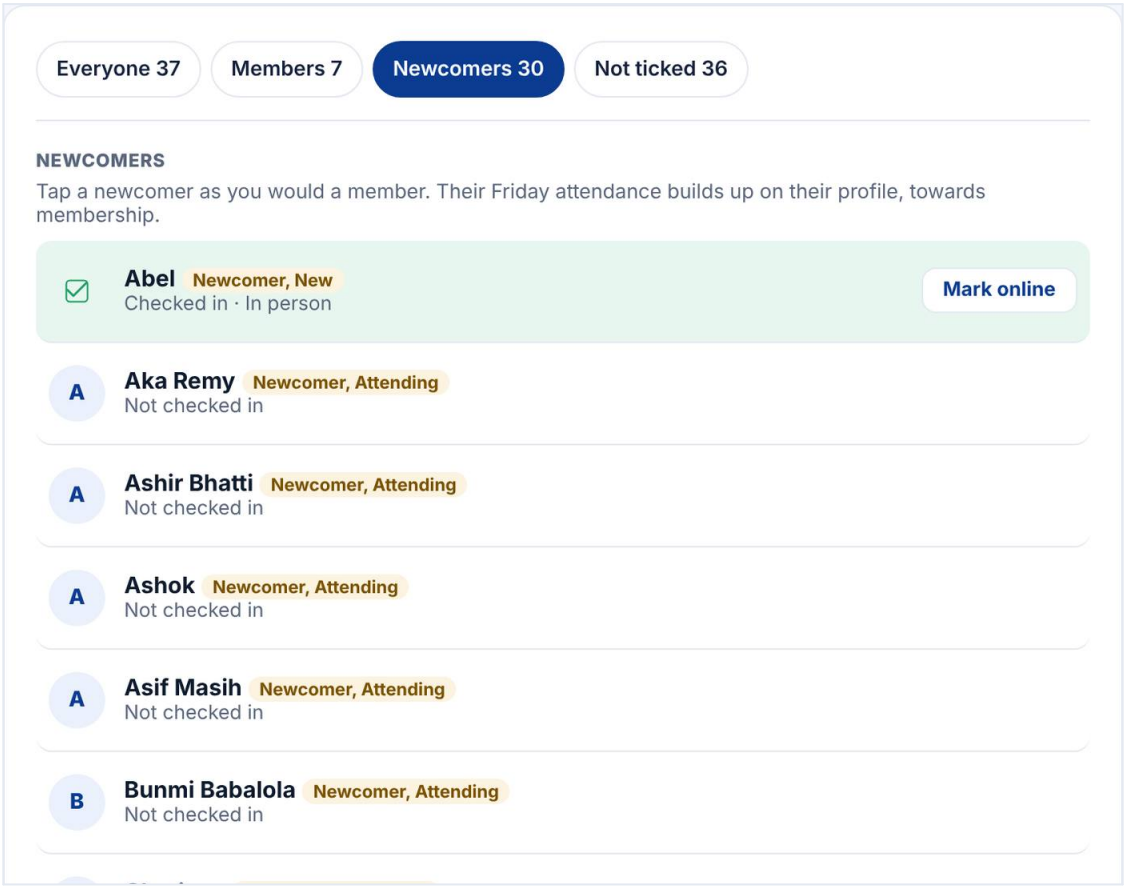

Figure 63. Check in, with Newcomers chosen.

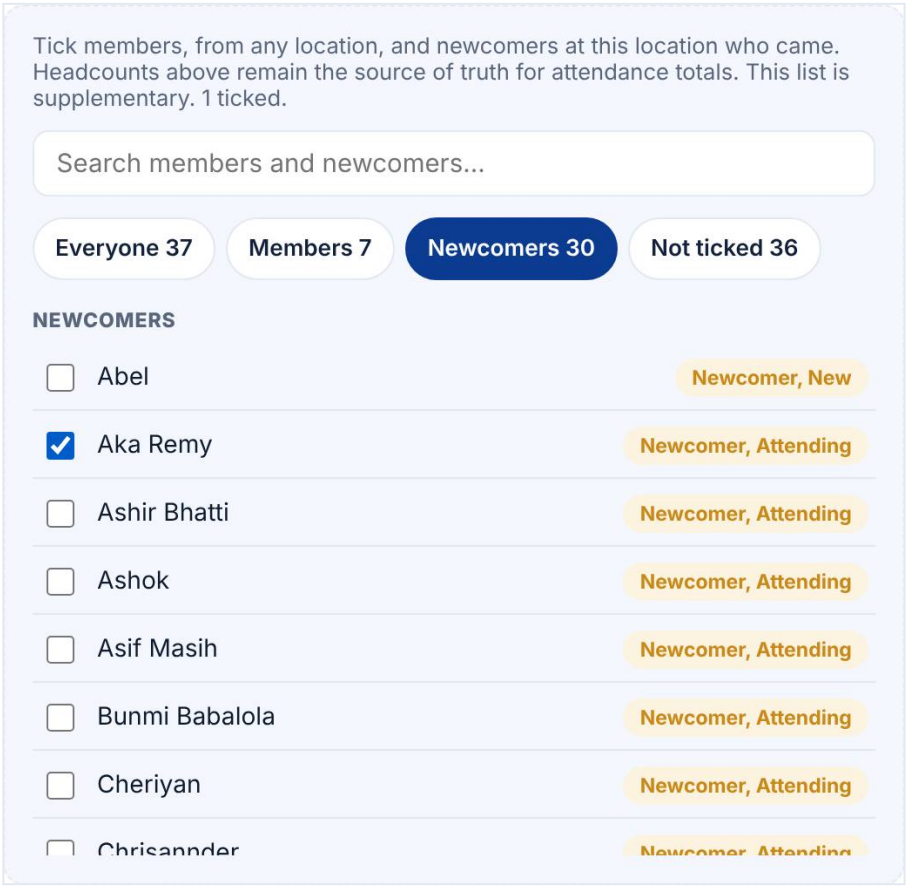

Figure 64. Named attendance on the session page.

Table 34. Problems and what to do.

What happens	What to do
A newcomer is not on the check-in list	Check their stage and location on their profile. Members, Not Interested, and newcomers at another location are not listed.
The contact's details will not save	Keep at least one of phone, email or social handle.
The pencil has no Salvation box	Press Go to Journey and tick Salvation under Spiritual milestones.
Search finds nobody on Online Enquiries	A follow-up person filter may be on. Choose Everyone, then search again.
